

HSE Vision Statement

“The Agency’s Health and Human Services Enterprise (HSE) is Vermont’s next generation of coordinated, integrated and more cost-effective health and human services capabilities. Connecting information and promoting collaboration in a service-oriented, person-centric environment will result in improved access to health care and delivery of human services programs available from the state. This in turn will yield better and more cost-effective outcomes for Vermonters. These evolving capabilities will be used to enable the state’s emerging strategy for a reformed health care delivery system.”
