Clinical Criteria Manual

July 1, 2013

Preferred Drug List and Drugs Requiring Prior Authorization

The Commissioner for Office of Vermont Health Access shall establish a pharmacy best practices and cost control program designed to reduce the cost of providing prescription drugs, while maintaining high quality in prescription drug therapies. The program shall include:

“A preferred list of covered prescription drugs that identifies preferred choices within therapeutic classes for particular diseases and conditions, including generic alternatives”

From Act 127 passed in 2002

The following pages contain:

- The therapeutic classes of drugs subject to the Preferred Drug List, the drugs within those categories and the criteria required for Prior Authorization (P.A.) of non-preferred drugs in those categories.
- The therapeutic classes of drugs which have Clinical Criteria for Prior Authorization may or may not be subject to a preferred agent.
- Within both of these categories there may be drugs or even drug classes that are subject to Quantity Limit Parameters.

Therapeutic class criteria are listed alphabetically. Within each category the Preferred Drugs are noted in the left-hand columns. Representative non-preferred agents have been included and are listed in the right-hand columns. Any drug not listed as preferred in any of the included categories requires Prior Authorization.

1. THERAPEUTIC CLASS CRITERIA

Acne Medications:

Oral	6
Topical-Anti-infectives	8
Topical-Retinoids	10
Topical-Rosacea	11

Alpha₁-Proteinase Inhibitors..... 12

Alzheimer’s Medications:

Cholinesterase Inhib/NMDA Receptor Antagonists	13
--	----

Analgesics:

Cox-2 Inhibitors and NSAIDs	15
Miscellaneous: Transdermal Patch	19
Narcotics-Short Acting	20
Narcotics-Long Acting	23
Long Acting Narcotics - P. A. Request Form	26

Anemia Medications..... 27

Ankylosing Spondylitis-Injectables..... 28

Anti-anxiety: Anxiolytics..... 30

Anticoagulants..... 32

Anticonvulsants..... 34

Anti-depressants:

Miscellaneous	38
SNRIs	40
SSRIs	42
Tricyclics & MAOIs	44

Anti-diabetics:

Insulin	46
Oral	47
Peptide Hormones	50

Anti-emetics:

5-HT₃ Antagonists	51
NK1 Antagonists	53
THC Derivatives	54

Anti-hyperkinesia and Anti-Narcolepsy:

Short/Intermediate-Acting MPH	55
Long-Acting MPH	55
Short/Intermediate-Acting Amphetamines	55
Long-Acting Amphetamines	55
Non-Stimulant Products	56
Xyrem	58

Anti-hypertensives:

ACE Inhibitors & ACEI Combinations	60
ARBs & ARB Combinations	61
Beta-Blockers	64
Calcium Channel Blockers	66
Central Alpha Agonists	68
Renin Inhibitors	70

Anti-infectives:

Antibiotics: Cephalosporins -1st, 2nd and 3rd Gen.	71
Antibiotics: Ketolides	73
Antibiotics: Macrolides	74
Antibiotics: Oxazolidinones	76

Antibiotics: Penicillins (Oral)	77
Antibiotics: Quinolones	78
Antibiotics: Rifamycins	79
Antibiotics: Vancomycin	81
Anti-fungal: Allylamines	82
Anti-fungal: Azoles	84
Antimalarials: Quinine	86
Antivirals: Herpes (Oral)	87
Antivirals: Influenza Medications	88
Antivirals: Influenza Vaccines	90
<u>Anti-migraine: Triptans</u>	92
<u>Anti-Obesity</u>	95
<u>Anti-psychotics:</u>	
Atypicals & Combinations-CHILDREN	96

Acne Drugs: Oral

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Brand name minocycline products:

- The patient has had a documented side effect, allergy, or treatment failure with generic minocycline. If a product has an AB rated generic, the trial must be the generic formulation.

Brand name doxycycline products (see below for Oracea[®] and Vibramycin[®] Suspension),:

- The patient has had a documented side effect, allergy, or treatment failure with generic doxycycline. If a product has an AB rated generic, the trial must be the generic formulation.

Oracea[®]:

- The patient has a diagnosis of Rosacea.

AND

- The patient has had a documented side effect, allergy, or treatment failure with doxycycline, minocycline, and tetracycline.

Vibramycin[®] Suspension, Syrup:

- The patient has a medical necessity for a liquid dosage form.

Brand name erythromycin products:

- The patient has had a documented side effect or treatment failure with one preferred erythromycin product.

Brand name tetracycline products:

- The patient has had a documented side effect, allergy, or treatment failure with generic tetracycline. If a product has an AB rated generic, the trial must be the generic formulation.

LIMITATIONS:

Minocycline SR products and doxycycline SR and DR products (brand and generic) not covered. Adoxa[®] Pak and doxycycline monohydrate Pak specialty packaging dosage form not covered. Adoxa[®] 150mg cap and doxycycline monohydrate 150 mg cap (brand and generic) not covered.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Acne Drugs: Oral

Length of Authorization: 1 year

Key: † Generic product, *Indicates generic equivalent is available without a PA

PREFERRED DRUGS (No PA Required)	PA REQUIRED
DOXYCYCLINE† 20mg, 50mg, 75mg, 100mg, tab, cap	Adoxa ^{®*} (doxycycline monohydrate) 50 mg, 75 mg, 100 mg tab Monodox ^{®*} (doxycycline monohydrate) 50 mg, 100 mg cap Oracea [®] (doxycycline monohydrate) 40 mg cap Periostat ^{®*} (doxycycline hyclate) 20 mg Vibramycin ^{®*} (doxycycline hyclate) 50 mg, 100 mg cap Vibramycin [®] (doxycycline hyclate) suspension Vibramycin [®] (doxycycline calcium) syrup Vibratab ^{®*} (doxycycline hyclate) 100 mg tab All other brands

Acne Drugs: Topical-Anti-infectives

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Brand name single ingredient products:

- The patient has had a documented side effect, allergy, or treatment failure with generic benzoyl peroxide, clindamycin, erythromycin, and sodium sulfacetamide. (If a product has an AB rated generic, one trial must be the generic.)

Brand name combination products:

- The patient has had a documented side effect, allergy, or treatment failure with generic erythromycin/benzoyl peroxide and sodium sulfacetamide/sulfur. (If a product has an AB rated generic, one trial must be the generic.)
AND
- The patient has had a documented side effect or treatment failure on combination therapy with the separate generic ingredients of the requested combination product, if applicable.

Azelex[®]

- The diagnosis or indication is acne or rosacea.
AND
- The patient has had a documented side effect, allergy, or treatment failure with two generic topical anti-infective agents (benzoyl peroxide, clindamycin, erythromycin, erythromycin/benzoyl peroxide, sodium sulfacetamide, sodium sulfacetamide/sulfur etc).

LIMITATIONS:

Kits with non-drug products are not covered.

Benzoyl Peroxide Aerosol (Foam) and Benzefoam[®] not covered. Other topical generic benzoyl peroxide preparations preferred.

Clindamycin Aerosol (Foam) and Evoclin[®] not covered. Other topical generic clindamycin preparations preferred.

Sodium sulfacetamine/Sulfur Aerosol (Foam), Rosula[®] and Clarifoam[®] not covered. Other topical generic sodium sulfacetamide/sulfur preparations preferred.

Epiduo[®] (adapalene/benzoyl peroxide) combination not covered. Agents may be prescribed separately.

SE BPO[®] (benzoyl peroxide) foaming cloths dosage form not covered. Other topical generic benzoyl peroxide preparations preferred.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Acne Drugs: Topical - Retinoids

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Brand name tretinoin products and generic tretinoin microspheres:

- The diagnosis or indication is acne vulgaris, actinic keratosis, or rosacea.
- AND
- The patient has had a documented side effect, allergy, or treatment failure with a preferred generic topical tretinoin product. If a product has an AB rated generic, the trial must be the generic formulation.

Differin (brand) and adapalene (generic):

- The diagnosis or indication is acne vulgaris, actinic keratosis, or rosacea.
- AND
- The patient has had a documented side effect, allergy, or treatment failure with a preferred generic topical tretinoin product.
- AND
- If the request is for the brand product, the patient has had a documented intolerance to a generic adapalene product.

Tretinoin (age <10 or >34):

- The diagnosis or indication is acne vulgaris, actinic keratosis, or rosacea.

LIMITATIONS:

Coverage of topical retinoid products will not be approved for cosmetic use (wrinkles, age spots, etc.).

Epiduo Gel, Ziana – These combinations not covered, individual components may be prescribed separately.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

C=cream, G=gel

Acne Drugs: Topical - Rosacea

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Brand name metronidazole products and Finacea:

- The diagnosis or indication is acne or rosacea.

AND

- The patient has had a documented side effect, allergy or treatment failure with a generic topical metronidazole product. If a product has an AB rated generic, the trial must be the generic formulation.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Acne Drugs: Topical – Rosacea		<i>Length of Authorization: 1 year</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA

METRONIDAZOLE† 0.75% C, G, L	All brand metronidazole products (MetroCream®* 0.75% C, Metrogel®* 0.75% G, Metrogel® 1% G, MetroLotion®* 0.75% L, Noritate® 1% C, Rozex® 0.75% G etc.) Finacea® (azelaic acid) 15% G	

C=cream, G=gel, L=lotion

Alpha₁-Proteinase Inhibitors

LENGTH OF AUTHORIZATION: 6 months

CRITERIA FOR APPROVAL:

The indication for use is treatment of alpha₁-proteinase inhibitor deficiency-associated lung disease when all of the following criteria are met:

- Patient's alpha₁-antitrypsin (AAT) concentration < 80 milligrams per deciliter (mg/dl) [or <11 micromolar (µM)]
AND
- Patient has obstructive lung disease as defined by a forced expiratory volume in one second (FEV₁) of 30 – 65 % of predicted or a rapid decline in lung function defined as a change in FEV₁ of > 120 mL/year.
AND
- Medication is being administered intravenously (inhalation administration will not be approved).
AND
- Patient is a non-smoker.
OR
- Patient meets above criteria except lung function has deteriorated beneath above limits while on therapy.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**
- ✓ All requests for alpha₁-proteinase inhibitors (whether billed through the pharmacy or medical benefit (J0256 – all except Glassia[®] or J0257 - Glassia[®])) require Prior Authorization through the Catamaran Clinical Call Center.

Alpha₁-Proteinase Inhibitors		<i>Length of Authorization: 6 months</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Aralast NP [®] Glassia [®] Prolastin [®] Prolastin-C [®] Zemaira [®]	**Maximum days supply per fill for all drugs is 14 days**

Alzheimer's: Cholinesterase Inhibitors/NMDA Receptor Antagonists

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Cognex Capsule, Galantamine Tablet, Galantamine ER Capsule, Razadyne Tablet, Razadyne ER Capsule:

- The diagnosis or indication for the requested medication is Alzheimer's disease.
AND
- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The patient had a documented side effect, allergy or treatment failure to Aricept and Exelon.
AND
- If the product has an AB rated generic, the patient has a documented intolerance to the generic.

Donepezil:

- The diagnosis or indication for the requested medication is Alzheimer's disease.
AND
- The patient has a documented intolerance to the brand product.

Galantamine Oral Solution, Razadyne Oral Solution:

- The diagnosis or indication for the requested medication is Alzheimer's disease.
AND
- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The patient had a documented side effect, allergy or treatment failure to Exelon Oral Solution.
AND
- If the product has an AB rated generic, the patient has a documented intolerance to the generic.

Aricept ODT, donepezil ODT:

- The diagnosis or indication for the requested medication is Alzheimer's disease.
AND
- Medical necessity for a specialty dosage form has been provided.
AND
- If the request is for donepezil ODT, the patient has a documented intolerance to the brand product.

Rivastigmine Oral Capsule:

- The diagnosis or indication for the requested medication is Alzheimer's disease.
AND
- The patient has a documented intolerance to the brand Exelon product.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Alzheimer's: Cholinesterase Inhibitors/NMDA Receptor Antagonists

Length of Authorization: 1 year

Key: § Indicates drug is managed via automated Step Therapy (prerequisite drug therapy automatically screened for upon claims processing)

<p><u>CHOLINESTERASE INHIBITORS</u> ARICEPT[®] (donepezil) Tablet <i>(QL = 1 tablet/day)</i> EXELON[®] (rivastigmine) Capsule <i>(QL = 2 capsules/day)</i></p> <p>EXELON[®] (rivastigmine) Oral Solution</p> <p>EXELON[®] (rivastigmine transdermal) Patch <i>(QL = 1 patch/day)</i></p> <p><u>NMDA RECEPTOR ANTAGONIST</u> NAMENDA[®] (memantine) Tablet NAMENDA[®] (memantine) Oral Solution</p>	<p>Cognex[®] (tacrine) Capsule § donepezil† (compare to Aricept[®]) tablet <i>(QL = 1 tablet/day)</i> galantamine† tablet § (compare to Razadyne[®]) galantamine ER† capsule § (compare to Razadyne ER[®]) Razadyne[®] (galantamine) Tablet Razadyne ER[®] (galantamine) Capsule rivastigmine† (compare to Exelon[®]) capsule <i>(QL = 2 capsules/day)</i></p> <p>Aricept[®] ODT (donepezil) <i>(QL = 1 tablet/day)</i> donepezil ODT† (compare to Aricept[®] ODT) <i>(QL = 1 tablet/day)</i></p> <p>galantamine† (compare to Razadyne[®]) Oral Solution Razadyne[®] (galantamine) Oral Solution</p>

Analgesics: COX II and NSAIDs

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Arthrotec, diclofenac/misoprostol, Duexis:

- The patient has had a documented side effect or treatment failure to two or more preferred generic NSAIDs.
- OR**
- The patient is not a candidate for therapy with a preferred generic NSAID mono-therapy due to one of the following:
 - The patient is 60 years of age or older
 - Patient has a history of GI bleed
 - Patient is currently taking an oral corticosteroid
 - Patient is currently taking methotrexate
- AND**
- The patient is unable to take the individual components separately.
- AND**
- If the request is for brand Arthrotec, the patient has a documented intolerance to the generic equivalent.

Cambia:

- The drug is being prescribed for treatment of acute migraine attacks.
- AND**
- The patient has had a documented side effect or treatment failure to two or more preferred generic NSAIDs, one of which must be generic diclofenac.
- OR**
- The drug is being prescribed for treatment of acute migraine attacks.
- AND**
- The patient has a requirement for an oral liquid dosage form (i.e. swallowing disorder, inability to take oral medications)
- AND**
- The patient has had a documented side-effect or treatment failure with the generic ibuprofen suspension **and** the generic naproxen suspension.

Celebrex:

- The patient does not have a history of a sulfonamide allergy.
- AND**
- The patient has had a documented side effect, allergy, or treatment failure to two or more preferred generic NSAIDs.
- OR**
- The patient is not a candidate for therapy with a preferred generic NSAID due to one of the following
 - The patient is 60 years of age or older
 - Patient has a history of GI bleed
 - Patient is currently taking an anticoagulant (warfarin or heparin)
 - Patient is currently taking an oral corticosteroid
 - Patient is currently taking methotrexate

Flector Patch, Pennsaid:

- The diagnosis or indication is osteoarthritis or acute pain caused by minor strains, sprains, and contusions.
AND
- The patient has had a documented side-effect or inadequate response to Voltaren gel.
AND
- The patient has had a documented side effect or treatment failure with at least two preferred generic NSAIDS.
OR
- The patient is not a candidate for therapy with a preferred generic NSAID due to one of the following:
 - The patient is 60 years of age or older
 - Patient has a history of GI bleed
 - Patient is currently taking an oral corticosteroid
 - Patient is currently taking methotrexate**OR**
- The patient has a documented medical necessity for a topical/transdermal formulation (ex. dysphagia, inability to take oral medications).

Sprix:

- The indication or diagnosis is moderate to moderately severe pain.
AND
- The patient has had a documented inadequate response or intolerance to generic ketorolac tablets.
OR
- The patient has a documented medical necessity for the specialty dosage form (i.e inability to take medication orally (NPO)).

Voltaren Gel:

- The diagnosis or indication is osteoarthritis or acute pain caused by minor strains, sprains, and contusions.
AND
- The patient has had a documented side effect or treatment failure with at least two preferred generic NSAIDS.
OR
- The patient is not a candidate for therapy with a preferred generic NSAID due to one of the following:
 - The patient is 60 years of age or older
 - Patient has a history of GI bleed
 - Patient is currently taking an oral corticosteroid
 - Patient is currently taking methotrexate**OR**
- The patient has a documented medical necessity for a topical/transdermal formulation (ex. dysphagia, inability to take oral medications).

Vimovo:

- The patient has had a documented side effect or treatment failure to two or more preferred generic NSAIDS.
OR
- The patient is not a candidate for therapy with a preferred generic NSAID mono-therapy due to one of the following:
 - The patient is 60 years of age or older
 - Patient has a history of GI bleed
 - Patient is currently taking an oral corticosteroid
 - Patient is currently taking methotrexate**AND**
- The patient is unable to take naproxen and a preferred proton pump inhibitor, separately.

Zipsor:

- The patient has had a documented intolerance to diclofenac tablets.
AND
- The patient has had a documented side effect, allergy, or treatment failure to four or more preferred generic NSAIDS.

All other PA requiring NSAIDs:

- The patient has had a documented side effect or treatment failure to two or more preferred generic NSAIDs. (If a product has an AB rated generic, one trial must be the generic.)

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Consider selectivity for cyclooxygenase-2 of the available nonsteroidal anti-inflammatory agents.

In order of most to least selective for COX-2: (preferred agents bold)

Diclofenac (Voltaren[®]) > Mefenamic acid (Ponstel[®]) > **Meloxicam** (Mobic[®]) >
Celecoxib (Celebrex[®]) = **Etodolac** (Lodine[®]) > **Nabumetone** (Relafen[®]) >
Piroxicam (Feldene[®]) > **Ketorolac** (Toradol[®]) > **Ibuprofen** (Motrin[®], Advil[®]) > **Indomethacin** (Indocin[®]) >
Naproxen (Naprosyn[®], Aleve[®]) > **Oxaprozin** (Daypro[®]) > **Aspirin** > **Tolmetin** (Tolectin[®]) > **Fenoprofen**
(Nalfon[®]) > **Ketoprofen** (Orudis[®]) > **Flurbiprofen** (Ansaid[®])¹

¹ Feldman, McMahon in Ann Intern Med. 2000;132:134-143, Do Cyclooxygenase-2 Inhibitors Provide Benefits Similar to Those of Traditional Nonsteroidal Anti-Inflammatory Drugs, with Less Gastrointestinal Toxicity?

Analgesics: COX II AND NSAIDs

Length of Authorization: 1 year

Key: † Generic product, *Indicates generic equivalent is available without a PA

LENGTH OF AUTHORIZATION: 6 months

CRITERIA FOR APPROVAL:

LIDODERM®

- The diagnosis or indication is neuropathic pain/post-herpetic neuralgia.
AND
- The patient has had a documented side effect, allergy, treatment failure or contraindication to TWO drugs in the tricyclic antidepressant (TCA) class and/or anticonvulsant class
AND
- The patient has had a documented side effect, allergy, treatment failure or contraindication to Lyrica
OR
- The patient has a medical necessity for a transdermal formulation (ex. dysphagia, inability to take oral medications)

QUTENZA®

- The diagnosis or indication is post-herpetic neuralgia.
AND
- The patient has had a documented side effect, allergy, treatment failure or contraindication to TWO drugs in the tricyclic antidepressant (TCA) class and/or anticonvulsant class
AND
- The patient has had a documented side effect, allergy, treatment failure or contraindication to Lyrica
AND
- The patient has had a documented side effect, allergy, treatment failure or contraindication to Lidoderm
OR
- The patient has a medical necessity for a transdermal formulation (ex. dysphagia, inability to take oral medications)
AND
- The patient has had a documented side effect, allergy, treatment failure or contraindication to Lidoderm

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Analgesics: Miscellaneous: Transdermal Patch <i>Length of Authorization: 6 months</i>	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
All products require PA.	Lidoderm® Patch (lidocaine 5 %) <i>Quantity Limit = 3 patches/day</i> Qutenza® Patch (capsaicin 8 %) <i>Quantity Limit = 4 patches/90 days</i>

Note: Please refer to “Analgesics: Long Acting Narcotics” for Duragesic® and fentanyl patch
 Please refer to “Analgesics: COX II and NSAIDs” for Flector® patch

Analgesics: Narcotics: Short Acting

LENGTH OF AUTHORIZATION: initial approval 3 months, subsequent approval up to 6 months

CRITERIA FOR APPROVAL:

Butorphanol Nasal Spray

- The member has had a documented side effect, allergy, treatment failure, or contraindication to codeine, hydrocodone, morphine, and oxycodone (all 4 generic entities) as single or combination products.

OR

- The member is unable to use tablet or liquid formulations.

Abstral[®], Actiq[®], fentanyl transmucosal, Fentora[®], Onsolis[®], Subsys[®]

- Indication of cancer breakthrough pain (**no** approval for acute pain or postoperative pain)

AND

- Documentation that the patient is opioid tolerant (oral morphine \geq 60 mg/day, transdermal fentanyl 25 mcg/hr, oral oxycodone \geq 30 mg/day, oral hydromorphone \geq 8 mg/day or an equianalgesic dose of another opioid for \geq 1 week)

AND

- The member is on a long-acting opioid formulation

AND

- Patient is 18 years of age or older OR patient is 16 years of age or older (Actiq[®] and generic only)

AND

- The prescriber is registered in the Transmucosal Immediate Release Fentanyl (TIRF) Risk Evaluation and Mitigation Strategy (REMS) Access program (<https://www.tirfremssaccess.com/TirfUI/remss/home.action>)

AND

- The member has had a documented treatment failure with or intolerance to 2 of the following 3 immediate-release breakthrough pain treatment options: morphine, hydromorphone or oxycodone.

OR

- The member is unable to use tablet or liquid formulations.

AND

- If the request is for brand name Actiq[®], the member has a documented intolerance to generic fentanyl transmucosal.

Dilaudid[®]-5 Oral Solution, Hydromorphone Oral Solution

- The member has had a documented side effect, allergy or treatment failure with oxycodone oral solution and morphine oral solution.

OR

- The member has been started and stabilized on another dosage form of hydromorphone.

AND

- The member has a medical necessity for a liquid dosage form.

AND

- If the request is for the branded product, the patient has a documented intolerance to the generic product.

Nucynta[®], Opana[®], Oxymorphone

- The member has had a documented side effect, allergy, or treatment failure to at least two of the following 3 immediate release generic short acting narcotic analgesics – morphine, hydromorphone or oxycodone.

AND

- If the request is for brand name Opana[®], the member has a documented intolerance to generic oxymorphone.

Oxycodone (generic) Capsules

- The member has a documented intolerance to generic oxycodone tablets.

Oxecta:

- The prescriber provides a clinically valid rationale why the generic immediate-release oxycodone cannot be used.
- AND
- The member has had a documented side effect, allergy, or treatment failure to at least TWO other preferred short acting narcotic analgesics.
 - **Note:** A history of substance abuse does not warrant approval of Oxecta® (oxycodone IR) since a clear advantage of this product over preferred short-acting opioids in this population has not been established.

Ultram®, Ultracet®

- The member has a documented intolerance to the generic formulation.

Rybix ODT®

- The member has a medical necessity for a disintegrating tablet formulation (i.e. swallowing disorder)

Other Short-acting Narcotics

- The member has had a documented side effect, allergy, or treatment failure to at least two medications not requiring prior approval. (If a product has an AB rated generic, one trial must be the generic.)

LIMITATIONS:

Acetaminophen containing products: Daily doses that result in > 4 grams of acetaminophen/day will reject for Prior Authorization.

Meperidine 75 mg/ml injection no longer available – 25 mg/ml, 50 mg/ml and 100 mg/ml available. Brand name Demerol 75 mg/ml and 100 mg/2 ml not covered – no generic equivalents.

Lazanda® (fentanyl) nasal spray not covered – product does not offer Federal rebate.

A history of substance abuse does not warrant approval of Oxecta® (oxycodone IR) since a clear advantage of this product over preferred short-acting opioids in this population has not been established.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on the **General Prior Authorization Request Form.**

Analgesics: Narcotics: Long Acting

LENGTH OF AUTHORIZATION: initial approval 3 months, subsequent approval up to 6 months

PHARMACOLOGY/INDICATION:

Long acting narcotics are potent medications. They are indicated for the management of moderate to severe pain in adults when a continuous, around-the-clock analgesic is needed for an extended period of time.

CLINICAL CONSIDERATIONS:

- Long acting narcotic dosage forms are intended for use in opioid tolerant patients only. These tablet/capsule/topical medication strengths may cause fatal respiratory depression when administered to patients not previously exposed to opioids.
- Long acting narcotics should be prescribed for patients with a diagnosis or condition that requires a continuous, around-the-clock analgesic.
- Long acting narcotics are NOT intended for use as a 'prn' analgesic.
- Long acting narcotics are NOT indicated for pain in the immediate post-operative period (the first 12-24 hours following surgery) or if the pain is mild, or not expected to persist for an extended period of time.
- Long acting narcotics are not intended to be used in a dosage frequency other than FDA approved regimens.
- Patients should not be using other extended release narcotics prescribed by another physician.
- Prescribers should consult the VPMS (Vermont Prescription Monitoring System) to review a patient's Schedule II – IV medication use before prescribing long acting narcotics

CRITERIA FOR APPROVAL:

Transdermal:

Brand Duragesic Fentanyl Patches

- The patient has a diagnosis or condition that requires a continuous, around-the-clock analgesic.

AND

- The patient has had a documented intolerance to generic fentanyl patches.

Butrans Transdermal System

- The patient has a diagnosis of moderate to severe pain, requiring a continuous, around-the-clock analgesic for an extended period of time.

AND

- The patient has had a documented side effect, allergy, or treatment failure to morphine sulfate SR 12 hr **AND** generic fentanyl patch.

OR

- The prescriber provides compelling clinical information for case specific discussion with DVHA Medical Director who will determine PA decision.

Oral:

Conzip[®], Ryzolt[®], Tramadol ER biphasic-release Capsule, Tramadol ER biphasic-release Tablet, Tramadol ER/SR, Ultram ER[®]

- The member has had a documented treatment failure to a preferred short-acting tramadol product. In addition, for approval of tramadol ER biphasic-release capsule or tablet or Ultram ER[®], the patient must have a documented

intolerance to generic tramadol ER/SR. For approval of Ryzolt® the patient must have a documented intolerance to generic tramadol ER/SR and generic tramadol ER biphasic –release tablet.

Oral Non-Preferred (non tramadol containing products):

- The patient has a diagnosis or condition that requires a continuous, around-the-clock analgesic.

AND

- The patient has had a documented side effect, allergy, or treatment failure to morphine sulfate SR 12 hr **AND** generic fentanyl patch. (If a product has an AB rated generic, there must have been a trial of the generic) **Note:** A history of substance abuse does not warrant approval of Embeda® or Opana ER® (crush resistant) since a clear advantage of this product over preferred long-acting opioids in this population has not been established.

LIMITATIONS:

- (1) Methadone 40 mg dispersible tablet not approved for retail dispensing.
- (2) Embeda, Opana ER (crush resistant): A history of substance abuse does not warrant approval of Embeda® or Opana ER® (crush resistant) since a clear advantage of this product over preferred long-acting opioids in this population has not been established.

DOCUMENTATION:

- ✓ Please complete and submit the **Long Acting Narcotics Prior Authorization Request Form.**

~ LONG ACTING NARCOTICS ~
 Prior Authorization Request Form

Vermont Medicaid has established coverage limits and criteria for prior authorization of long acting narcotics. These limits and criteria are based on concerns about safety and the potential for abuse and diversion. In order for beneficiaries to receive coverage for this drug, it will be necessary for the prescriber to telephone or complete and fax this form to Catamaran. Please complete this form in its entirety and sign and date below. Incomplete requests will be returned for additional information.

Submit request via: Fax: 1-866-767-2649 or Phone: 1-800-918-7549

Prescribing physician:

Prescriber comments:

Prescriber Signature: _____ **Date of this request:** _____

Anemia Medications: Hematopoietic/Erythropoietic Agents

LENGTH OF AUTHORIZATION: 3 months initially, 6 months subsequent requests

CRITERIA FOR APPROVAL:

Aranesp[®], Procrit[®]

- The diagnosis or indication for the requested medication is anemia due to one of the following:
 - Chronic kidney disease/renal failure
 - Post-renal transplant
 - Use of zidovudine for the treatment of human immunodeficiency virus (HIV) (other causes of anemia, such as iron/folate/vitamin B12 deficiency have been eliminated)
 - Surgery patients at high risk for perioperative blood loss
 - Cancer chemotherapy
 - Use of ribavirin or interferon therapy for Hepatitis C
 - Myelodysplastic syndrome

 - Hemoglobin level at initiation of therapy is <10 g/dL
- OR**
- For patients currently maintained on therapy, hemoglobin level is ≤11 g/dL in dialysis patients with chronic kidney disease, ≤10 g/dL in non-dialysis patients with chronic kidney disease, or ≤12 g/dL in patients treated for other indications.

Epogen[®]

- The diagnosis or indication for the requested medication is anemia due to one of the following:
 - Chronic kidney disease/renal failure
 - Post-renal transplant
 - Use of zidovudine for the treatment of human immunodeficiency virus (HIV) (other causes of anemia, such as iron/folate/vitamin B12 deficiency have been eliminated)
 - Surgery patients at high risk for perioperative blood loss
 - Cancer chemotherapy
 - Use of ribavirin or interferon therapy for Hepatitis C
 - Myelodysplastic syndrome

 - Hemoglobin level at initiation of therapy is <10 g/dL
- OR**
- For patients currently maintained on therapy, hemoglobin level is ≤11 g/dL in dialysis patients with chronic kidney disease, ≤10 g/dL in non-dialysis patients with chronic kidney disease, or ≤12 g/dL in patients treated for other indications.
- AND**
- The patient has had a documented side-effect, allergy, or treatment failure to both Aranesp[®] and Procrit[®]

LIMITATIONS:

Omontys[®] (peginesatide) is available only to dialysis units at this time and so will not be available through the pharmacy benefit. As of 2/23/2013 Omontys[®] is not being marketed due to new post marketing reports of serious hypersensitivity reactions.

DOCUMENTATION:

Ankylosing Spondylitis Medications: Injectables

NOTE: Ankylosing Spondylitis Self-Injectables (Enbrel[®], Humira[®] and Simponi[®]) must be obtained and billed through our specialty pharmacy vendor, Briova. Please see the Enbrel, Humira or Simponi Prior Authorization/Patient Enrollment Form for instructions. Briova may supply Remicade[®] upon request or you may continue to obtain through your usual supplier.

LENGTH OF AUTHORIZATION: Initial PA of 3 months, and 12 months thereafter if medication is well tolerated. Re-evaluate every 12 months.

CRITERIA FOR APPROVAL:

Humira[®]

Patient has a diagnosis of ankylosing spondylitis (AS) and has already been stabilized on Humira[®]

OR

Patient has a confirmed diagnosis of AS, and conventional NSAID treatment and DMARD* therapy (e.g. methotrexate therapy) resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD should be tried.

Notes: Approval should be granted in cases where patients have been treated with infliximab, but have lost response to therapy.

Enbrel[®]

Patient has a diagnosis of ankylosing spondylitis (AS) and has already been stabilized on Enbrel[®]

OR

Diagnosis is AS, and conventional NSAID treatment and DMARD* therapy (e.g. methotrexate therapy) resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD should be tried.

Remicade[®]

Patient has a diagnosis of ankylosing spondylitis (AS) and has already been stabilized on Remicade[®]

OR

Diagnosis is AS, and conventional NSAID treatment and DMARD* therapy (e.g. methotrexate therapy) resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD should be tried.

AND

The prescriber must provide a clinically valid reason why either Humira[®] or Enbrel[®] cannot be used.

Simponi[®]

Patient has a diagnosis of ankylosing spondylitis (AS) and has already been stabilized on Simponi[®]

OR

Patient age ≥ 18 years

AND

Diagnosis is AS, and patient has documentation of an inadequate response, adverse reaction or allergic response to methotrexate, or if methotrexate is contraindicated, at least 1 DMARD (other DMARDs include leflunomide, sulfasalazine, gold, antimalarials, minocycline, D-penicillamine, azathioprine, cyclophosphamide and cyclosporine)

AND

The prescriber must provide a clinically valid reason why either Humira[®] or Enbrel[®] cannot be used.

* Patients with a documented diagnosis of active axial involvement should have a trial with two NSAIDs, but a trial with DMARD is not required. If no active axial skeletal involvement, then an NSAID trial and a DMARD trial are required (unless otherwise contraindicated) prior to receiving Humira[®], Enbrel[®], Remicade[®] or Simponi[®]

DOCUMENTATION:

- ✓ Document clinical information for **Enbrel®** or **Humira®** on its **Prior Authorization/Patient Enrollment Form** and clinically compelling information supporting the choice of **Simponi®** on its **Prior Authorization/Patient Enrollment Form** or **Remicade®** on a **Remicade Prior Authorization Request Form**.
- ✓ All requests for infliximab (Remicade®) (whether billed through the pharmacy or medical benefit (J1745)) require Prior Authorization through the Catamaran Clinical Call Center.

Ankylosing Spondylitis: Injectables	
<i>Length of authorization: Initial PA of 3 months; 12 months thereafter</i>	
PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET	NON-PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET
ENBREL® (etanercept) (<i>Quantity limit = 4 syringes/28 days(50 mg), 8 syringes/28 days (25 mg)</i>) HUMIRA® (adalimumab) (<i>Quantity limit = 2 syringes/28 days</i>)	Remicade® (infliximab) Simponi® (golimumab) (<i>Quantity Limit = 1 syringe/28 days</i>)

Anti-Anxiety: Anxiolytics

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL

Non-preferred Benzodiazepines (except for alprazolam ODT, Klonopin Wafers[®], Niravam[®] and Intensol Products):

- The patient has a documented side effect, allergy, or treatment failure to at least two preferred benzodiazepine medications. (If a product has an AB rated generic, one trial must be the generic formulation.)

alprazolam ODT and Niravam[®]:

- The patient has a documented side effect, allergy, or treatment failure to at least two preferred benzodiazepine medications. (If a product has an AB rated generic, one trial must be the generic formulation.)

OR

- Patient has a medical necessity for disintegrating tablet administration (i.e. inability to swallow tablets)

AND

- The patient has a documented side effect, allergy, or treatment failure to clonazepam ODT.

Alprazolam Intensol, Diazepam Intensol, Lorazepam Intensol

- Patient has a medical necessity for the specialty dosage form (i.e. swallowing disorder)

AND

- The medication cannot be administered by crushing oral tablets.

Hydroxyzine Pamoate 100 mg strength ONLY:

- The patient is unable to use generic 50 mg capsules.

Vistaril[®]:

- The patient has a documented intolerance to the generic formulation.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

MANAGEMENT OF MENTAL HEALTH DRUGS: See page 180 for a description of the management of mental health drugs.

Anticoagulants

LENGTH OF AUTHORIZATION:

Xarelto: 6 months (or duration of need if less)

All Others: 6 months

CRITERIA FOR APPROVAL:

Arixtra®

- The patient has a documented intolerance to generic fondaparinux.

Coumadin®

- The patient has been started and stabilized on the requested medication.
- **OR**
- The patient has had a documented side effect, allergy or treatment failure to generic warfarin.

Enoxaparin

- The patient has a documented intolerance to brand Lovenox®.

Innohep®

- The diagnosis is treatment of acute, symptomatic deep vein thrombosis (DVT) with or without pulmonary embolism, administered in conjunction with warfarin sodium.

AND

- The patient does not have a bleeding disorder or documented heparin-induced thrombocytopenia (HIT).
- **AND**
- The prescriber must provide a clinically valid reason why one of Lovenox®, Fragmin® or Arixtra® cannot be used.
- **OR**
- The patient has been started and stabilized on the requested medication in conjunction with warfarin.

Pradaxa®

- The diagnosis or indication is atrial fibrillation.
- **AND**
- The patient does NOT have a mechanical heart valve.

Xarelto® 15 mg and 20 mg

- The diagnosis or indication is atrial fibrillation.
- **AND**
- The patient has been started and stabilized on the requested medication.
- **OR**
- The patient has had a documented side effect, allergy, or contraindication (i.e. drug interactions) to warfarin therapy.
- **OR**
- The patient has not been able to be adherent to coagulation monitoring or has not been able to achieve optimal INR control [INR 2-3] with warfarin therapy, despite dose titration attempts.
- **OR**
- The prescriber has provided another clinically valid reason why generic warfarin cannot be used.

Note: Xarelto 10 mg for the diagnosis of the need for thromboprophylaxis following knee and hip replacement surgery is available without PA in the limited durations required for these indications.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Request Form Prior Authorization**

Anticonvulsants

LENGTH OF AUTHORIZATION: lifetime for seizure disorders*[†]; 1 year for other indications

CRITERIA FOR APPROVAL:

Depakene[®], Depakote[®], Depakote ER[®], Keppra[®] tablets or oral solution, Klonopin[®], Klonopin Wafers[®], Lamictal[®] tablets or chewable tablets, Mysoline[®], Neurontin[®] capsules/tablets/oral solution, Tegretol[®], Tegretol[®] XR (200 & 400 mg), Topamax[®] tablets, Topamax[®] Sprinkles, Trileptal[®] tablets, Zarontin[®], Zonegran[®]

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented intolerance to the generic equivalent of the requested medication.

Banzel[®]

- The diagnosis or indication is treatment of Lennox-Gastaut Syndrome.

AND

- The patient has had a documented side effect, allergy, treatment failure/inadequate response or a contraindication to at least TWO preferred anticonvulsants used for the treatment of Lennox-Gastaut syndrome (topiramate, lamotrigine, valproic acid)

AND

- For approval of the oral suspension, the patient must be unable to use Banzel tablets (i.e. swallowing disorder)

Felbamate, Felbatol[®]

- A patient information/consent describing aplastic anemia and liver injury has been completed.

AND

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.) Additionally, if brand is requested, the patient has a documented intolerance to the generic product.

OR

- The diagnosis is adjunctive therapy of partial-onset seizures or Lennox-Gastaut seizures and the patient has had a documented side effect, allergy, treatment failure/inadequate response or a contraindication to at least THREE preferred anticonvulsants. Additionally, if brand is requested, the patient has a documented intolerance to the generic product.

Diazepam rectal gel

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented intolerance to Diastat rectal gel.

Divalproex sodium capsules (sprinkles), tiagabine, Oxcarbazepine oral suspension (generics)

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented intolerance to the brand name product.

Keppra XR[®], Lamictal XR[®], lamotrigine ER, levetiracetam ER

- The patient has been unable to be compliant with or tolerate twice daily dosing of the immediate release product. Additionally, if brand Keppra XR or Lamictal XR is requested, the patient has a documented intolerance to the generic product.

Lamictal ODT[®]

- Medical necessity for a specialty dosage form has been provided.

AND

- Lamotrigine chewable tablets cannot be used.

Lyrica[®]

- The patient has a diagnosis of epilepsy.

OR

- The patient has had a documented side effect, allergy, or treatment failure to TWO drugs in the tricyclic antidepressant (TCA) class and/or anticonvulsant class, if medication is being used for neuropathic pain.

OR

- The patient has had a documented side effect, allergy, or treatment failure to TWO drugs from the following: gabapentin, tricyclic antidepressant, SSRI antidepressant, SNRI antidepressant, miscellaneous antidepressant, cyclobenzaprine or Savella[®], if medication is being used for fibromyalgia. (this indication not processed via automated step therapy)

Onfi[®]

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.)

OR

- The diagnosis or indication is adjunctive treatment of Lennox-Gastaut Syndrome.

AND

- The patient has had a documented side effect, allergy, treatment failure/inadequate response or a contraindication to at least TWO preferred anticonvulsants used for the treatment of Lennox-Gastaut syndrome (topiramate, lamotrigine, valproic acid)

OR

- The diagnosis or indication is adjunctive treatment of refractory epilepsy (may include different types of epilepsy)

AND

- The patient has had a documented side effect, allergy, treatment failure/inadequate response or a contraindication to at least THREE preferred anticonvulsants

Potiga[®]

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.)

OR

- The diagnosis is adjunctive therapy of partial-onset seizures and the patient has had a documented side effect, allergy, treatment failure/inadequate response or a contraindication to at least TWO preferred anticonvulsants

Sabril®

- The prescriber and patient are registered with the SHARE program.

AND

- The diagnosis is infantile spasms

OR

- The patient is \geq 16 years old and the indication is adjunctive therapy in refractory complex partial seizures after failure of THREE other preferred anticonvulsants.

Stavzor®

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented intolerance to divalproex sodium.

Vimpat®

- The patient has been started and stabilized on the requested medication. (Note: Samples are not considered adequate justification for stabilization.)

OR

- The diagnosis is adjunctive therapy of partial-onset seizures and the patient has had a documented side effect, allergy, treatment failure/inadequate response or a contraindication to at least TWO preferred anticonvulsants

AND

- If the request is for the oral solution, the patient is unable to use Vimpat tablets (eg. swallowing disorder).

DOCUMENTATION:

Anti-Depressants: SSRIs

LENGTH OF AUTHORIZATION: Duration of need for mental health indications*; 1 year for other indications

CRITERIA FOR APPROVAL

Celexa, Paxil tablet, Prozac, Zoloft:

- The patient had a documented side effect, allergy, or treatment failure with 2 preferred SSRIs. (One trial must be the generic formulation of the requested medication.)

Luvox CR, fluvoxamine CR:

- The patient had a documented side effect, allergy, or treatment failure with 2 preferred SSRIs. (One trial must be generic fluvoxamine IR.) If the request is for the brand product, the patient also has a documented intolerance to the generic equivalent.

Pexeva, Paroxetine CR, Paxil CR:

- The patient had a documented side effect, allergy, or treatment failure with 2 preferred SSRIs. (One trial must be generic paroxetine.)
AND
- If the request is for Paxil CR, the patient has a documented intolerance to paroxetine CR.

Paroxetine suspension, Paxil suspension:

- The patient has a requirement for an oral liquid dosage form.
AND
- The patient had a documented side effect, allergy, or treatment failure with 2 preferred SSRIs.

Sarafem, Selfemra, Fluoxetine 60 mg Tablet, Fluoxetine (pmdd):

- The patient had a documented side effect, allergy, or treatment failure with 2 preferred SSRIs. (One trial must be generic fluoxetine (regular, not pmdd).) In addition, for approval of Sarafem, either Selfemra or fluoxetine pmdd must have been tried.

Lexapro, escitalopram:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The patient had a documented side effect, allergy, or treatment failure with 2 preferred SSRIs. (One trial must be generic citalopram).
AND
- If the request is for escitalopram, the patient has a documented intolerance with brand Lexapro.

Fluoxetine 90 mg, Prozac Weekly:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The patient failed and is not a candidate for daily fluoxetine.
AND
- The prescriber provides clinically compelling rationale for once-weekly dosing.
AND
- If the request is for Prozac Weekly, the patient has a documented intolerance of fluoxetine 90 mg capsules.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

After a 4-month lapse in use of a non-preferred agent for a mental health indication, or if there is a change in therapy, a look-back through claims information will identify the need to re-initiate therapy following the PDL and clinical criteria.

MANAGEMENT OF MENTAL HEALTH DRUGS: See page 180 for a description of the management of mental health drugs.

Anti-Depressants: SSRI <i>Length of Authorization: Duration of need for mental health indications*; 1 year for other indications</i>	
Key: † Generic product, *Indicates generic equivalent is available without a PA	
PREFERRED DRUGS (No PA Required)	PA REQUIRED

* For brand name products when generic equivalent preferred, length of authorization is 1 year.

Anti-Depressants: Tricyclics & MAOIs

LENGTH OF AUTHORIZATION: Duration of need for mental health indications*; 1 year for other indications

CRITERIA FOR APPROVAL:

Tricyclics (TCAs) (Brands with generic equivalents):

- The patient has had a documented side effect, allergy, or treatment failure to 2 or more TCAs not requiring prior-authorization. One trial must be the AB rated generic formulation.
- OR**
- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- AND**
- The patient has had a documented intolerance to the generic formulation

MAOIs:

Marplan[®]

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR**
- The patient has had a documented side effect, allergy, or treatment failure to phenelzine and tranylcypromine.

Nardil[®], Parnate[®]

- The patient has had a documented intolerance to generic equivalent product..

EMSAM[®]

- The patient has had a documented side effect, allergy, or treatment failure with at least 3 antidepressants from 2 of the major antidepressant classes (Miscellaneous, SNRIs, SSRIs, Tricyclic Antidepressants).
- OR**
- The patient is unable to tolerate oral medications.

LIMITATIONS:

Chlordiazepoxide/amitriptyline and amitriptyline/perphenazine combinations not covered. Generic agents may be prescribed separately.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

After a 4-month lapse in use of a non-preferred agent for a mental health indication, or if there is a change in therapy, a look-back through claims information will identify the need to re-initiate therapy following the PDL and clinical criteria.

Anti-Diabetics: Insulin

LENGTH OF AUTHORIZATION: lifetime

CRITERIA FOR APPROVAL:

Apidra®

- The patient has had a documented side effect, allergy, or treatment failure to Novolog® or Humalog®

ReliOn R®, ReliOn N® or ReliOn 70/30®

- The patient has had a documented side effect, allergy, or treatment failure to the corresponding Novolin® or Humulin® product

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Insulins		<i>Length of Authorization: lifetime</i>
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
<u>RAPID-ACTING INJECTABLE</u> NOVOLOG® (Aspart) HUMALOG® (insulin lispro)	Apidra® (insulin glulisine)

<u>INTERMEDIATE-ACTING INJECTABLE</u> HUMULIN N® (NPH) NOVOLIN N® (NPH)	ReliOn N® (NPH)	
<u>LONG-ACTING ANALOGS INJECTABLE</u> LANTUS® (insulin glargine) LEVEMIR® (insulin detemir)		
<u>MIXED INSULINS INJECTABLE</u> HUMULIN 70/30® (NPH/Regular) NOVOLIN 70/30® (NPH/Regular) NOVOLOG MIX 70/30® (Protamine/Aspart) HUMALOG MIX 75/25® (Protamine/Lispro) HUMALOG MIX 50/50® (Protamine/Lispro)	ReliOn 70/30® (NPH/Regular)	

Anti-Diabetics: Oral

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

ALPHA GLUCOSIDASE INHIBITORS

- For approval of Precose[®], the patient must have a documented intolerance to generic acarbose.

BIGUANIDES AND COMBINATIONS

Fortamet, Glucophage XR, Glumetza, Metformin ER Osmotic

- The patient has had a documented intolerance to generic metformin XR. (If a product has an AB rated generic, there must have also been a trial of the generic.)

Glucophage, Glucovance, Metaglip

- The patient has had a documented side effect, allergy or treatment failure with at least one preferred biguanide or biguanide combination product. (If a product has an AB rated generic, the trial must be the generic.)

MEGLITINIDES

Nateglinide

- The patient has had a documented intolerance to brand Starlix.

Prandin

- The patient has been started and stabilized on the requested medication.
OR
- The patient has had a documented side effect, allergy or treatment failure with Starlix.

Prandimet

- The patient has been started and stabilized on Prandimet or on stable doses of the separate agents
OR
- The patient has had an inadequate response with repaglinide monotherapy

SECOND GENERATION SULFONYLUREAS

- The patient has had a documented side effect, allergy or treatment failure with glimepiride, and glipizide/glipizide ER, and glyburide/glyburide micronized.

THIAZOLIDINEDIONES AND COMBINATIONS

Actos (pioglitazone), Actoplus Met, Duetact, Pioglitazine, Pioglitazone/glimepiride and Pioglitazone/Metformin

- The patient has been started and stabilized on the requested medication.
OR
- The patient has had a documented side effect, allergy, contraindication or treatment failure with metformin.
AND
- If the request is for generic pioglitazone, the patient has a documented intolerance to brand Actos. If the request is for brand Actos Met or Duetact, the patient has a documented intolerance to the generic product.

Actoplus Met XR

- The patient has been started and stabilized on the requested medication.
OR
- The patient has had a documented treatment failure with generic metformin XR.
OR
- The patient has had a documented treatment failure or has been unable to be adherent to a twice daily dosing schedule of Actoplus Met[®] resulting in a significant clinical impact.

Avandia (rosiglitazone) and combinations

- The patient has been started and stabilized on the requested medication and appears to be benefiting from it and the patient acknowledges that they understand the risks,
OR
- The patient is unable to achieve glycemic control using other medications (including a documented side effect, allergy, contraindication or treatment failure with metformin) and, in consultation with their health care professional, decide not to take pioglitazone for medical reasons and the patient acknowledges that they understand the risks.
- Note: Rosiglitazone single and combination products may only be obtained through specially certified pharmacies participating in the Avandia-Rosiglitazone Medicines Access (REMS) Program.

DIPEPTIDYL PEPTIDASE (DPP-4) INHIBITORS

Januvia, Onglyza, Tradjenta

- The patient has had a documented side effect, allergy, contraindication or treatment failure with metformin.

Janumet

- The patient has had an inadequate response with Januvia or metformin monotherapy.
OR
- The patient has been started and stabilized on Januvia and metformin combination therapy.

Janumet XR

- The patient has had an inadequate response with Januvia or metformin/metformin XR monotherapy.
OR
- The patient has been started and stabilized on Januvia and metformin/ metformin XR combination therapy.
AND
- The patient is unable to take Januvia and metformin/metformin XR as the individual separate agents.

Jentadueto

- The patient has had an inadequate response with Tradjenta or metformin monotherapy.
OR
- The patient has been started and stabilized on Tradjenta and metformin combination therapy.
AND
- The patient is unable to take Tradjenta and metformin as the individual separate agents.

Juvisync:

- The patient has had a documented side effect, allergy, contraindication or treatment failure with metformin.
AND
- The patient has been started and stabilized on Januvia and simvastatin combination therapy as individual agents.

Kombiglyze XR

- The patient has had an inadequate response with Onglyza or metformin/metformin XR monotherapy.
OR
- The patient has been started and stabilized on Onglyza and metformin/metformin XR combination therapy.

WELCHOL®

- See Lipotropics: Bile Acid Sequestrants

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Anti-Diabetics: Oral

Anti-Diabetics: Peptide Hormones

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Bydureon:

- The patient has a diagnosis of type 2 diabetes.
AND
- The patient is at least 18 years of age.
AND
- The patient has had a documented side effect, allergy, contraindication or treatment failure with metformin.
AND
- The patient has had a documented side effect or treatment failure to Byetta
OR
- The patient has been unable to be adherent to or tolerate twice daily dosing of Byetta

Byetta:

- The patient has a diagnosis of type 2 diabetes.
AND
- The patient is at least 18 years of age.
AND
- The patient has had a documented side effect, allergy, contraindication or treatment failure with metformin.

Symlin:

- The patient has a diagnosis of diabetes mellitus.
AND
- The patient is at least 18 years of age.
AND
- The patient is on insulin.

Victoza:

- The patient has a diagnosis of type 2 diabetes.
AND
- The patient is at least 18 years of age.
AND
- The patient has had a documented side effect, allergy, contraindication or treatment failure with metformin.

DOCUMENTATION:

✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Anti-Diabetics: Peptide Hormones		<i>Length of Authorization: 1 year</i>

Anti-Emetics: 5-HT₃ Receptor Antagonists

LENGTH OF AUTHORIZATION: 6 months for Chemotherapy/Radiotherapy, 3 months for hyperemesis gravidarum and 1 time Post-Op

CRITERIA FOR APPROVAL (non-preferred agents):

Anzemet[®]

- The patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy.
AND
- The patient has had a documented side effect, allergy, or treatment failure to generic ondansetron.

Granisetron, Granisol[®]

- The patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy or radiotherapy.
AND
- The patient has had a documented side effect, allergy, or treatment failure to generic ondansetron.

Zofran[®]

- The patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy, radiotherapy, post-operative nausea and vomiting (1 time only) or hyperemesis gravidarum.
AND
- The patient must have a documented intolerance to the corresponding generic ondansetron product (tablets, orally disintegrating tablets (ODT), oral solution or injection). If the request is for oral solution, the patient must be unable to use ondansetron ODT or ondansetron tablets.

Ondansetron oral solution

- The patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy, radiotherapy, post-operative nausea and vomiting (1 time only) or hyperemesis gravidarum.
AND
- The patient is unable to use ondansetron ODT or ondansetron tablets.

Ondansetron 24 mg

- The patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy.
AND
- The prescriber provides rationale why generic ondansetron 8 mg tablets cannot be used to achieve the desired dose.

Sancuso[®]

- The patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy.
AND
- The prescriber provides documentation of medical necessity for the transdermal formulation.
OR
- The patient has had a documented side effect, allergy or treatment failure with generic ondansetron.

Zuplenz[®]

- The patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy or radiotherapy.
AND
- The prescriber provides documentation of medical necessity for the specialty dosage form (i.e. inability to swallow tablets, dysphagia) AND a clinical rationale as to why ondansetron ODT is not a suitable option for the patient.

CRITERIA FOR APPROVAL (to exceed quantity limit):

Ondansetron/Zofran 4 mg and 8 mg tablets and ODT, Zuplenz

- For nausea and vomiting associated with chemotherapy or radiation therapy, 3 tablets for each day of chemotherapy/radiation and 3 tablets for each day for 2 days after completion of chemotherapy/radiation may be approved.

Ondansetron/Zofran 4 mg and 8 mg tablets and ODT

- For hyperemesis gravidarum, three tablets per day of 4 mg or 8 mg may be approved for 3 months.

Anzemet®

- For nausea and vomiting associated with chemotherapy, 1 tablet for each day of chemotherapy and 1 tablet for 2 days after completion of chemotherapy may be approved.

Granisetron

- For nausea and vomiting associated with chemotherapy, 2 tablets for each day of chemotherapy and 2 tablets for 2 days after completion of chemotherapy may be approved.
- For nausea and vomiting associated with radiation therapy, 2 tablets for each day of radiation may be approved.

Sancuso®

- For nausea and vomiting associated with chemotherapy, 1 patch for each chemotherapy cycle may be approved.

LIMITATIONS:

Aloxi and Anzemet injection are not considered outpatient medications for the pharmacy benefit and so are not covered in the pharmacy benefit.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent, to exceed quantity limits of a preferred agent, or for a diagnosis outside of FDA approval on a **General Prior Authorization Request Form**.

Anti-Emetics: 5-HT₃ Receptor Antagonists

Length of Authorization: 6 months for Chemotherapy/Radiotherapy, 3 months for hyperemesis gravidarum, 1 time Post-Op

Key: † Generic product, *Indicates generic equivalent is available without a PA

PREFERRED DRUGS (No PA Required)

Ondansetron Tablet and Orally Disintegrating Tablet† (compare to Zofran®) 4 mg, 8 mg *Quantity Limit = 12 tablets/28 days (4 mg), 6 tablets/28 days (8 mg)*

Ondansetron Injection† (compare to Zofran®)

PA REQUIRED

Anzemet® (dolasetron) *Quantity Limit = 4 tablets/28 days (50 mg), 2 tablets/28 days (100 mg)*

Granisetron† (formerly Kytril®) *Quantity Limit = 6 tablets/28 days*

Granisetron† (formerly Kytril®) Injectable

Granisol® (granisetron) Oral Solution

Ondansetron Solution† (compare to Zofran®)

Ondansetron† 24 mg tablet (previously Zofran®) *Quantity Limit = 1 tablet/28 days or per course of chemotherapy*

Sancuso® 3.1 mg/24 hrs Transdermal Patch (granisetron) *Quantity Limit = 1 patch/28 days*

Zofran®* (ondansetron) Tablet and Orally Disintegrating Tablet *Quantity Limit = 12 tablets/28 days (4 mg), 6 tablets/28 days (8 mg)*

Zofran®* (ondansetron) Injection

Zofran® (ondansetron) Solution

Zuplenz® (ondansetron) Oral Soluble Film *Quantity Limit = 12 films/28 days (4 mg), 6 films/28 days (8 mg)*

Anti-Emetics: NK1 Antagonists

LENGTH OF AUTHORIZATION: up to 1 year

CRITERIA FOR APPROVAL WHEN QUANTITY LIMIT IS EXCEEDED:

Emend® (aprepitant) 80 mg, 125 mg, Tri-Fold pack

- The medication will be prescribed by an oncology practitioner.
- AND**
- The patient requires prevention of nausea and vomiting associated with moderate to highly emetogenic cancer chemotherapy.
- AND**
- The requested quantity does not exceed one 125 mg and two 80 mg capsules OR one Tri-Fold Pack per course of chemotherapy. Patients with multiple courses of chemotherapy per 28 days will be approved quantities sufficient for the number of courses of chemotherapy.

Emend® (aprepitant) 40 mg

- The patient requires prevention of postoperative nausea and vomiting.
- AND**
- The requested quantity does not exceed one 40 mg capsule per surgery or course of anesthesia. Patients with multiple surgeries or courses of anesthesia in a 28 day period will be approved quantities sufficient for the number of surgeries or courses of anesthesia.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the need to exceed the established quantity limits on the **General Prior Authorization Request Form.**

Anti-Emetics: NK1 Antagonists		<i>Length of Authorization: up to 1 year</i>
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
EMEND® (aprepitant) 40 mg (Qty Limit = 1 cap/28 days) * EMEND® (aprepitant) 80 mg (Qty Limit = 2 caps/28 days) * EMEND® (aprepitant) 125 mg (Qty Limit = 1 cap/28 days) * EMEND® (aprepitant) Tri-fold Pack (Qty Limit = 1 pack/28 days) * <i>To be prescribed by oncology practitioners ONLY</i>		

Anti-Emetics: THC Derivatives

LENGTH OF AUTHORIZATION: 3 months initial, subsequent approval 6 months

PHARMACOLOGY:

Marinol[®] is a schedule III cannabinoid agent containing the same active ingredient, tetrahydrocannabinol, as marijuana. While its exact mechanism of action is unknown, it is speculated to inhibit medullary activity as well as suppress prostaglandin and endorphan synthesis. Cesamet[®] is a schedule II synthetic cannabinoid that acts by activating the endocannabinoid receptors, CB1 and CB2, which are involved in nausea/vomiting regulation. Both Marinol[®] and Cesamet[®] are FDA-approved for use in chemotherapy associated nausea and vomiting refractory to conventional antiemetics. In addition, Marinol[®] is indicated for patients with AIDS-related anorexia or wasting syndrome.

CRITERIA FOR APPROVAL:

Dronabinol, Marinol

- The patient has a diagnosis of chemotherapy-induced nausea/vomiting.
AND
- The patient has had a documented side effect, allergy, or treatment failure to **at least 2** antiemetic agents, of which, one must be a **preferred** 5HT3 receptor antagonist. If the request is for Marinol, the patient must additionally have a documented intolerance to generic dronabinol.
OR
- The patient has a diagnosis of AIDS associated anorexia.
AND
- The patient has had an inadequate response, adverse reaction, or contraindication to megestrol acetate. If the request is for Marinol, the patient must additionally have a documented intolerance to generic dronabinol.

Cesamet

- The patient has a diagnosis of chemotherapy-induced nausea/vomiting.
AND
- The patient has had a documented side effect, allergy, or treatment failure to **at least 2** antiemetic agents, of which, one must be a **preferred** 5HT3 receptor antagonist.

DOCUMENTATION:

✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Anti-Emetics: THC Derivatives	
<i>Length of Authorization: Initial approval 3 months, subsequent approval up to 6 months</i>	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
	Dronabinol [†] (compare to Marinol [®])
	Marinol [®] (dronabinol)
	Cesamet [®] (nabilone)

Anti-Hyperkinesia and Anti-Narcolepsy/Cataplexy

LENGTH OF AUTHORIZATION: Duration of need for mental health indications**†; 1 year for other indications

CRITERIA FOR APPROVAL:

STIMULANTS

Dexmethylphenidate and Focalin®

- The patient has a diagnosis of ADD, ADHD or narcolepsy.
AND
- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The patient is also on Focalin XR and the prescriber is adding a shorter acting dosage form.
OR
- The patient has had a documented side-effect, allergy, or treatment failure on Methylin® or methylphenidate.
AND
- In addition, for approval of brand name Focalin®, the patient must have had a documented intolerance to generic dexmethylphenidate.

Metadate CD®, Ritalin LA®, methylphenidate CR, Methylphenidate SR 24 HR

- The patient has a diagnosis of ADD, ADHD or narcolepsy.
AND
- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The patient has had a documented side-effect, allergy, or treatment failure on Focalin XR® or Methylphenidate SA OSM.
AND
- For approval of generic methylphenidate CR or methylphenidate SR 24 HR, the patient must have had a documented intolerance to the brand equivalent.

Concerta

- The patient has a diagnosis of ADD, ADHD or narcolepsy.
AND
- The patient has had a documented intolerance to generic Methylphenidate SA OSM.

Ritalin® and Ritalin SR®

- The patient has a diagnosis of ADD, ADHD or narcolepsy.
AND
- The patient has had a documented intolerance to the preferred equivalent. For Ritalin SR® these are Methylin® ER, Metadate ER® or methylphenidate SR. For Ritalin these are Methylin® or methylphenidate.

Adderall® and Dexedrine CR®

- The patient has a diagnosis of ADD, ADHD or narcolepsy.
AND
- The patient has had a documented intolerance to the preferred generic equivalent.

Methamphetamine and Desoxyn®

- Given the high abuse potential of methamphetamine and Desoxyn®, the patient must have a diagnosis of ADD, ADHD or narcolepsy and have failed all preferred treatment alternatives. In addition, for approval of brand name Desoxyn®, the patient must have had a documented intolerance to generic methamphetamine.

Amphetamine/dextroamphetamine SR 24 HR (generic)

- The patient has a diagnosis of ADD, ADHD or narcolepsy.

AND

- The patient must have a documented intolerance to the brand name Adderall XR®.

CNS stimulants for beneficiaries age < 3

- The prescriber must provide a clinically valid reason for the use of the requested medication in a patient < 3 years of age.

NON-STIMULANTS

Intuniv®

- The patient has a diagnosis of ADD or ADHD.

AND

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has a documented treatment failure, due to lack of efficacy, to *two* long-acting CNS stimulants (Metadate CD®, Ritalin LA®, Focalin XR®, Adderall XR®, Methylphen idate SA OSM, Vyvanse® and Daytrana®)

OR

- The patient has had a documented side effect, allergy, or direct contraindication (e.g. comorbid tics, moderate-to-severe anxiety) to *one* long-acting CNS stimulant (Metadate CD®, Ritalin LA®, Focalin XR®, Adderall XR®, Methylphenidate SA OSM, Vyvanse® and Daytrana®)

OR

- There is a question of substance abuse with the patient or family of the patient.

OR

- The family will choose to decline therapy if a stimulant must be trialed.

OR

- The patient has been trialed on immediate release guanfacine with good response but needs a dosage form with extended duration of therapy.

Kapvay®

- The patient has a diagnosis of ADD or ADHD.

AND

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has a documented treatment failure, due to lack of efficacy, to *two* long-acting CNS stimulants (Metadate CD®, Ritalin LA®, Focalin XR®, Adderall XR®, Methylphen idate SA OSM, Vyvanse® and Daytrana®)

OR

- The patient has had a documented side effect, allergy, or direct contraindication (e.g. comorbid tics, moderate-to-severe anxiety) to *one* long-acting CNS stimulant (Metadate CD®, Ritalin LA®, Focalin XR®, Adderall XR®, Methylphen idate SA OSM, Vyvanse® and Daytrana®)

OR

- There is a question of substance abuse with the patient or family of the patient.

AND

- The patient has been trialed on clonidine IR with at least a partial response but needs an extended duration formulation to maximize the clinical benefit.

Strattera®

- The patient has a diagnosis of ADD or ADHD.

AND

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has a documented treatment failure, due to lack of efficacy, to *two* long-acting CNS stimulants (Metadate CD[®], Ritalin LA[®], Focalin XR[®], Adderall XR[®], Methylphen idate SA OSM, Vyvanse[®] and Daytrana[®])

OR

- The patient has had a documented side effect, allergy, or direct contraindication (e.g. comorbid tics, moderate-to-severe anxiety) to *one* long-acting CNS stimulant (Metadate CD[®], Ritalin LA[®], Focalin XR[®], Adderall XR[®], Methylphen idate SA OSM, Vyvanse[®] and Daytrana[®])

OR

- There is a question of substance abuse with the patient or family of the patient.

OR

- The family will choose to decline therapy if a stimulant must be trialed.

OR

- The patient's need for drug therapy is primarily in early AM and evenings in the home environment.

Nuvigil[®]

Narcolepsy, excessive sleepiness associated with obstructive sleep apnea/hypopnea syndrome (adjunct to standard treatment):

- The patient is > 17 years old.

AND

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented side-effect, allergy or treatment failure to a CNS stimulant or has a contraindication for use of these agents (e.g. substance abuse history).

Nuvigil[®] **will not be approved** for sleepiness associated with shift work sleep disorder, idiopathic hypersomnolence, excessive daytime sleepiness, fatigue associated with use of narcotic analgesics, or **for ADHD** (for any age patient).

Provigil[®], Modafinil

Narcolepsy, Excessive sleepiness associated with obstructive sleep apnea/hypopnea syndrome (adjunct to standard treatment), fatigue associated with multiple sclerosis, fatigue associated with the treatment of depression or schizophrenia:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented side-effect, allergy or treatment failure to a CNS stimulant or has a contraindication for use of these agents (e.g. substance abuse history).

AND

- And if the request is for modafinil, the patient has a documented intolerance to brand Provigil.

ADHD age >12:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has a documented treatment failure, due to lack of efficacy, to *two* long-acting CNS stimulants or the patient has had a documented side effect, allergy, or direct contraindication (e.g. comorbid tics, moderate-to-severe anxiety, substance abuse) to *one* long-acting CNS stimulant.

AND

- The patient has had a documented side-effect, allergy, or treatment failure to Strattera[®].

AND

- And if the request is for modafinil, the patient has a documented intolerance to brand Provigil.

Provigil[®] /Modafinil **will not be approved** for sleepiness associated with shift work sleep disorder, idiopathic hypersomnolence, excessive daytime sleepiness, fatigue associated with use of narcotic analgesics, or **for ADHD in children age ≤12**.

Xyrem[®]

- The patient has a diagnosis of narcolepsy/cataplexy.

AND

- The patient has been started and stabilized on the medication

OR

- The patient has a documented side effect, allergy, treatment failure, or contraindication to a preferred CNS stimulant or tricyclic antidepressants (e.g., protriptyline, clomipramine).

LIMITATIONS:

Kapvay dose pak not covered – prescribe multiple strengths individually.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

After a 4-month lapse in use of a non-preferred agent for a mental health indication, or if there is a change in therapy, a look-back through claims information will identify the need to re-initiate therapy following the PDL and clinical criteria.

MANAGEMENT OF MENTAL HEALTH DRUGS: See page 180 for a description of the management of mental health drugs.

Anti-Hyperkinesia and Anti-Narcolepsy/Cataplexy

Length of Authorization: Duration of need for mental health indications; 1 year for other indications*

Key: † Generic product, *Indicates generic equivalent is available without a PA

* For brand name products when generic equivalent preferred, length of authorization is 1 year.

▲ For generic product when brand name product preferred, length of authorization is 1 year.

Anti-Hypertensives: ACE Inhibitors and ACEI Combinations

LENGTH OF AUTHORIZATION:

1 year

CRITERIA FOR APPROVAL:

ACE Inhibitors:

- The patient has had a documented side effect, allergy, or treatment failure to all available preferred generic ACEI. If a medication has an AB rated generic, there must have been a trial of the generic formulation.

ACE Inhibitor/Hydrochlorothiazide combinations:

- The patient has had a documented side effect, allergy, or treatment failure to all available preferred generic ACEI/Hydrochlorothiazide combination. If a medication has an AB rated generic, there must have been a trial of the generic formulation.

ACE Inhibitor/Calcium Channel Blocker combination:

- The patient has had a documented side effect, allergy, or treatment failure with a preferred ACEI/Calcium Channel Blocker combination. . If a medication has an AB rated generic, the trial must be the generic formulation.

LIMITATIONS:

Captopril/hydrochlorothiazide combination not covered. Agents may be prescribed separately.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Anti-Hypertensives: Angiotensin Receptor Blockers (ARBs) and ARB Combinations

LENGTH OF AUTHORIZATION: 3 years

CRITERIA FOR APPROVAL:

Avapro, Benicar, , Diovan, Losartan, Micardis, Avalide, Benicar HCT, Diovan HCT, Losartan HCT, Micardis HCT, Exforge, Exforge HCT

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented side effect, allergy, or treatment failure to an angiotensin converting enzyme inhibitor (ACEI), an ACEI combination or any other angiotensin receptor blocker (ARB) or ARB combination.

Atacand, candesartan, Edarbi, Eprosartan, Teveten

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented side effect, allergy, or treatment failure with a preferred Angiotensin Receptor Blocker (ARB) or ARB combination.

AND

- If brand name product with generic available, the patient has had a documented intolerance with the generic product.

Atacand HCT, candesartan/hydrochlorothiazide, Teveten HCT

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented side effect, allergy, or treatment failure with a preferred ARB/Hydrochlorothiazide combination.

AND

- If the request is for Atacand HCT, the patient has had a documented intolerance with the generic product.

Cozaar, Hyzaar (Brands)

- The patient has had a documented side effect, allergy, or treatment failure to an angiotensin converting enzyme inhibitor (ACEI), an ACEI combination or any other angiotensin receptor blocker (ARB) or ARB combination.

AND

- The patient has had a documented intolerance with the generic product.

Irbesartan, Irbesartan/hydrochlorothiazide, valsartan/hydrochlorothiazide (generics)

- The patient has had a documented side effect, allergy, or treatment failure to an angiotensin converting enzyme inhibitor (ACEI), an ACEI combination or any other angiotensin receptor blocker (ARB) or ARB combination.

AND

- The patient has had a documented intolerance with the brand product.

Edarbyclor:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented side effect, allergy, or treatment failure with a preferred Angiotensin Receptor Blocker (ARB) or ARB combination.

AND

- The patient is unable to take the individual components separately.

Azor[®], Tribenzor[®], Twynsta[®]

- The patient has had a documented side effect, allergy, or treatment failure to an angiotensin converting enzyme inhibitor (ACEI), an ACEI combination or any other angiotensin receptor blocker (ARB) or ARB combination.

AND

- The patient is unable to take the individual components separately.

Valturna

- The patient is NOT a diabetic

AND

- The patient has a diagnosis of hypertension.

AND

- The patient has had a documented side effect, allergy, or treatment failure to an angiotensin converting enzyme inhibitor (ACEI), an ACEI combination or any other angiotensin receptor blocker (ARB) or ARB combination.

OR

- The patient has had a documented treatment failure with Tekturna[®] alone.

DOCUMENTATION:

Anti-Hypertensives: Beta-Blockers

LENGTH OF AUTHORIZATION: 3 years

CRITERIA FOR APPROVAL

Non-preferred drugs (except Coreg CR[®]):

- The patient has had a documented side effect, allergy, or treatment failure to at least three preferred drugs. (If a medication has an AB rated generic, one trial must be the generic formulation.)

Coreg CR[®]:

Indication: Heart Failure

- The patient has been started and stabilized on Coreg CR[®]. (Note: Samples are not considered adequate justification for stabilization.)
- OR**
- The patient has had a documented side effect, allergy, or treatment failure to metoprolol SR or bisoprolol.
- AND**
- The patient has been unable to be compliant with or tolerate twice daily dosing of carvedilol IR.

Indication: Hypertension

- The patient has been started and stabilized on Coreg CR[®]. (Note: Samples are not considered adequate justification for stabilization.)
- OR**
- The patient has had a documented side effect, allergy, or treatment failure to 3(three) preferred anti-hypertensive beta-blockers.

DOCUMENTATION:

Anti-hypertensives: Central Alpha Agonists

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Catapres[®], Tenex[®]:

- The patient has a documented intolerance to the generic product.

Nexiclon XR[®] tablet:

- The patient has a diagnosis of hypertension.
AND
- The patient has had a documented side effect, allergy, or treatment failure to at least TWO agents (either separately or as a combination product) from the following antihypertensive classes: a thiazide diuretic, a beta blocker, an angiotensin converting enzyme inhibitor (ACEI), angiotensin receptor blocker (ARB), or a calcium channel blocker (CCB).
AND
- The patient has been unable to be adherent to or tolerate twice daily dosing of the generic clonidine immediate-release tablets.

Nexiclon XR[®] oral suspension:

- The patient has a diagnosis of hypertension.
AND
- The patient has had a documented side effect, allergy, or treatment failure to at least TWO agents (either separately or as a combination product) from the following antihypertensive classes: a thiazide diuretic, a beta blocker, an angiotensin converting enzyme inhibitor (ACEI), angiotensin receptor blocker (ARB), or a calcium channel blocker (CCB).
AND
- The patient has a medical necessity for a specialty dosage form (i.e. dysphagia, swallowing disorder).

Clonidine patches (generic):

- The patient has a medical necessity for a specialty topical dosage form (i.e. dysphasia, swallowing disorder, compliance, nausea/vomiting).

Catapres-TTS[®] patches:

- The patient has a medical necessity for a specialty topical dosage form (i.e. dysphasia, swallowing disorder, compliance, nausea/vomiting).
AND
- The patient has a documented intolerance to the generic product.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the use of this medication on a **General Prior Authorization Request Form**.

Anti-hypertensives: Central Alpha Agonists

Anti-hypertensives: Renin Inhibitors

LENGTH OF AUTHORIZATION: 3 years

CRITERIA FOR APPROVAL:

Tekturna®:

- The patient is NOT a diabetic who will continue on therapy with an ACEI or ARB
- AND**
- The patient has a diagnosis of hypertension.
- AND**
- The patient has had a documented side effect, allergy, or treatment failure with an Angiotensin Receptor Blocker (ARB). *Note:* Approval of an ARB requires a documented side effect, allergy, or treatment failure with an Angiotensin Converting Enzyme (ACE) inhibitor.

Amturnide®, Tekalmo®, Tekturna HCT®:

- The patient is NOT a diabetic who will continue on therapy with an ACEI or ARB
- AND**
- The patient has a diagnosis of hypertension.
- AND**
- The patient has had a documented side effect, allergy, or treatment failure with an Angiotensin Receptor Blocker (ARB). *Note:* Approval of an ARB requires a documented side effect, allergy, or treatment failure with an Angiotensin Converting Enzyme (ACE) inhibitor.
- OR**
- The patient has had a documented treatment failure with Tekturna® alone.

Valturna®:

- The patient is NOT a diabetic
- AND**
- The patient has a diagnosis of hypertension.
- AND**
- The patient has had a documented side effect, allergy, or treatment failure to an angiotensin converting enzyme inhibitor (ACEI), an ACEI combination or any other angiotensin receptor blocker (ARB) or ARB combination.
- OR**
- The patient has had a documented treatment failure with Tekturna® alone.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the use of this medication on a **General Prior Authorization Request Form**.

Anti-hypertensives: Renin Inhibitors		<i>Length of Authorization: 3 years</i>

Anti-Infectives: Antibiotics: Cephalosporins

LENGTH OF AUTHORIZATION: for the date of service, only: no refills

CRITERIA FOR APPROVAL:

Cephalexin Tablets:

- The patient has had a documented intolerance to cephalexin generic capsules.

Keflex[®]:

- The patient has had a documented side effect, allergy, or treatment failure to generic cefadroxil and cephalexin.

Cefaclor ER Tablets:

- The patient has had a documented intolerance to cefaclor capsules.

Ceftin[®] tablets:

- The patient has had a documented side effect, allergy, or treatment failure to at least two of the following medications: cefaclor, cefprozil, and cefuroxime. If a product has an AB rated generic, one trial must be the generic formulation.

Ceftin suspension:

- The patient has had a documented side effect, allergy, or treatment failure to the following medications: cefprozil suspension and cefuroxime suspension.

Spectracef[®] tablet, Cedax[®] Capsule, Cefditoren tablet:

- The patient is completing a course of therapy which was initiated in the hospital.
- The patient has had a documented side effect, allergy, or treatment failure to both cefpodoxime and cefdinir.
- If the request is for Spectracef[®], the patient has a documented intolerance with generic cefditoren tablets

OR

AND

Cedax[®] suspension, Suprax[®] Suspension:

- The patient is completing a course of therapy which was initiated in the hospital.
- The patient has had a documented side effect or treatment failure to both cefdinir and cefpodoxime suspension.

OR

LIMITATIONS:

Cephalexin and Keflex[®] 750 mg capsules not covered – prescribe lower strengths generic cephalexin capsules.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Anti-Infectives: Antibiotics: Cephalosporins

Length of Authorization: Date of service only. No refills.

Key: † Generic product, *Indicates generic equivalent is available without a PA

PREFERRED DRUGS (No PA Required)

Anti-Infectives: Antibiotics: Ketolides

LENGTH OF AUTHORIZATION: Date of service only, no refills

CRITERIA FOR APPROVAL:

- The member is continuing a course of therapy initiated while an inpatient at a hospital.

OR

- The diagnosis or indication for the requested medication is community-acquired pneumonia.

AND

- The member is at least 18 years of age at the time of the request.

AND

- The member has no contraindication or a history of hypersensitivity or serious adverse event, from any macrolide antibiotic.

AND

- Infection is due to documented *Streptococcus pneumoniae* (including multi-drug resistant [MDRSP*] *s.pneumoniae*), *Haemophilus influenzae*, *Moraxella catarrhalis*, *Chlamydomphila pneumoniae*, or *Mycoplasma pneumoniae*.

AND

- The member has had a documented therapeutic failure with all clinically appropriate alternatives.

AND

- The member does not have any of the following medical conditions: myasthenia gravis, hepatitis or underlying liver dysfunction, history of arrhythmias (e.g. QTc prolongation, or antiarrhythmic therapy), uncorrected hypokalemia or hypomagnasemia, clinically significant bradycardia, a history of therapy with Class IA (e.g. quinidine or procainamide) or Class III (e.g. dofetilide) antiarrhythmic medications.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the use of a non-preferred agent on the **General Prior Authorization Request Form**.

*MDRSP includes penicillin-resistant *S. pneumoniae* isolates (PRSP) that are resistant to ≥ 2 of the following antibiotics: penicillin, 2nd generation cephalosporins, macrolides, tetracyclines, and trimethoprim/sulfamethoxazole.

Anti-Infectives: Antibiotics: Ketolides		<i>Length of Authorization: Date of Service Only; no refills</i>
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
n/a	Ketek® (telithromycin)	

Anti-Infectives: Antibiotics: Macrolides

LENGTH OF AUTHORIZATION: for the date of service, only; no refills (azithromycin/Zithromax packets)

Up to 6 months: refills permissible with extended duration PA approvals (other medications).

NON-PREFERRED AGENTS(EXCEPT AS BELOW):

- The patient has a documented side-effect, allergy, or treatment failure to at least two of the preferred medications. (If a product has an AB rated generic, one trial must be the generic.)
- OR**
- The patient is completing a course of therapy with the requested medication that was initiated in the hospital.

BRAND NAME ERYTHROMCYIN PRODUCTS:

- The patient has had a documented side effect or treatment failure with one preferred erythromycin product.

AZITHROMYCIN/ZITHROMAX PACKETS:

- Is there a clinically valid reason why the dose cannot be obtained using generic azithromycin tablets?
- AND**
- If the request is for brand Zithromax, the patient has a documented intolerance to the generic product.

AZITHROMYCIN > 5 DAY SUPPLY:

- The patient has a diagnosis of Lyme Disease AND has had a documented side effect, allergy, or treatment failure to at least two of the following: doxycycline, amoxicillin, or a 2nd generation cephalosporin. For early Lyme disease, without neurologic or rheumatologic (arthritis) complications, the length of authorization is up to 10 days. For neurologic or rheumatologic Lyme disease, the length of authorization is up to 28 days
- OR**
- The patient has a diagnosis of Cystic Fibrosis. (length of authorization up to 6 months)
- OR**
- The patient has a diagnosis of HIV/immunocompromised status and azithromycin is being used for MAC or Toxoplasmosis treatment or prevention.(length of authorization up to 6 months)
- OR**
- The patient has a diagnosis of bacterial sinusitis AND has had a documented side effect, allergy, or treatment failure to penicillin, amoxicillin, or sulfamethoxazole/trimethoprim (Bactrim). (length of authorization up to 10 days)
- OR**
- The patient has a diagnosis of severe bronchiectasis with frequent exacerbations (length of authorization up to 6 months)

DIFICID:

- The patient's diagnosis or indication is Clostridium difficile associated diarrhea (CDAD)
- AND**
- The patient has had a side-effect, allergy, treatment failure or contraindication to metronidazole.
- OR**
- The prescriber provides a clinically compelling rationale why metronidazole is not appropriate for the patient. (E.g. patient has severe Clostridium difficile infection, history of recurrent infections).
- AND**
- The patient has had a side-effect, allergy, treatment failure or contraindication to oral vancomycin capsules (Vancocin®).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting provision of a non-preferred agent or more than the stated quantity limits on a **General Prior Authorization Request Form**.

Anti-Infectives: Antibiotics: Macrolides

Length of Authorization: Date of service, only; no refills for generic and brand azithromycin packets; up to 6 months (others) Refills permissible with extended duration PA approvals

Key: † **Generic product, *Indicates generic equivalent is available without a PA**

Anti-Infectives: Antibiotics: Oxazolidinones

LENGTH OF AUTHORIZATION: 28 days

CRITERIA FOR APPROVAL:

- The patient has been started on intravenous or oral linezolid in the hospital and will be finishing the course of therapy in an outpatient setting
- OR**
- The patient has a documented blood, tissue, sputum, or urine culture that is positive for Vancomycin-Resistant Enterococcus (VRE) species.
- OR**
- The patient has a documented blood or sputum culture that is positive for Methicillin-Resistant Staphylococcus species
- OR**
- The patient has a documented tissue or urine culture that is positive for Methicillin-Resistant Staphylococcus species
- AND**
- The patient has had a documented treatment failure with trimethoprim/sulfamethoxazole **OR** there is a clinically valid reason that the patient cannot be treated with trimethoprim/sulfamethoxazole.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent and quantities exceeding the established limit on a **General Prior Authorization Request Form**.

Anti-Infectives: Antibiotics: Oxazolidinones	
<i>Length of authorization: 28 days</i>	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
IV form of this medication not managed at this time	Zyvox® (linezolid) <i>QL = 56 tablets per 28 days</i> Zyvox® (linezolid) suspension <i>QL = 60 ml/day, maximum 28 days supply</i>

Anti-infectives: Antibiotics: Penicillins (Oral)

LENGTH OF AUTHORIZATION: For the date of service only; no refills

CRITERIA FOR APPROVAL:

Augmentin:

- The patient has had a documented intolerance to the generic formulation of the requested medication.
OR
- The patient is < 12 weeks of age and requires the 125 mg/5 mL strength of Augmentin.

Amoxicillin/Clavulanate ER, Augmentin XR, Moxatag:

- The prescriber must provide a clinically valid reason for the use of the requested medication. Additionally, for approval of brand Augmentin XR, the patient must have a documented intolerance to generic Amoxicillin/Clavulanate ER

LIMITATION

Brand Augmentin[®] Chewable tablets do not offer Federal Rebate and therefore cannot be provided.

DOCUMENTATION

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Anti-Infectives: Antibiotics: Rifamycins

LENGTH OF AUTHORIZATION: Per indication, up to 1 year

Hepatic Encephalopathy: 1 year
Traveller's Diarrhea: for the date of service only
SIBO: 30 days
Irritable Bowel Syndrome: 14 days
Inflammatory Bowel Disease: Crohn's Disease: 3 months
Inflammatory Bowel Disease: Ulcerative Colitis: 1 month
Clostridium difficile diarrhea: 14 days

Recertification for all of the above indications is contingent upon documentation of a clinical response.

CRITERIA FOR APPROVAL: Based on Indication

Hepatic Encephalopathy (Xifaxan 550 mg Tablets Only):

- The patient has a diagnosis of hepatic encephalopathy.
- AND
- Patient has had a documented side effect, allergy, treatment failure or contraindication to lactulose.
- AND
- Quantity limit is 2 tablets/day (550 mg tablets only).

Traveller's Diarrhea (Xifaxan 200 mg Tablets Only):

- The patient has a diagnosis of traveller's diarrhea caused by noninvasive strains of *Escherichia coli*.
- AND
- Patient has had a documented side effect, allergy, treatment failure or contraindication with a fluoroquinolone.
- AND
- Quantity limit is 9 tablets/RX (200 mg tablets only).

Small Intestinal Bacterial Overgrowth (Xifaxan 550 mg or 200 mg Tablets):

- The patient has a diagnosis of SIBO.
- AND
- Patient has attempted dietary modification and has had a documented side effect, allergy, treatment failure or contraindication to (alone or in combination) one of the following: Amoxicillin-clavulanate, cephalosporin, metronidazole, fluoroquinolone, tetracycline, trimethoprim-sulfamethoxazole.
- AND
- Quantity limit is 800 mg to 1,200 mg/day.

Irritable Bowel Syndrome (Xifaxan 550 mg or 200 mg Tablets):

- The patient has a diagnosis of irritable bowel syndrome without constipation or with symptoms of bloating.
- AND
- Patient has attempted dietary modification and has had a documented side effect, allergy, treatment failure or contraindication to two of the following classes (one of which must be an antibiotic):
 - Antibiotics (alone or in combination: amoxicillin-clavulanate, cephalosporin, metronidazole, fluoroquinolone, tetracycline, trimethoprim-sulfamethoxazole)
 - SSRIs
 - TCAs
 - Antispasmodics
 - Antidiarrheals
 - Cholestyramine resin
- AND
- Quantity limit is 1,200 mg to 1,650 mg/day.

Inflammatory Bowel Disease: Crohn’s Disease (Xifaxan 550 mg or 200 mg Tablets):

- The patient has a diagnosis of Crohn’s Disease. **AND**
- Patient has had a documented side effect, allergy, treatment failure or contraindication to two of the following: 6-mercaptopurine, aminosalicylates, azathioprine, corticosteroids, fluoroquinolone and/or metronidazole. **AND**
- Quantity limit is 600 mg to 1,600 mg/day.

Inflammatory Bowel Disease: Ulcerative Colitis (Xifaxan 200 mg Tablets):

- The patient has a diagnosis of Ulcerative Colitis. **AND**
- Patient has had a documented side effect, allergy, treatment failure or contraindication to two of the following: 6-mercaptopurine, aminosalicylates, azathioprine, corticosteroids, fluoroquinolone and/or metronidazole. **AND**
- Quantity limit is 800 mg/day (4 x 200 mg tablets/day).

Clostridium difficile Diarrhea (Xifaxan 200 mg Tablets):

- The patient has a diagnosis of *C. difficile* diarrhea. **AND**
- Patient has had a documented side effect, allergy, treatment failure or contraindication to metronidazole. **AND**
- Quantity limit is 800 mg/day (4 x 200 mg tablets/day).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting provision of a non-preferred agent and more than the stated quantity limits on a **General Prior Authorization Request Form**.

Anti-Infectives: Antibiotics: Rifamycins	
<i>Length of Authorization: Up to 1 year</i>	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
All products require PA.	Xifaxan [®] (rifaximin) 200 mg Tablets (Qty limit = as above per indication) Xifaxan [®] (rifaximin) 550 mg Tablets (Qty limit = as above per indication)

Anti-Infectives: Antibiotics: Vancomycin

LENGTH OF AUTHORIZATION: Date of service only, no refills

CRITERIA FOR APPROVAL:

- The patient’s diagnosis or indication is enterocolitis caused by *Staphylococcus aureus*.
OR
- The patient’s diagnosis or indication is antibiotic-associated pseudomembranous colitis caused by *Clostridium difficile*
AND
- The patient has had a therapeutic failure, adverse reaction or contraindication to metronidazole.
OR
- The prescriber provides a clinically compelling rationale why metronidazole is not appropriate for the patient. (e.g. patient has severe *Clostridium difficile* infection, history of recurrent infections).
AND
- For approval of brand Vancocin, the patient must meet the above criteria and have a documented intolerance to the generic.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the use of a non-preferred agent on the **General Prior Authorization Request Form**.

Anti-Infectives: Antibiotics: Vancomycin	
<i>Length of Authorization: Date of Service Only; no refills</i>

Anti-Infectives: Antifungals: Allylamines

LENGTH OF AUTHORIZATION: Up to 3 months

Onychomycosis (terbinafine):

Fingernails: 2 tablets (500mg) per day for 1 week/month for 2 months (pulse) or 1 tablet (250mg) per day for 6 weeks

Toenails: 2 tablets (500mg) per day for 1 week per month for 3 months (pulse) or 1 tablet (250mg) per day for 12 weeks

Tinea capitis: 6 weeks

Tinea pedis/Tinea cruris/Tinea corporis: up to 250 mg/day for up to 1 month (30 tabs/month)

Other indications: 3 months

CRITERIA FOR APPROVAL

Terbinafine Tablets:

- The patient has a diagnosis of a fingernail/toenail onychomycosis infection (confirmed with a positive KOH stain, PAS stain, or fungal culture or physician clinical judgment).
AND
- The patient meets at least 1 of the following criteria:
 - Pain to affected area that limits normal activity
 - Diabetes Mellitus
 - Patient is immunocompromised
 - Patient has diagnosis of systemic dermatosis
 - Patient has significant vascular compromise**AND**
- The quantity requested does not exceed 30 tablets per month for a maximum of 3 months.
OR
- The patient has a diagnosis of a *Tinea capitis* infection (confirmed with a positive KOH stain, PAS stain, or fungal culture).
AND
- The quantity requested does not exceed 30 tablets per month for a maximum of 6 weeks.
OR
- The patient has a diagnosis of a *Tinea pedis*, *Tinea cruris*, or *Tinea corporis* infection (confirmed with a positive KOH stain, PAS stain, or fungal culture).
AND
- The patient has a documented side-effect, allergy, or treatment failure to at least **THREE** different topical antifungal medications (one of the trials **must** have included a topical terbinafine product).
AND
- The quantity requested does not exceed 30 tablets per month for a maximum of 1 month.
- For approval of Lamisil[®], the patient must have a documented intolerance to generic terbinafine.

Lamisil Granules:

- The patient has a diagnosis of a *Tinea capitis* infection (confirmed with a positive KOH stain, PAS stain, or fungal culture).
AND
- The patient has a requirement for an oral liquid dosage form.
AND
- The patient had a documented side effect, allergy, or treatment failure with Griseofulvin suspension

LIMITATIONS:

Coverage of Onychomycosis agents will **NOT** be approved solely for cosmetic purposes.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting provision of the non-preferred agent or more than the stated quantity limits on a **General Prior Authorization Request Form**.

Anti-Infectives: Antifungals: Allylamines

Length of Authorization: Up to 3 months

Key: † Generic product

PREFERRED DRUGS (No PA Required)	PA REQUIRED
All products require PA.	terbinafine† (compare to Lamisil®) tablets (<i>QL: 30 tab/month post PA approval</i>) Lamisil® (terbinafine) granules (<i>QL: 125 mg packet (1 or 2 per day depending on dose) 187.5 mg packet (1 per day) post PA approval</i>) Lamisil® tablets (terbinafine) (<i>QL: 30 tab/month post PA approval</i>)

Please Note: Griseofulvin suspension is available without restrictions or PA for treatment of *Tinea Capitis* infections.

Anti-Infectives: Antifungals: Azoles

LENGTH OF AUTHORIZATION: Up to 3 months

Onychomycosis (Sporanox/itraconazole):

Fingernails: 2 capsules (200mg) twice daily for 1 week per month for 2 months (pulse) or
2 capsules (200mg) per day for 6 weeks

Toenails: 2 capsules (200mg) twice daily for 1 week per month for 3 months (pulse) or
2 capsules (200mg) per day for 12 weeks

Other medications/indications: 3 months

CRITERIA FOR APPROVAL ITRACONAZOLE/SPORANOX®:

- The patient has a diagnosis of invasive aspergillosis, blastomycosis, or histoplasmosis
OR
- The patient has a diagnosis of a fingernail/toenail onychomycosis infection (confirmed with a positive KOH stain, PAS stain, fungal culture or physician clinical judgment) **AND** has a documented side-effect, allergy, contraindication, or treatment failure to oral terbinafine **AND** meets at least 1 of the following criteria:
 - Pain to affected area that limits normal activity
 - Diabetes Mellitus
 - Patient is immunocompromised
 - Patient has diagnosis of systemic dermatosis
 - Patient has significant vascular compromise**OR**
- The patient is completing a course of therapy with the requested medication that was initiated in the hospital.
OR
- The patient has a documented side-effect, allergy, or treatment failure to at least **ONE** of the preferred medications.
- For approval of Sporanox® capsules, the patient must have a documented intolerance to generic itraconazole. For approval of Sporanox® solution, the patient must have a medical necessity for a liquid dosage form.

LIMITATIONS:

Coverage of Onychomycosis agents will **NOT be approved solely for cosmetic purposes.**

CRITERIA FOR APPROVAL OF VORICONAZOLE/VFEND®:

- Patient has a diagnosis of invasive aspergillosis.
OR
- The patient is completing a course of therapy with the requested medication that was initiated in the hospital.
OR
- The patient has a documented side-effect, allergy, or treatment failure to **ONE** of the preferred medications **AND** itraconazole.
- For approval of Vfend® tablets, the patient must have a documented intolerance to generic voriconazole. For approval of Vfend® solution, the patient must have a medical necessity for a liquid dosage form.

CRITERIA FOR APPROVAL OF NOXAFIL:

- The patient has a diagnosis of HIV/immunocompromised status (neutropenia secondary to chemotherapy, hematopoietic stem cell transplant recipients) **AND** Noxafil is being used for the prevention of invasive *Aspergillus/Candida* infections.
- OR**
- The patient is completing a course of therapy with the requested medication that was initiated in the hospital.
- OR**
- The patient has a documented side-effect, allergy, or treatment failure to **ONE** of the preferred medications **AND** itraconazole **AND** the patient is being treated for oropharyngeal candidiasis.

CRITERIA FOR APPROVAL OF DIFLUCAN® (BRAND):

- For approval of Diflucan® brand name product, the patient must have a documented intolerance to generic fluconazole.

CRITERIA FOR APPROVAL OF ORAVIG:

- The indication for use is treatment of oropharyngeal candidiasis.
- AND**
- The patient has had a documented side effect, allergy, treatment failure/inadequate response to both nystatin suspension and clotrimazole troche.
- OR**
- The patient is unable to be compliant with the nystatin suspension and/or clotrimazole troche dosing schedules.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting provision of a non-preferred agent on a **General Prior Authorization Request Form**.

Anti-Infectives: Antifungals: Azoles	
<i>Length of Authorization: Up to 3 months (see above)</i>	
Key: † Generic product, *Indicates generic equivalent is available without a PA

VALACYCLOVIR † (compare to Valtrex®)	Valtrex®* (valacyclovir) Zovirax®* (acyclovir) §

Anti-Infectives: Antivirals: Influenza Medications

Dosing information below is to be used in combination with the CDC and Vermont Department of Health recommendations:

<http://www.cdc.gov/flu/>

<http://healthvermont.gov/prevent/flu/index.aspx>

Antiviral medications with activity against influenza viruses are an important adjunct to influenza vaccine in the control of influenza.

- Influenza antiviral prescription drugs can be used to **treat** influenza or to **prevent influenza**.
- Two FDA-approved influenza antiviral medications are recommended for use in the United States during the 2012-2013 influenza season: **oseltamivir** (Tamiflu[®]) and **zanamivir** (Relenza[®]).
- Oseltamivir and zanamivir are chemically related antiviral medications known as neuraminidase inhibitors that have activity against both influenza A and B viruses.
- The greatest benefit is when antiviral treatment is started within 48 hours of influenza illness onset.
- Antiviral treatment may still be beneficial in patients with severe, complicated, or progressive illness, and in hospitalized patients when administered more than 48 hours from illness onset.
- Annual influenza vaccination is the best way to prevent influenza because vaccination can be given well before influenza virus exposures occur, and can provide safe and effective immunity throughout the influenza season. However, antiviral medications are **70% to 90%** effective in preventing influenza and are useful adjuncts to vaccination.
- CDC does not recommend widespread or routine use of antiviral medications for chemoprophylaxis so as to limit the possibilities that antiviral resistant viruses could emerge.

LENGTH OF AUTHORIZATION: for duration of the prescription

CRITERIA FOR APPROVAL (Tamiflu, Relenza):

Tamiflu and Relenza will **NOT** require prior-authorization **at this time** when prescribed within the following quantity limits:

Relenza (zanamivir): 20 blisters per 30 days

Tamiflu (oseltamivir): 75 mg or 45 mg: 10 capsules per 30 days

30 mg: 20 capsules per 30 days

Suspension (6 mg/ml): 180 ml (3 bottles) per 30 days

Antiviral Medication Dosing Recommendations for Treatment and Chemoprophylaxis of Influenza, 2011 – 2012 Influenza Season.

Agent, group		Treatment (5 days)	Chemoprophylaxis (7 days, 14 days or longer in long term care)
Oseltamivir (Tamiflu[®])			
Adult		75-mg capsule twice per day	75-mg capsule once per day
Children ≥ 12 months	≤15 kg	30 mg twice daily	30 mg once per day
	>15-23 kg	45 mg twice daily	45 mg once per day
	>23-40 kg	60 mg twice daily	60 mg once per day
	>40 kg	75 mg twice daily	75 mg once per day
Zanamivir (Relenza[®])*			
Adult		10 mg (two 5 mg inhalations) twice daily	10 mg (two 5-mg inhalations) once daily
Children		10 mg (two 5 mg inhalations) twice daily (for 7 years or older)	10 mg (two 5-mg inhalations) once daily (for 5 years or older)

*Zanamivir, an inhaled medication, can induce bronchospasm and is not recommended for treatment for patients with underlying pulmonary disease such as asthma or chronic obstructive pulmonary disease.

LIMITATIONS:

Amantadine, Flumadine[®] and rimantadine are not CDC recommended for use in influenza treatment or chemoprophylaxis at this time and are not covered for this indication. For information regarding amantadine see “Parkinsons Medications”. Flumadine[®]/rimantadine is not covered for any indication.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Anti-Infectives: Antivirals: Influenza Medications

Length of Authorization: up to 6 weeks

Key: † Generic product, *Indicates generic equivalent is available without a PA

PREFERRED DRUGS

PA REQUIRED

RELENZA[®] (zanamivir)(QL= 20 blisters/30 days)
TAMIFLU[®] (oseltamivir)(QL = 10 caps/30 days (45 mg & 75 mg caps), 20 caps/30 days (30 mg caps), 180 ml (6 mg/ml)/30 days (suspension))

Anti-Infectives: Antivirals: Influenza Vaccines

LENGTH OF AUTHORIZATION:

NOTE: Seasonal Influenza Nasal Vaccine is provided free of charge and without PA for patients ages 2 – 18 by the Vermont Department of Health. Prescribers should contact the Vermont Department of Health for supply.

1 dose for children and adults aged 2-49 years, including children aged 2-8 years who have been previously vaccinated with influenza vaccine.

2 doses total, given at least one month apart, for children age 2-8 years who have not been previously vaccinated with influenza vaccine.

INDICATION: Seasonal Influenza Nasal Vaccine

Seasonal influenza nasal vaccine (live attenuated) is FDA approved for influenza prevention in healthy people 2 - 49 years of age who are not pregnant. It is different from the standard influenza vaccines, which contain inactivated viruses and are administered intramuscularly. Theoretically, viruses from the live vaccine may be transmitted to other people. The Advisory Committee on Immunization Practices (ACIP) publishes guidelines specifying groups of people who will benefit most from influenza vaccination, such as those with chronic medical conditions, nursing home residents, and pregnant women. However, the intranasal formulation is contraindicated in many patients that would benefit from influenza vaccination, due to the fact it is a live vaccine.

CRITERIA FOR APPROVAL (Flumist):

- Flumist is being requested for influenza prophylaxis during flu season,

AND
- The patient is between the ages of 19 and 49 years old,

AND
- Prescriber provides documentation of a contraindication to an intramuscular injection (e.g., currently on warfarin; history of thrombocytopenia) or other compelling information to support the use of this dosage form.

EXCLUDED FROM APPROVAL:

- Hypersensitivity (severe allergy) to any FluMist® component including eggs and egg products.
- Children and adolescents aged 2 – 17 years receiving aspirin therapy (increased risk of Reye's Syndrome).
- History of Guillain-Barre Syndrome.
- People with a medical condition that places them at high risk for complications from influenza, including those with chronic heart or lung disease, such as asthma or reactive airways disease; people with medical conditions such as diabetes or kidney failure; or people with illnesses that weaken the immune system, or who take medications that can weaken the immune system.
- Children <5 years old with a history of recurrent wheezing
- Pregnant women

Requests will be evaluated on a case-by-case basis, in the event of vaccine shortage and/or the issuing of prioritization orders from the Department of Public Health and Centers for Disease Control.

Age Group	Vaccination Status	Dosage Schedule
Children age 2 –8 years	Not previously vaccinated with seasonal influenza vaccine or received only one dose in 2010/11 and it was first time vaccination	2 doses (0.2 mL* each at least one month apart)
Children age 2 – 8 years	Previously vaccinated with seasonal influenza vaccine	1 dose (0.2 mL*) per season
Children & Adults age 9-49	Not Applicable	1 dose (0.2 mL*) per season

* administered as 0.1 mL per nostril

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the use of Flumist[®] on the **General Prior Authorization Request Form**.

Anti-Migraine: Triptans

LENGTH OF AUTHORIZATION:

6 months

CRITERIA FOR APPROVAL (non-preferred agents):

Oral:

Amerge, Axert, Frova, Imitrex, Maxalt, Relpax, rizatriptan, Zomig, Zomig ZMT, zomatriptan, zomatriptan ODT:

- The patient has had a documented side-effect, allergy or treatment failure to Sumatriptan, Naratriptan and Maxalt-MLT. If the request is for generic rizatriptan, the patient must also have a documented intolerance to the brand product. If the request is for zomatriptan or zimitriptan ODT, the patient must also have a documented intolerance to the brand product.

Maxalt-MLT, rizatriptan ODT:

- The patient has had a documented side effect, allergy, or treatment failure with Sumatriptan and Naratriptan. If the request is for generic rizatriptan ODT, the patient must also have a documented intolerance to the brand product.

Naratriptan:

- The patient has had a documented side effect, allergy, or treatment failure with Sumatriptan.

Treximet:

- The patient had a documented side effect, allergy, or treatment failure with 2 preferred Triptans
AND
- The patient is unable to take the individual components (sumatriptan and naproxen) separately

Nasal Spray: Zomig:

- The patient has had a documented side-effect, allergy or treatment failure Imitrex[®] Nasal Spray.

Nasal Spray or Injection: Sumatriptan

- The patient has had a documented intolerance to brand Imitrex[®].

CRITERIA FOR APPROVAL (to exceed quantity limit):

- The patient is taking a medication for migraine prophylaxis

LIMITATIONS:

Sumavel DosePro[®] not covered as no Federal Rebate offered.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting provision of a non-preferred agent or more than the stated quantity limits on a **General Prior Authorization Request Form**.

Anti-Obesity Agents

Effective 10/12/2011, anti-obesity agents (weight loss agents) are no longer a covered benefit for all Vermont Pharmacy Programs. This change is resultant from Drug Utilization Review (DUR) Board concerns regarding safety and efficacy of these agents.

Antipsychotics: Atypical and Combination (Children/Adolescents < 18 years old)

LENGTH OF AUTHORIZATION: 1 year (all medication require prior authorization for children < 18 years old)

CRITERIA FOR APPROVAL: (Children/Adolescents < 18 years old) **Note: All requests for patients < 5 years old will be reviewed by the DVHA Medical Director.**

Target symptoms or Diagnoses that will be accepted for approval:

<u>Target Symptom:</u>	<u>Diagnosis:</u>
Aggression	Bipolar Disorder
Grandiosity/euphoria/mania	Obsessive Compulsive Disorder
Obsessions/compulsions	Schizophrenia/Schizoaffective Disorder
Psychotic symptoms	Tourette's Syndrome
Tics (motor or vocal)	

PREFERRED AFTER CLINICAL CRITERIA ARE MET:

TABLETS/CAPSULES:

Risperidone, Ziprasidone, Zyprexa:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.

Quetiapine:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.

Note: Quetiapine will not be approved for indications of insomnia, for sleep or as an hypnotic.

ORAL SOLUTIONS:

Risperidone Oral Solution:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.

NON-PREFERRED:

TABLETS/CAPSULES:

Invega[®]:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.
- AND
- The patient has had a documented side effect, allergy or treatment failure with at least two preferred after clinical criteria are met products (typical or atypical antipsychotics) (see tables), one of which is risperidone.

Clozaril[®], Geodon[®], Risperdal[®], Seroquel[®]:

- The patient meets clinical criteria for the generic equivalent
AND
- The patient has a documented intolerance to the generic equivalent.

Olanzapine:

- The patient meets clinical criteria for the brand equivalent
AND
- The patient has a documented intolerance to brand Zyprexa[®].

Clozapine:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.
AND
- The patient has had a documented side effect, allergy or treatment failure with at least three other antipsychotic medications (typical or atypical antipsychotics), two of which are preferred after clinical criteria are met products (see tables).

Seroquel XR[®]:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.
AND
- The patient has not been able to be adherent to a twice daily dosing schedule of quetiapine immediate release resulting in a significant clinical impact.

Abilify[®]:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The indication or use is treatment of aggression or Tourette's syndrome/tics (motor or vocal) AND the patient has had a documented side effect, allergy or treatment failure with risperidone.
OR
- The indication or use is treatment of aggression or Tourette's syndrome/tics (motor or vocal) AND the prescriber feels that risperidone would not be an appropriate alternative for the patient because of pre-existing medical conditions such as obesity or diabetes.
OR
- The medication is being requested for one of the other target symptoms or patient diagnoses listed above.
AND
- The patient has had a documented side effect, allergy or treatment failure with at least two preferred after clinical criteria are met products (typical or atypical antipsychotics) (see tables), one of which is risperidone.
OR
- The prescriber feels that neither risperidone nor quetiapine would be appropriate alternatives for the patient because of pre-existing medical conditions such as obesity or diabetes.

ORAL SOLUTIONS:

Abilify[®] Oral Solution:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.
AND

- The patient has had a documented side effect, allergy or treatment failure with risperidone oral solution.
- OR
- The prescriber feels that risperidone would not be an appropriate alternative for the patient because of pre-existing medical conditions such as obesity or diabetes.

Risperdal®:

- The patient meets clinical criteria for the generic equivalent
- AND
- The patient has a documented intolerance to the generic product risperidone.

ORALLY DISINTEGRATING TABLETS:

Olanzapine orally disintegrating tablets, Risperdal® M-Tab, Risperidone† ODT, Zyprexa Zydis®

- The patient meets clinical criteria for non-orally disintegrating oral dosage forms of the same medication.
- AND
- Medical necessity for a specialty dosage form has been provided.
- AND
- If the request is for a generic product with a brand equivalent, the patient has a documented intolerance to the brand product.

Clozapine orally disintegrating tablets, FazaClo®

- The patient has been started and stabilized on any form of the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- AND
- Medical necessity for a specialty dosage form has been provided.
- OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.
- AND
- The patient has had a documented side effect, allergy or treatment failure with at least three other antipsychotic medications (typical or atypical antipsychotics)
- AND
- Medical necessity for a specialty dosage form has been provided.
- AND
- If the request is for a brand product with a generic equivalent, the patient has a documented intolerance to generic product.

Abilify® Discmelt

- The patient has been started and stabilized on any form of the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- AND
- Medical necessity for a specialty dosage form has been provided.
- OR
- The medication is being requested for one of the target symptoms or patient diagnoses listed above.
- AND
- The patient has had a documented side effect, allergy or treatment failure with Risperdal M-Tab.
- OR
- The prescriber feels that risperidone would not be an appropriate alternative for the patient because of pre-existing medical conditions such as obesity or diabetes.
- AND
- Medical necessity for a specialty dosage form has been provided.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of any agent on a **General Prior Authorization Request Form**.

LIMITATIONS:

Approval for use in Children < 18 years old will not be granted for the following medications or dosage forms due to no FDA approval for use in children and little or no literature to support their use in this population.

Exceptions will be made for patients who have been started and stabilized on the requested medication or dosage form.
(Note: samples are not considered adequate justification for stabilization.)

Antipsychotics: Atypical and Combination

(ADULTS ONLY ≥ 18 years old)

LENGTH OF AUTHORIZATION: Duration of need ** (except as noted below)
Quetiapine/Seroquel ≤ 50 mg/day = 1 year

CRITERIA FOR APPROVAL: (Adult Patients ≥ 18 years old)

NON-PREFERRED TABLETS:

Fanapt®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The indication for use is the treatment of schizophrenia/schizoaffective disorder or bipolar disorder.
- AND
- The patient has had a documented side effect, allergy or treatment failure with at least three preferred products (typical or atypical antipsychotics).

Invega®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.) (Prior therapy with injectable Invega Sustenna® is not considered to be started and stabilized for oral Invega. Patients transferring to oral therapy from Invega Sustenna® should transition to oral risperidone unless patient previously failed such treatment)
- OR
- The indication for use is the treatment of schizophrenia/schizoaffective disorder.
- AND
- The patient has had a documented side effect, allergy or treatment failure with at least three preferred products (typical or atypical antipsychotics), one of which is risperidone.

Saphris®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The indication for use is the treatment of schizophrenia/schizoaffective disorder or bipolar disorder.
- AND
- The patient has had a documented side effect, allergy or treatment failure with at least three preferred products (typical or atypical antipsychotics).

Clozaril®, Geodon®, Risperdal®:

- The patient has a documented intolerance to the generic equivalent.

Latuda®:

- The patient is pregnant and the diagnosis is schizophrenia/schizoaffective disorder.
- OR
- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The indication for use is schizophrenia/schizoaffective disorder.
- AND
- The patient has had a documented side effect, allergy or treatment failure with at least three preferred products (typical or atypical antipsychotics), one of which is ziprasidone.
- OR

- The patient has had a documented side effect, allergy or treatment failure with ziprasidone and the prescriber feels that neither risperidone nor quetiapine would be appropriate alternatives for the patient because of pre-existing medical conditions such as obesity or diabetes.

Quetiapine/Seroquel® < or = 50 mg/day:

- The patient is being prescribed > 50 mg/day with combinations of tablet strengths.
OR
- The indication for use is Adjunct treatment of Major Depressive Disorder (MDD) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories). Trazodone dosed at < 150 mg/day would not be considered a trial for this indication.
OR
- The indication for use is Adjunct treatment of any anxiety disorder (panic, agoraphobia, social phobia, obsessive-compulsive disorder, PTSD, Acute Stress Disorder, Generalized Anxiety Disorder) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories) or at least 2 antidepressants from the SSRI, SNRI, and/or Miscellaneous Antidepressant categories and buspirone. Trazodone dosed at < 150 mg/day and bupropion would not be considered trials for this indication.
OR
- The indication for use is a mental health indication (other than the two above indications or a sleep disorder).
AND
- If the request is for brand Seroquel, the patient has a documented intolerance to generic quetiapine.

Note: Quetiapine in doses of ≤ 50 mg/day will not be approved for indications of insomnia, for sleep or as an hypnotic.

Seroquel XR®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The indication for use is schizophrenia/schizoaffective disorder or bipolar disorder (bipolar mania, bipolar depression, bipolar maintenance).
OR
- The indication for use is Adjunct treatment of Major Depressive Disorder (MDD) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories). Trazodone dosed at < 150 mg/day would not be considered a trial for this indication.
OR
- The indication for use is Adjunct treatment of any anxiety disorder (panic, agoraphobia, social phobia, obsessive-compulsive disorder, PTSD, Acute Stress Disorder, Generalized Anxiety Disorder) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories) or at least 2 antidepressant from the SSRI, SNRI, and/or Miscellaneous Antidepressant categories and buspirone. Trazodone dosed at < 150 mg/day and bupropion would not be considered trials for this indication.
AND
- The patient has not been able to be adherent to a twice daily dosing schedule of quetiapine immediate release resulting in a significant clinical impact

Abilify®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
OR
- The indication for use is schizophrenia/schizoaffective disorder or bipolar disorder.
AND
- The patient has had a documented side effect, allergy or treatment failure with at least three preferred products (typical or atypical antipsychotics)
OR

- The patient has had a documented side effect, allergy or treatment failure with ziprasidone and the prescriber feels that neither risperidone nor quetiapine would be appropriate alternatives for the patient because of pre-existing medical conditions such as obesity or diabetes.

OR

- The indication for use is Adjunct treatment of Major Depressive Disorder (MDD) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories). Trazodone dosed at < 150 mg/day would not be considered a trial for this indication.

OR

- The indication for use is Adjunct treatment of any anxiety disorder (panic, agoraphobia, social phobia, obsessive-compulsive disorder, PTSD, Acute Stress Disorder, Generalized Anxiety Disorder) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories) or at least 2 antidepressant from the SSRI, SNRI, and/or Miscellaneous Antidepressant categories and buspirone. Trazodone dosed at <150 mg/day and bupropion would not be considered trials for this indication.

AND

- The patient has had a documented side effect, allergy or treatment failure with one preferred atypical antipsychotic product being used as adjunctive therapy.

OR

- The indication for use is treatment of aggression, psychosis, or agitation secondary to Alzheimer's disease or other dementias AND the patient has had a documented side effect, allergy or treatment failure with two preferred products (typical or atypical antipsychotics). (**Note:** Please consider FDA Black Box Warning)

OR

- The indication or use is treatment of irritability associated with autistic disorder AND the patient has had a documented side effect, allergy or treatment failure with risperidone.

OR

- The indication or use is treatment of Tourette's syndrome AND the patient has had a documented side effect, allergy or treatment failure with guanfacine or clonidine and also risperidone.

Olanzapine:

- The patient has a documented intolerance to brand Zyprexa®.

NON-PREFERRED ORAL SOLUTIONS

Abilify®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The indication for use is Adjunct treatment of Major Depressive Disorder (MDD) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories). Trazodone dosed at < 150 mg/day would not be considered a trial for this indication.

OR

- The indication for use is Adjunct treatment of any anxiety disorder (panic, agoraphobia, social phobia, obsessive-compulsive disorder, PTSD, Acute Stress Disorder, Generalized Anxiety Disorder) and the patient has had a documented inadequate response to at least 3 different antidepressants from 2 different classes (SSRI, SNRI, and/or Miscellaneous Antidepressant categories) or at least 2 antidepressant from the SSRI, SNRI, and/or Miscellaneous Antidepressant categories and buspirone. Trazodone dosed at <150 mg/day and bupropion would not be considered trials for this indication.

AND

- The patient has had a documented side effect, allergy or treatment failure with preferred risperidone oral solution being used as adjunctive therapy.

OR

- The indication for use is schizophrenia/schizoaffective disorder or bipolar disorder.

OR

- The indication for use is treatment of aggression, psychosis, or agitation secondary to Alzheimer's disease or other dementias. (**Note:** Please consider FDA Black Box Warning)

OR

- The indication or use is treatment of irritability associated with autistic disorder.
- OR
- The indication or use is treatment of Tourette's syndrome AND the patient has had a documented side effect, allergy or treatment failure with guanfacine or clonidine.
- AND
- The patient has had a documented side effect, allergy or treatment failure with preferred risperidone oral solution.

Risperdal®:

- The patient has a documented intolerance to the generic product risperidone.

NON-PREFERRED SHORT-ACTING INJECTABLE PRODUCTS:

- Medical necessity for a specialty dosage form has been provided.
- AND
- The patient has had a documented side effect, allergy, or treatment failure with Geodon IM. In addition, for approval of Zyprexa® IM, the patient must have had a documented intolerance to generic olanzapine IM.

LONG-ACTING INJECTIONS:

- Medical necessity for a specialty dosage form has been provided (swallowing disorder, non-compliance with oral medications, etc.)
- For approval of Zyprexa Relprevv®, the prescriber must also provide clinical rationale why Risperdal Consta® or Invega Sustenna® is not a suitable option for this patient.

ORALLY DISINTEGRATING TABLETS:

- Medical necessity for a specialty dosage form has been provided.
- AND
- If the request is for the generic olanzapine orally disintegrating tablet or risperidone ODT, the patient has a documented intolerance to the brand product (if available for that strength). If the request is for FazaClo, the patient has a documented intolerance to generic clozapine orally disintegrating tablets.

COMBINATION PRODUCTS:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The patient has had a documented side effect, allergy or treatment failure with two preferred products (ziprasidone, risperidone, and quetiapine).
- OR
- The prescriber provides a clinically valid reason for the use of the requested medication.
- AND
- If the request is for brand product, the patient has a documented intolerance to the generic product,

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**
- ✓ Document clinically information supporting the prescribing of Quetiapine in doses of ≤ 50 mg/day on a **Quetiapine Prior Authorization Request Form.**

After a 4-month lapse in use of a non-preferred agent, or if there is a change in therapy, a look-back through claims information will identify the need to re-initiate therapy following the PDL and clinical criteria.

MANAGEMENT OF MENTAL HEALTH DRUGS: See page 180 for a description of the management of mental health drugs.

Antipsychotics: Atypical and Combination (ADULTS ONLY ≥ 18 years old)

Length of authorization: Duration of Need*[▲]

Key: † Generic product. *Indicates generic equivalent is available without a PA

PREFERRED DRUGS (No PA Required)

PA REQUIRED

TABLETS/CAPSULES

CLOZAPINE† (compare to Clozaril[®])
FDA maximum recommended dose = 900 mg/day
 RISPERIDONE† (compare to Risperdal[®])
FDA maximum recommended dose = 16 mg/day
 QUETIAPINE† (compare to Seroquel[®]) > 50 mg/day
 QUETIAPINE† (compare to Seroquel[®]) ≤ 50 mg/day (children < 18 years old)
FDA maximum recommended dose = 800 mg/day
 ZIPRASIDONE† (compare to Geodon[®])
FDA maximum recommended dose = 160 mg/day
 ZYPREXA[®] (olanzapine)
FDA maximum recommended dose = 20 mg/day,
Quantity limit = 1.5 tabs/day (2.5 mg, 5 mg, 7.5 mg & 10 mg tabs)

Abilify[®] (aripiprazole)
FDA maximum recommended dose = 30 mg/day,
Quantity limit = 1.5 tabs/day (5 mg, 10 mg & 15 mg tabs)
 Clozaril[®]* (clozapine)
FDA maximum recommended dose = 900 mg/day
 Fanapt[®] (iloperidone)
FDA maximum recommended dose = 24 mg/day
Quantity limit = 2 tablets/day
 Geodon[®] (ziprasidone)
FDA maximum recommended dose = 160 mg/day
 Invega[®] (paliperidone)
FDA maximum recommended dose = 12 mg/day
Quantity limit = 1 tab/day (3mg, 9mg), 2 tabs/day (6mg)
 Latuda[®] (lurasidone)
FDA maximum recommended dose = 160 mg/day
Quantity limit = 1 tablet/day all strengths except 80 mg = 2 tablets/day
 Olanzapine† (compare to Zyprexa[®])
FDA maximum recommended dose = 20 mg/day,
Quantity limit = 1.5 tabs/day (2.5 mg, 5 mg, 7.5 mg & 10 mg tabs)
 Quetiapine† (compare to Seroquel[®]) ≤ 50 mg/day (adults ≥ 18 years old)
 Risperdal[®]* (risperidone)
FDA maximum recommended dose = 16 mg/day
 Saphris[®] (asenapine) sublingual tablet
FDA maximum recommended dose = 20 mg/day
 Seroquel[®] (quetiapine)
FDA maximum recommended dose = 800 mg/day
 Seroquel XR[®] (quetiapine XR)
FDA maximum recommended dose = 800 mg/day Quantity Limit = 1 tab/day (150 mg & 200 mg tablet strengths), 2 tabs/day (50 mg strength)

ORAL SOLUTIONS

RISPERIDONE† (compare to Risperdal[®]) oral solution
FDA maximum recommended dose = 16 mg/day

Abilify[®] (aripiprazole) oral solution
FDA maximum recommended dose = 25 mg/day
 Risperdal[®] (risperidone) oral solution
FDA maximum recommended dose = 16 mg/day

SHORT-ACTING INJECTABLE PRODUCTS

GEODON[®] IM (ziprasidone intramuscular injection)
FDA maximum recommended dose = 40 mg/day

Abilify[®] IM (aripiprazole intramuscular injection)
FDA maximum recommended dose = 30 mg/day
 Olanzapine† IM (compare to Zyprexa[®] IM)
FDA maximum recommended dose = 30 mg/day
 Zyprexa[®] IM (olanzapine intramuscular injection)
FDA maximum recommended dose = 30 mg/day

* For brand name products when generic equivalent preferred, length of authorization is 1 year.

^ For generic product when brand name product preferred, length of authorization is 1 year.

Antipsychotics: Typical

LENGTH OF AUTHORIZATION: Duration of need for mental health indications*

CRITERIA FOR APPROVAL:

ORAL

- The patient has had a documented side effect, allergy or treatment failure with at least two preferred products. (If a product has an AB rated generic, one trial must be the generic.)

LONG ACTING INJECTABLE PRODUCTS

- For approval of Haldol[®] deconaoate, the patient has a documented intolerance to the generic product.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

After a 4-month lapse in use of a non-preferred agent for a mental health indication, or if there is a change in therapy, a look-back through claims information will identify the need to re-initiate therapy following the PDL and clinical criteria.

Bone Resorption Inhibitors

LENGTH OF AUTHORIZATION: 3 years except Forteo[®] (2 years only, no renewal)

CRITERIA FOR APPROVAL:

Actonel[®], Actonel[®] w/calcium:

- The patient has a diagnosis/indication of Paget's Disease
- AND
- The patient has had a documented side effect, allergy, or treatment failure (at least a six-month trial) to generic alendronate.
- OR
- The patient has a diagnosis/indication of postmenopausal osteoporosis, osteoporosis in men or glucocorticoid induced osteoporosis.
- AND
- The patient has had a documented side effect, allergy, or treatment failure (at least a 1 year trial) to generic alendronate. Treatment failure is defined as documented continued bone loss or fracture after one or more years despite treatment with an oral bisphosphonate.

Altelia[®], Boniva[®] Oral, Ibandronate

- The patient has a diagnosis/indication of postmenopausal osteoporosis.
- AND
- The patient has had a documented side effect, allergy, or treatment failure (at least a 1 year trial) to generic alendronate[®]. Treatment failure is defined as documented continued bone loss or fracture after one or more years despite treatment with an oral bisphosphonate.
- AND
- If the request is for brand Boniva[®] oral, the patient has also had a documented intolerance to generic Ibandronate.

Binosto[®]

- The patient has a diagnosis/indication of postmenopausal osteoporosis or osteoporosis in men.
- AND
- The prescriber provides documentation of medical necessity for the specialty dosage form (i.e. inability to swallow tablets, dysphagia).

Calcitonin Nasal Spray (generic), Fortical[®], Miacalcin[®] Nasal Spray:

- The patient is started and stabilized on the requested medication. If the request is for generic Calcitonin Nasal Spray, the patient has had a documented intolerance to brand Miacalcin.
- Note: Calcitonin Nasal Spray (brand and generic) no longer recommended for osteoporosis

Miacalcin Injection[®]:

- The patient has a diagnosis/indication of Paget's Disease

Fosamax[®] Tablet:

- The patient has had a documented intolerance to generic alendronate.

Fosamax Plus D[®]:

- There is a clinical reason why the patient is unable to take generic alendronate and vitamin D separately.

Didronel[®], Etidronate, Skelid[®]:

- The patient has a diagnosis/indication of Paget's Disease

AND

- The patient has had a documented side effect, allergy, or treatment failure (at least a six-month trial) to generic alendronate. If a medication has an AB rated generic, there must have also been a trial of the generic formulation.

Forteo[®]:

- The patient has a diagnosis/indication of postmenopausal osteoporosis in females, primary or hypogonadal osteoporosis in males or glucocorticoid induced osteoporosis.

AND

- The patient has had a documented side effect, allergy, or treatment failure to an oral bisphosphonate. Treatment failure is defined as documented continued bone loss or fracture after one or more years despite treatment with an oral bisphosphonate.

AND

- The prescriber has verified that the patient has been counseled about osteosarcoma risk.

AND

- The quantity requested does not exceed 1 pen (3 mL) per 28 days with a lifetime maximum duration of treatment of 2 years.

Boniva[®] Injection:

- The patient has a diagnosis/indication of postmenopausal osteoporosis.

AND

- The patient has had a documented side effect or treatment failure to a preferred bisphosphonate. Treatment failure is defined as documented continued bone loss or fracture after one or more years despite treatment with an oral bisphosphonate.

AND

- The quantity requested does not exceed four (4) 3 mg doses per year.

Prolia[®] Injection:

- The diagnosis or indication is osteopenia in men at high risk for fracture receiving androgen deprivation therapy for nonmetastatic prostate cancer

OR

- The diagnosis or indication is osteopenia in women at high risk for fracture receiving adjuvant aromatase inhibitor therapy for breast cancer

OR

- The patient has a diagnosis/indication of postmenopausal osteoporosis

AND

- The patient has had a documented side effect, allergy, or treatment failure to a preferred bisphosphonate. Treatment failure is defined as documented continued bone loss or fracture after one or more years despite treatment with an oral bisphosphonate.

AND

- The quantity requested does not exceed 1 syringe per 6 months.

Reclast[®] Injection, Zoledronic Acid Injection:

- The patient has a diagnosis/indication of Paget's disease of bone.

OR

- The patient has a diagnosis/indication of postmenopausal osteoporosis.

OR

- The patient is male with a diagnosis of osteoporosis.

OR

- The patient has a diagnosis of glucocorticoid induced osteoporosis.
AND
- The patient has had a documented side effect or treatment failure to a preferred bisphosphonate. Treatment failure is defined as documented continued bone loss or fracture after one or more years despite treatment with an oral bisphosphonate.
AND
- The quantity requested does not exceed a single 5 mg dose per year.
AND
- If the request is for Reclast, the patient has a documented intolerance to generic zoledronic acid injection.

Xgeva® Injection:

- The diagnosis or indication is bone metastases from solid tumors (e.g. prostate, breast, thyroid, non-small lung cancer)

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of Boniva IV, Forteo, Prolia, Reclast, Xgeva or Zoledronic Acid on a **Bone Resorption Inhibitor Injectable Prior Authorization Request Form**.
- ✓ Document clinically compelling information supporting the choice of other non-preferred agents on a **General Prior Authorization Request Form**
- ✓ All requests for denosumab (Prolia® or Xgeva®) (whether billed through the pharmacy or medical benefit (J0897)) require Prior Authorization through the Catamaran Clinical Call Center.

Agency of Human Services

~ BONE RESORPTION INHIBITORS INJECTABLE ~
 Prior Authorization Request Form

Vermont Medicaid has established criteria for prior authorization of injectable bone resorption inhibitors. For beneficiaries to receive coverage for these agents, it will be necessary for the prescriber to telephone or complete and fax this form to Catamaran. Please complete this form in its entirety and sign and date below. Incomplete requests will be returned for additional information.

Submit request via: Fax: 1-866-767-2649 or Phone: 1-800-918-7549

Prescribing physician:

Name: _____
 Phone #: _____
 Fax #: _____
 Address: _____
 Contact Person at Office: _____

Beneficiary:

Name: _____
 Medicaid ID #: _____
 Date of Birth: _____ Sex: _____

Will this medication be billed through the: **pharmacy benefit** or **medical benefit** (J-code or other code)? **(Please check one)**

Administering Provider if other than Prescriber: (name): _____ NPI #: _____

Pharmacy (if known): _____ Phone: _____ &/or FAX: _____

Drug requested: Boniva IV Forteo Prolia Reclast Xgeva Zoledronic Acid

Dose & frequency: _____

Diagnosis/indication:

- Treatment of postmenopausal osteoporosis Treatment of male osteoporosis
- Paget's Disease Treatment of glucocorticoid induced osteoporosis
- Bone metastases from solid tumors (tumor type: _____)
- Other (Please Explain) _____

Has the member previously tried the following preferred medication?

<i>Drug:</i>	<i>Response:</i>
<input type="checkbox"/> Alendronate Oral	<input type="checkbox"/> side-effect <input type="checkbox"/> treatment failure* dates of use: _____

Botulinum Toxins

LENGTH OF AUTHORIZATION: initial approval 3 months, subsequent approval up to 12 months

CRITERIA FOR APPROVAL:

BOTOX (onabotulinumtoxinA):

- The indication for use is:
 - Strabismus and blepharospasm associated with dystonia, including essential blepharospasm, VII cranial nerve disorders/hemifacial spasm
 - Focal dystonias, including cervical dystonia, spasmodic dysphonia, oromandibular dystonia
 - Limb spasticity (e.g., due to cerebral palsy, multiple sclerosis, or other demyelinating CNS diseases)
 - Focal spasticity (e.g., due to hemorrhagic stroke, anoxia, traumatic brain injury)
 - Axillary Hyperhidrosis (if member has failed an adequate trial of topical therapy)
 - Overactive bladder or detrusor overactivity (if member has failed an adequate trial of at least TWO urinary antispasmodics (either short- or long-acting formulations))
 - Chronic migraine (>15 days per month with headache lasting 4 hours a day or longer) and the member has failed or has a contraindication to an adequate trial of at least TWO medications for migraine prophylaxis from at least two different classes (tricyclic antidepressants, beta-blockers, calcium channel blockers or anticonvulsants)

AND

- The patient is >12 years of age if for blepharospasm or strabismus, >16 years of age for cervical dystonia, and >18 years of age for hyperhidrosis, chronic migraine or overactive bladder/detrusor overactivity.

Dysport (abobotulinumtoxinA):

- The patient has a diagnosis of cervical dystonia or spasmodic torticollis

AND

- The patient is ≥18 years of age

AND

- The patient has had a treatment failure with BOTOX®.

Myobloc (rimabotulinumtoxinB):

- The patient has a diagnosis of focal dystonias, including cervical dystonia, spasmodic dysphonia, oromandibular dystonia

AND

- The patient is ≥16 years of age

Xeomin (incobotulinumtoxinA):

- The patient has a diagnosis of cervical dystonia or blepharospasm.

AND

- The patient is ≥18 years of age

AND

- The patient has had a documented intolerance or treatment failure with BOTOX®.

LIMITATIONS:

Coverage of botulinum toxins will not be approved for cosmetic use (e.g., glabellar lines, vertical glabellar eyebrow furrows, facial rhytides, horizontal neck rhytides, etc.). (BOTOX® Cosmetic (onabotulinumtoxinA) is not covered)

IMPORTANT NOTE:

Botulinum neurotoxins are used to treat various disorders of focal muscle spasm and excessive muscle contractions, such as focal dystonias. When injected intramuscularly, botulinum neurotoxins produce a presynaptic neuromuscular blockade by preventing the release of acetylcholine from the nerve endings. As a consequence of the chemistry and clinical pharmacology of each botulinum neurotoxin product, botulinum neurotoxins are not interchangeable, even among same serotype products. Units of biological activity are unique to each preparation and cannot be compared or converted into units of another. It is important that providers recognize there is no safe dose conversion ratio—i.e., one unit of BOTOX® (onabotulinumtoxinA, formerly type A) does not equal one unit of Myobloc® (rimabotulinumtoxinB, formerly type B) does not equal one unit of Dysport (abobotulinumtoxinA) does not equal one unit of Xeomin (incobotulinumtoxinA). Failure to understand the unique characteristics of each formulation of botulinum neurotoxin can result in under or over dosage. It is expected that use of these products will be based on each product's individual dosing, efficacy and safety profiles.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the request of the agent on a **General Prior Authorization Request Form**.
- ✓ All requests for botulinum toxin (whether billed through the pharmacy or medical benefit) require Prior Authorization through the Catamaran Clinical Call Center: Botox (J0585), Dysport (J0586), Myobloc (J0587) or Xeomin (J0588)

Botulinum Toxins	
<i>Length of Authorization: initial approval 3 months, subsequent approval up to 12 months</i>	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
	BOTOX® (onabotulinumtoxinA) Myobloc® (rimabotulinumtoxinB) Available after a BOTOX® treatment failure for select indications: Dysport® (abobotulinumtoxinA) Xeomin® (incobotulinumtoxinA)

CRITERIA FOR APPROVAL:

Alpha Blockers

- **Cardura[®], Cardura XL[®]:** The patient has had a documented side effect, allergy or treatment failure with two alpha blockers, one of which must be generic doxazosin.
- **Flomax[®]:** The patient has had a documented side effect, allergy or treatment failure with two preferred alpha blockers, one of which must be generic tamsulosin.
- **alfuzosin ER, Rapaflo[®], Uroxatral[®]:** The patient has had a documented side effect, allergy or treatment failure with two preferred alpha blockers. In addition, for approval of Uroxatral, the patient must have a documented intolerance to generic alfuzosin ER.

Androgen Hormone Inhibitors

- **Avodart:** The patient has a diagnosis of BPH (benign prostatic hypertrophy) AND the patient has a documented side effect, allergy or treatment failure to generic finasteride.
- **Proscar:** The patient has a diagnosis of BPH (benign prostatic hypertrophy) AND the patient has a documented intolerance to generic finasteride.
- **Finasteride for males age < 45:** The patient has a diagnosis of BPH (benign prostatic hypertrophy)

Combination Product

- **Jalyn:** The patient has a diagnosis of BPH (benign prostatic hypertrophy) AND the patient has a documented treatment failure/inadequate response to combination therapy with generic tamsulosin and finasteride.

LIMITATIONS:

Coverage of androgen hormone inhibitors will not be approved for cosmetic use in men or women (male-pattern baldness/alopecia or hirsutism). (This includes Propecia[®] (finasteride) and its generic equivalent whose only FDA approved indication is for treatment of male pattern hair loss.)

Current clinical guidelines recommend the use of Cialis[®] (tadalafil) only in men with concomitant erectile dysfunction or pulmonary hypertension. Medicaid programs do not receive Federal funding for drugs used in the treatment of erectile dysfunction so Cialis[®] will not be approved for use in BPH.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

BPH Agents*Length of authorization: 1 year***Key: † Generic product, *Indicates generic equivalent is available without a PA**

Cardiac Glycosides

Key: † Generic product, *Indicates generic equivalent is available without a PA

PREFERRED DRUGS (No PA Required)	PA REQUIRED
DIGOXIN† DIGOXIN† Oral Solution LANOXIN® (digoxin)	

Chemical Dependency: Alcohol and Opiate Dependency

LENGTH OF AUTHORIZATION:

Vivitrol - 6 months, no renewal

All others – Up to 1 year

CRITERIA FOR APPROVAL:

Alcohol/Opiate Dependency: Revia, Antabuse

- The patient has had a documented intolerance to the generic equivalent product.

Alcohol/Opiate Dependency: Vivitrol

- Diagnosis of alcohol dependency
AND
- An inadequate response, adverse reaction, or contraindication to 1 out of 3 oral formulations used for alcohol dependence including: oral naltrexone, acamprosate, and disulfiram OR a compelling clinical reason for use (e.g. multiple hospital admissions for alcohol detoxification)
AND
- Patient should be opiate free for > 7 – 10 days prior to initiation of Vivitrol
OR
- Diagnosis is prevention of relapse to opioid dependency
AND
- The patient has failed Suboxone therapy or is not a candidate for Suboxone therapy (eg. Patient is opiate free and prescriber wishes to prevent relapse to opioid dependence without using maintenance therapy) or patient requires injectable therapy (compliance, tolerance, etc).
AND
- Patient should be opiate free for > 7 – 10 days prior to initiation of Vivitrol
ALSO
- Available only through the Pharmacy Benefit (J-Code 2315 blocked from Medical Benefit) from a pharmacy provider that will deliver directly to the physician's office (Medicare Part B to be billed first if applicable)

Opiate Dependency: Suboxone, Buprenorphine

- Diagnosis of opiate dependence confirmed (will not be approved for alleviation of pain).
AND
- Prescriber has an DATA 2000 waiver ID number (“X-DEA license”) in order to prescribe
AND
- A “Pharmacy Home” for all prescriptions has been selected (Pharmacy located or licensed in VT)
AND
- Patients new to Suboxone (no claims in last 60 days) will be prescribed Suboxone Film (not SL tablet).
AND
- Patients new to Suboxone (no claims in last 60 days) will be subject to a quantity limit of 16 mg/day.
AND
- Requests for Suboxone SL tablet after documented intolerance of Suboxone Film must include a completed MedWatch form that will be submitted by DVHA to the FDA.
AND
- If buprenorphine (formerly Subutex) is being requested,
 - Patient is either pregnant and history (copy of positive pregnancy test) has been submitted (duration of PA will be one 1 month post anticipated delivery date)
OR
 - Patient is breastfeeding a methadone or morphine dependent baby and history from the neonatologist or pediatrician has been submitted.

~BUPRENORPHINE ~
 Prior Authorization Request Form

Vermont Medicaid has established criteria for prior authorization of buprenorphine/Suboxone[®]. These criteria are based on concerns about safety and the potential for abuse and diversion. All requests must be submitted using this fax form.

Submit request via Fax (only): 1-866-767-2649

Prescribing physician:

 Name: _____
 Phone #: _____
 Fax #: _____
 Address: _____

Beneficiary:

 Name: _____
 Medicaid ID #: _____
 Date of Birth: _____ Sex: _____

Contact Person at Office: _____

► Please answer the following questions:

Is buprenorphine being prescribed for opiate dependency?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Does the prescriber signing this form have a DATA 2000 waiver ID number ("X-DEA license")?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Has the prescriber queried the VPMS (Vermont Prescription Monitoring System) to review patient's scheduled II-IV medication history?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not signed up
A "Pharmacy Home" for ALL prescriptions has been selected AND discussed with patient? (Pharmacy must be located/licensed in VT) Pharmacy Name: _____ Pharmacy Phone #: _____	<input type="checkbox"/> Yes <input type="checkbox"/> No
Has patient filled a Suboxone RX in last 60 days	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Don't know
Request is for the following medication: Sublingual FILM	<input type="checkbox"/> Suboxone [®] (buprenorphine/naloxone)
Request is for the following medication: Sublingual TABLET	<input type="checkbox"/> Suboxone [®] (buprenorphine/naloxone) <input type="checkbox"/> Buprenorphine (formerly Subutex [®])
Anticipated maintenance dose/frequency: (target dose of no more than 16 mg/day) (maximum 14 day supply per prescription fill) Dose: _____ Frequency: _____ (recommended once daily)	
If this request is for Buprenorphine (formerly Subutex [®]), please answer the following questions: Is the member pregnant? (please provide positive pregnancy test copy) If yes, anticipated date of delivery: _____	<input type="checkbox"/> Yes <input type="checkbox"/> No
Is the member breastfeeding a methadone or morphine dependent baby? (please provide history from neonatologist or pediatrician)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Would you have referred your patient to a methadone clinic if this option was conveniently located and available?	<input type="checkbox"/> Yes <input type="checkbox"/> No

~VIVITROL~

Prior Authorization Request Form

Vermont Medicaid has established criteria for prior authorization of Vivitrol (naltrexone for IM extended release suspension). These criteria are based on concerns about safety. In order for beneficiaries to receive coverage for Vivitrol, it will be necessary for the prescriber to complete and fax this prior authorization request to Catamaran. Please complete this form in its entirety and sign and date below. Incomplete requests will be returned for additional information.

Submit request via Fax: 1-866-767-2649

Pharmacy (required): _____ **Phone:** _____ **&/or FAX:** _____

QUALIFICATIONS

MDS	Prescribers must secure direct delivery of Vivitrol from the pharmacy to the physician's office. Pharmacies may not dispense Vivitrol directly to the patient. Vivitrol may not be billed through the Medical Benefit as a J-Code J2315.
------------	---

PROCESS

► Please answer the following questions:

Patient diagnosis ?	<input type="checkbox"/> Alcohol dependence <input type="checkbox"/> Prevention of relapse to opioid dependency
Has the patient been opiate free for > 7 – 10 days	<input type="checkbox"/> Yes <input type="checkbox"/> No
For alcohol dependence:	
(1) Has the patient tried any of the following? Please document below.	
oral naltrexone: <input type="checkbox"/> side-effect <input type="checkbox"/> non-response <input type="checkbox"/> allergy	<input type="checkbox"/> Yes <input type="checkbox"/> No
acamprosate: <input type="checkbox"/> side-effect <input type="checkbox"/> non-response <input type="checkbox"/> allergy	
disulfiram: <input type="checkbox"/> side-effect <input type="checkbox"/> non-response <input type="checkbox"/> allergy	
(2) Has patient had a recent hospital admission for alcohol detoxification?	<input type="checkbox"/> Yes <input type="checkbox"/> No
	If yes, date: ____/____/____
For prevention of relapse to opioid dependency	
(1) Has the patient failed buprenorphine therapy?	<input type="checkbox"/> Yes <input type="checkbox"/> No
(2) Is the patient not a candidate for buprenorphine therapy?	<input type="checkbox"/> Yes <input type="checkbox"/> No
(3) Patient requires injectable therapy?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Comments and additional patient history:	

Prescriber Signature: _____ **Date of request:** _____

Compounded Products

Review Guidelines for Appropriateness of Compounded Products

Compounding of medication may be allowed:

- For making a strength of a medication when specific doses are not commercially available and when a significantly different dosage form is clinically needed.
- For preparation of a medication that has been withdrawn from the marketplace due to economic concerns, NOT safety.
- For those patients that cannot swallow or have trouble swallowing and require a different dosage form than is currently available.
- For those patients who have sensitivity to dyes, preservatives, or fillers in commercial products and require allergy-free medications.
- For children who require liquid medications that are not commercially available.

A compound drug will only be covered if it is

- Considered medically necessary according to specified criteria as detailed below **and**
- Commercially available alternative agents have been previously tried with therapeutic failure or patient intolerance

Medically necessary criteria for a compound drug

- All ingredients are FDA approved for medical use in the United States (for example, domperidone has not been approved by the FDA for any indication in the United States).
- It is not a copy of a commercially available FDA approved product.
- It is not a substitution for an available FDA approved product (for example, there are multiple commercially available hormonal products for use in menopause. Bioidentical individualized hormonal products will not be covered). One or more prescription ingredients is included in the compound; a compound whose primary active ingredient is OTC will only be covered if that particular OTC is covered under the beneficiary's program
- Safety and effectiveness of use for the prescribed indication is supported by FDA approval or adequate medical and scientific evidence or medical literature.

An ingredients is not covered if it is

- From a manufacturer that does not offer Federal Rebate
- Considered a "bulk chemical or powder". CMS has clarified that bulk products are not considered covered outpatient drugs because they are not prescription drug products approved under section 505,505(j), or 507 of the Federal Food Drug and Cosmetic Act.
- Bulk powders used to compound products for the prevention of pre-term labor will continue to be covered after Prior Authorization when this practice is acceptable to the FDA and there are not commercially available products.

Constipation: Chronic, IBS-C or Opioid-Induced

LENGTH OF AUTHORIZATION: Amitiza, Linzess: Initial PA of 3 months, and 12 months thereafter

Relistor: 3 months

CRITERIA FOR APPROVAL:

AMITIZA®

- The patient has a diagnosis of chronic idiopathic constipation (CIC) (24 mcg capsules)
OR
- The patient is a woman and has a diagnosis of irritable bowel syndrome with constipation (IBS-C) (8 mcg capsules)
AND
- The patient has had documented treatment failure to lifestyle and dietary modification (increased fiber and fluid intake and increased physical activity).
AND
- The patient has had documented side effect, allergy or treatment failure to a 1 week trial each of at least 2 preferred laxatives from the Bulk-Producing Laxative or Osmotic Laxative categories (see below).

LINZESS®

- The patient is 18 years of age or older.
AND
- The patient has a diagnosis of chronic idiopathic constipation (CIC) (145 mcg capsules)
OR
- The patient has a diagnosis of irritable bowel syndrome with constipation (IBS-C) (290 mcg capsules)
AND
- The patient has had documented treatment failure to lifestyle and dietary modification (increased fiber and fluid intake and increased physical activity).
AND
- The patient has had documented side effect, allergy or treatment failure to a 1 week trial each of at least 2 preferred laxatives from the Bulk-Producing Laxative or Osmotic Laxative categories (see below).

RELISTOR®

- The patient must have documented opioid-induced constipation and be receiving palliative care
AND
- The patient must have had documented treatment failure to a 1 week trial of at least 2 preferred laxatives from 2 different laxative classes (see below) used in combination.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Constipation: Chronic, IBS-C or Opioid-Induced

CRITERIA FOR APPROVAL: not applicable

Contraceptives: Vaginal Ring	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
NUVARING [®] (etonogestrel/ethinyl estradiol vaginal ring)	

Coronary Vasodilators/Antianginals: Oral and Topical

LENGTH OF AUTHORIZATION: 3 years

CRITERIA FOR APPROVAL:

Dilatrate-SR[®], Imdur[®]:

- The patient has had a side effect, allergy, or treatment failure to at least two of the following medications: isosorbide dinitrate ER tablet, isosorbide mononitrate ER tablet, nitroglycerin ER capsule or Nitro-time[®]. If a product has an AB rated generic, one trial must be the generic formulation.

Ismo[®], Isordil[®], Monoket[®], Isosorbide dinitrate SL tablet:

- The patient has had a side effect, allergy, or treatment failure to at least two of the following medications: isosorbide dinitrate tablet or isosorbide mononitrate tablet. If a product has an AB rated generic, one trial must be the generic formulation.

Nitro-Dur[®]:

- The patient has had a side effect, allergy, or treatment failure to Nitrek[®] or generic nitroglycerin transdermal patches.

Bidil[®]:

- The prescriber provides a clinically valid reason why the patient cannot use isosorbide dinitrate and hydralazine as separate agents.

Ranexa[®]:

- The patient has had a diagnosis/indication of chronic angina.
- AND
- The patient has had a documented side effect, allergy, or treatment failure with at least one medication from two of the following classes: beta-blockers, maintenance nitrates, or calcium channel blockers.
- AND
- The patient does not have any of the following conditions:
 - Hepatic insufficiency
 - Concurrent use of medications which may interact with Ranexa[®]:
 - CYP450 3A4 inducers (rifampin, rifabutin, rifapentin, phenobarbital, phenytoin, carbamazepine, St. John's wort)
 - CYP450 3A4 inhibitors (diltiazem, verapamil, ketoconazole, protease inhibitors, grapefruit juice, macrolide antibiotics)
 - Note: doses of digoxin or drugs metabolized by CYP450 2D6 (TCAs, some antipsychotics) may need to be adjusted if used with Ranexa[®].
- AND
- The dose requested does not exceed 3 tablets/day (500 mg) or 2 tablets/day (1000 mg).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

CRITERIA FOR APPROVAL:

- The diagnosis or indication for the requested medication is Cryopyrin-Associated Periodic Syndrome (CAPS)
OR
- The diagnosis or indication for the requested medication is Familial Cold Autoinflammatory Syndrome (FCAS)
OR
- The diagnosis or indication for the requested medication is Muckle-Wells Syndrome (MWS)
AND
- The patient is > 4 years old (Ilaris®) or > 12 years old (Arcalyst®)
AND
- If the request is for Arcalyst®, the patient must have a documented side effect, allergy, treatment failure or a contraindication to Ilaris® (canakinumab)

Note: Medical Records to support the above diagnosis must accompany the Prior Authorization Request.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of Arcalyst® or Ilaris® on a **General Prior Authorization Form.**
- ✓ All requests for canakinumab (Ilaris®) (whether billed through the pharmacy or medical benefit (J0638)) or rilonacept (Arcalyst®) (whether billed through the pharmacy or medical benefit (J2793)) require Prior Authorization through the Catamaran Clinical Call Center.

CAPS Injectables		<i>Length of Authorization: 1 year</i>
PREFERRED AFTER CLINICAL CRITERIA ARE MET	PA REQUIRED	
Ilaris® (canakinumab) (<i>QL=1 vial/56 days</i>)	Arcalyst® (rilonacept) (<i>QL = 2 vials for loading dose, then 1 vial per week</i>)	

Cystic Fibrosis: Medications

NOTE: Kalydeco[®], TOBI[®] and Pulmozyme[®] must be obtained and billed through our specialty pharmacy vendor, Briova. Please see the Cystic Fibrosis Prior Authorization/Patient Enrollment Form for instructions. Briova will not be supplying Cayston[®] at this time (obtainable through several other specialty pharmacies).

LENGTH OF AUTHORIZATION:

Kalydeco[®]: 3 months initial, then 1 year

All others: 1 year

CRITERIA FOR APPROVAL:

Cayston[®], Pulmozyme[®], TOBI[®] Podhaler:

- The diagnosis or indication is cystic fibrosis.

Kalydeco[®]:

- The patient has a diagnosis of Cystic Fibrosis with documented G551D mutation (documentation provided).
- AND
- The patient is \geq 6 years old.

Note: Renewal of Prior Authorization will require documentation of member response.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of **Cayston** on a **General Prior Authorization Request Form**.
- ✓ Document clinical information for **Pulmozyme[®]** and **TOBI[®]** on its **Prior Authorization/Patient Enrollment Form**.
- ✓ Document clinical information for **Kalydeco[®]** on a **General Specialty Prior Authorization/Patient Enrollment Form**.

Note: Bactroban® Nasal Ointment is not included in this managed category.

Dermatological Agents: Antifungals: Onychomycosis

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL (CICLOPIROX/PENLAC SOLUTION):

- The patient has a diagnosis of a fingernail/toenail onychomycosis infection (confirmed with a positive KOH stain, PAS stain, or fungal culture or physician clinical judgment).
- AND**
- The patient meets at least 1 of the following criteria:
 - Pain to affected area that limits normal activity
 - Diabetes Mellitus
 - Patient is immunocompromised
 - Patient has diagnosis of systemic dermatosis
 - Patient has significant vascular compromise
 - For approval of Penlac[®], the patient must have a documented intolerance to generic ciclopirox.

LIMITATIONS:

Coverage of Onychomycosis agents will **NOT be approved solely for cosmetic purposes.**
 Kits with multiple drug products or non-drug items not covered.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting provision of the non-preferred agent on a **General Prior Authorization Request Form.**

Dermatological Agents: Antifungals: Topical

LENGTH OF AUTHORIZATION:

Up to 3 months

All drugs (except Vusion): All indications: 3 months

Vusion: Diaper dermatitis: up to 50 g/month (1 tube) for up to 1 month

CRITERIA FOR APPROVAL:

All Brands (except Vusion):

- The patient has had a documented side effect, allergy, or treatment failure to at least TWO different preferred generic topical antifungal agents. (If a product has an AB rated generic, one trial must be the generic equivalent of the requested product.)

OR

- The patient has a contraindication that supports the need for a specific product or dosage form of a brand topical antifungal.

Ketoconazole Foam:

- The patient has had a documented side effect, allergy, or treatment failure to at least TWO different preferred generic topical antifungal agents.

Vusion[®]:

- The patient has a diagnosis of diaper dermatitis complicated by documented candidiasis

AND

- The patient is at least 4 weeks of age.

AND

- The patient has had two trials (with two different preferred antifungal agents) used in combination with a zinc oxide diaper rash product resulting in documented side effects, allergy, or treatment failures.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the use of a non-preferred agent on the **General Prior Authorization Request Form**

Dermatological Agents: Immunomodulators

At the September 2006 meeting of the DUR Board, the class of topical immunomodulators was reviewed for efficacy and safety. Included in this review was the January 20, 2006, U.S. Food and Drug Administration (FDA) updated labeling and March 17, 2005 FDA Public Health Advisory regarding Elidel[®] Cream (pimecrolimus) and Protopic[®] Ointment (tacrolimus). The labeling changes include a BOXED WARNING about the possible risk of cancer and a medication guide that is to be distributed with each prescription to ensure that the parents of patients using these medications are aware of this concern. Although a causal link has not been established, rare reports of cancer (e.g. skin and lymphoma) have been reported in patients who had been receiving these products. The FDA has advised that Protopic[®] and Elidel[®] be used only as labeled. The new labeling clarifies that these drugs are recommended for use as *second-line* treatments for the short-term and non-continuous chronic treatment of mild to moderate (Elidel[®] Cream) or moderate to severe (Protopic[®] Ointment) atopic dermatitis. The FDA also advises clinicians to avoid use in children less than 2 years of age.

LENGTH OF AUTHORIZATION: up to 1 year

CRITERIA FOR APPROVAL:

Age < 2 years (requests will be approved for up to 6 months):

- The patient has a diagnosis of atopic dermatitis (eczema). AND
- The patient has had a documented side effect, allergy, or treatment failure with at least one moderate to high potency topical corticosteroid within the last 6 months. AND
- The quantity requested does not exceed 30 grams/fill and 90 grams/6 months.

Age > 2 years (requests will be approved for up to 1 year):

- The patient has a diagnosis of atopic dermatitis (eczema). AND
- The patient has had a documented side effect, allergy, or treatment failure with at least one moderate to high potency topical corticosteroid within the last 6 months. AND
- The quantity requested does not exceed 30 grams/fill and 90 grams/6 months.

PREFERRED DRUGS (No PA Required)	PA REQUIRED	
	Savella® (milnacipran) tablet, titration pack <i>Quantity Limit = 2 tablets/day</i>	

Note: Please refer to “Anticonvulsants” for clinical criteria for **Lyrica®** and “Anti-Depressants – SNRIs” for clinical criteria for **Cymbalta®**.

Gastrointestinals: Crohn's Disease Medications: Injectables

NOTE: Crohn's Disease Self-Injectables (Humira® and Cimzia®) must be obtained and billed through our specialty pharmacy vendor, Briova. Please see the Humira and Cimzia Prior Authorization/Patient Enrollment Form for instructions. Briova may supply Remicade® upon request or you may continue to obtain through your usual supplier. Briova will not be supplying Tysabri® at this time – please continue to obtain through your usual supplier.

LENGTH OF AUTHORIZATION: Initial PA of 3 months, and 12 months thereafter if medication is well tolerated. Re-evaluate every 12 months.

CRITERIA FOR APPROVAL:

Humira® , Remicade®:

Patient has a diagnosis of Crohn's disease and has already been stabilized on the medication.

OR

Diagnosis is moderate to severe Crohn's disease and at least 2 of the following drug classes resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure (i.e. resistant or intolerant to steroids or immunosuppressants): aminosalicylates, antibiotics, corticosteroids, and immunomodulators such as azathioprine, 6-mercaptopurine, or methotrexate.

Note: Humira® and Cimzia have been shown to be effective in patients who have been treated with infliximab but have lost response to therapy.

Cimzia®:

Patient has a diagnosis of Crohn's disease and has already been stabilized on Cimzia®

OR

Patient age > 18 years

AND

Diagnosis is moderate to severe Crohn's disease and at least 2 of the following drug classes resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure (i.e. resistant or intolerant to steroids or immunosuppressants): aminosalicylates, antibiotics, corticosteroids, and immunomodulators such as azathioprine, 6-mercaptopurine, or methotrexate.

AND

The prescriber must provide a clinically valid reason why Humira® cannot be used.

Tysabri®:

Patient has a diagnosis of Crohn's disease and has already been stabilized on Tysabri®.

OR

Diagnosis is moderate to severe Crohn's disease and at least 2 of the following drug classes resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure (i.e. resistant or intolerant to steroids or immunosuppressants): aminosalicylates, antibiotics, corticosteroids, and immunomodulators such as azathioprine, 6-mercaptopurine, or methotrexate.

AND

The patient has a documented side effect, allergy, treatment failure, or contraindication to BOTH, Remicade® and Humira®,

DOCUMENTATION:

- ✓ Document clinical information for **Humira®** on its **Prior Authorization/Patient Enrollment Form** and clinically compelling information supporting the choice of **Remicade®** on a **Remicade Prior Authorization Request Form** or **Cimzia®** on its **Prior Authorization/Patient Enrollment Form** or **Tysabri®** on a **General Prior Authorization Request Form**.

- ✓ All requests for infliximab (Remicade®) (whether billed through the pharmacy or medical benefit (J1745)) or natalizumab (Tysabri®) (whether billed through the pharmacy or medical benefit (J2323)) require Prior Authorization through the Catamaran Clinical Call Center.

Gastrointestinals: Crohn's Disease: Injectables	
<i>Length of authorization: Initial PA of 3 months; 12 months thereafter</i>	
PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET	NON-PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET
HUMIRA® (adalimumab) <i>Quantity limit = 6 syringes/28 days for the first month (Crohn's starter kit); 2 syringes/28 days subsequently</i> REMICADE® (infliximab)	Cimzia® (certolizumab pegol) <i>Quantity limit = 1 kit/28 days (starter X 1, then regular)</i> Tysabri® (natalizumab)

Gastrointestinals: H.Pylori Combination Therapy

LENGTH OF AUTHORIZATION:

Date of service only

CRITERIA FOR APPROVAL:

- The patient has a documented treatment failure with combinations of individual proton pump inhibitors or H2 antagonists given together with two appropriate antibiotics
OR
- The patient has been unable to be compliant with individual agents prescribed separately.

DOCUMENTATION:

✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Gastrointestinals: H.Pylori Combination Therapy	
<i>Length of Authorization: Date of service only</i>	
PREFERRED DRUGS (No PA Required)	PA REQUIRED, any dose
	Helidac® (bismuth subsalicylate, metronidazole, tetracycline) <i>(Quantity limit=224 caps & tabs/14 days)</i>
	Omeclamox-Pak® (omeprazole, clarithromycin, amoxicillin) <i>(Quantity limit = 80 caps & tabs/10 days)</i>
	Prevpac® (lansoprazole, amoxicillin, clarithromycin) <i>(Quantity limit = 112 caps & tabs/14 days)</i>
	Pylera® (bismuth subcitrate, metronidazole, tetracycline) capsules <i>(Quantity limit=120 capsules/10 days)</i>

Gastrointestinals: Histamine-2 Receptor Antagonists

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Axid[®] capsule, nizatidine capsule, Pepcid[®] tablet, ranitidine capsule, Tagamet[®] tablet, Zantac[®] tablets:

- The patient has had a documented side effect, allergy, or treatment failure to at least one preferred medication. If a medication has an AB rated generic, the trial must be the generic formulation. For approval of ranitidine capsules, the patient must have had a trial of ranitidine tablets.

Axid[®] Oral Solution, Famotidine Oral Suspension, Nizatidine Oral Solution, Pepcid[®] Oral Suspension, Zantac[®] Effervescent, Zantac[®] Oral Syrup:

- The patient has had a documented side effect, allergy, or treatment failure to ranitidine syrup or cimetidine oral solution. If a medication has an AB rated generic, there must have been a trial of the generic formulation.

Gastrointestinals: Histamine-2 Receptor Antagonists

Length of Authorization: 1 year

Key: † Generic product, *Indicates generic equivalent is available without a PA

§ Indicates drug is managed via automated Step Therapy (prerequisite drug therapy automatically screened for upon claims processing)

PREFERRED DRUGS (No PA Required)	PA REQUIRED

Gastrointestinals: Proton Pump Inhibitors

LENGTH OF AUTHORIZATION: up to 1 year

CRITERIA FOR APPROVAL:

lansoprazole ODT, Nexium powder for suspension, Prevacid Solutabs (for patients \geq 12 years old), Prilosec packet, Protonix packet

- The patient has a requirement for an oral liquid dosage form. In addition, for approval of lansoprazole ODT, the patient has a documented intolerance to brand Prevacid Solutabs.

Other non-preferred medications:

- The member has had a documented side effect, allergy, or treatment failure to Dexilant capsules, Omeprazole RX 20 mg or 40 mg generic capsules AND Pantoprazole generic tablets.
- If the request is for Prevacid 24 hr OTC or lansoprazole generic RX capsules, the patient must also have a documented intolerance to brand Prevacid RX. If the request is for brand Zegerid OTC capsules, the patient must also have a documented intolerance to the generic equivalent.

CRITERIA FOR APPROVAL (twice daily dosing):

- Gastroesophageal Reflux Disease (GERD) – If member has had an adequate trial (e.g. 8 weeks) of standard once daily dosing for GERD, twice daily dosing may be approved.
- Zollinger-Ellison (ZE) syndrome – Up to triple dose PPI may be approved.
- Hypersecretory conditions (endocrine adenomas or systemic mastocytosis) – Double dose PPI may be approved.
- Erosive Esophagitis, Esophageal stricture, Barrett's esophagitis (complicated GERD) – Double dose PPI may be approved.
- Treatment of ulcers caused by H. Pylori – Double dose PPI may be approved for up to 2 weeks.
- Laryngopharyngeal reflux – Double dose PPI may be approved.

LIMITATIONS:

Zegerid[®] (omeprazole/sodium bicarbonate) RX capsules, powder for suspension not covered as no Federal Rebate offered.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Gastrointestinals: PPIs

*No PA required for patients < 16 years

◆ No PA required for patients < 12 years

Gastrointestinals: Ulcerative Colitis Medications: Injectables

Briova Specialty may supply Remicade[®] upon request or you may continue to obtain through your usual supplier.

LENGTH OF AUTHORIZATION: Initial PA of 3 months, and 12 months thereafter if medication is well tolerated. Re-evaluate every 12 months.

CRITERIA FOR APPROVAL:

Remicade[®]

Patient has a diagnosis of Ulcerative Colitis and has already been stabilized on Remicade[®].

OR

The patient has a diagnosis of Ulcerative Colitis and has had a documented side effect, allergy, or treatment failure with at least 2 of the following 3 agents: aminosalicylates (e.g. sulfasalazine, mesalamine, etc.), corticosteroids, or immunomodulators (e.g. azathioprine, 6-mercaptopurine, cyclosporine, etc.).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of **Remicade[®]** on a **Remicade Prior Authorization Request Form**.

- ✓ All requests for infliximab (Remicade[®]) (whether billed through the pharmacy or medical benefit (J1745)) require Prior Authorization through the Catamaran Clinical Call Center.

Gastrointestinals: Ulcerative Colitis Medications: Injectables	
<i>Length of authorization: Initial PA of 3 months; 12 months thereafter</i>	
PREFERRED AGENTS (No PA Required)	PA REQUIRED
	Remicade [®] (infliximab)

Gaucher Disease Medications

LENGTH OF AUTHORIZATION: initial approval 6 months, subsequent approval 1 year

CRITERIA FOR APPROVAL:

- The diagnosis or indication is Gaucher disease (GD) type I.
AND
- The diagnosis has been confirmed by molecular or enzymatic testing.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a PA required agent on a **General Prior Authorization Request Form.**
- ✓ All requests for imiglucerase (Cerezyme®) (J1786), Elelyso (taliglucerase) (C9294) or Vpriv (velaglucerase) (J3385) (whether billed through the pharmacy or medical benefit) require Prior Authorization through the Catamaran Clinical Call Center.

Gaucher Disease Medications	
<i>Length of Authorization: initial approval 6 months, subsequent approval 1 year</i>	
NO PA REQUIRED	PA REQUIRED
All products require PA.	Cerezyme® (imiglucerase for injection) Elelyso® (taliglucerase alfa for injection) Vpriv® (velaglucerase alfa for injection) **Maximum days' supply per fill for all drugs is 14 days**

Gout Agents

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Colcryst[®]:

- The diagnosis or indication for the requested medication is Familial Mediterranean Fever (FMF)
OR
- The diagnosis or indication for the requested medication is gout
AND
- The patient has had a documented side effect or treatment failure with at least one drug from the NSAID class.
OR
- The patient is not a candidate for therapy with at least one drug from the NSAID class due to one of the following:
 - The patient is 60 years of age or older
 - Patient has a history of GI bleed
 - Patient is currently taking an anticoagulant (warfarin or heparin)
 - Patient is currently taking an oral corticosteroid
 - Patient is currently taking methotrexate

Krystexxa[®]:

- The diagnosis or indication is treatment of chronic gout.
AND
- The patient has had a documented side effect, allergy, treatment failure or a contraindication to BOTH allopurinol and febuxostat. NOTE: Treatment failure is defined as inability to reduce serum uric acid levels to < 6 mg/dl with allopurinol doses of 600 mg/day taken consistently. Additionally, renal impairment is not considered a contraindication to allopurinol use.

Note: after preliminary review by the Clinical Call Center, the request will be forwarded to the DVHA Medical Director for final approval.

Uloric[®]:

- The diagnosis or indication is treatment of gout.
AND
- The patient has had a documented side effect, allergy, treatment failure or a contraindication to allopurinol. NOTE: Treatment failure is defined as inability to reduce serum uric acid levels to < 6 mg/dl with allopurinol doses of 600 mg/day taken consistently. Additionally, renal impairment is not considered a contraindication to allopurinol use.

Zyloprim[®]:

- The patient has had a documented intolerance to generic allopurinol.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.
- ✓ All requests for pegloticase (Krystexxa[®]) (J2507) (must be billed through the medical benefit) require Prior Authorization through the Catamaran Clinical Call Center.

Gout Agents:

Length of Authorization: 1 year

Key: † Generic product, *Indicates generic equivalent is available without a PA

PREFERRED DRUGS (No PA Required)	PA REQUIRED
<u>SINGLE INGREDIENT COLCHICINE</u>	Colcrys® (colchicine) tablet <i>QL = 3 tablets/day (gout) or 4 tablets/day (FMF)</i>
<u>SINGLE INGREDIENT URICOSURIC AGENTS</u> PROBENECID†	
<u>XANTHINE OXIDASE INHIBITORS</u> ALLOPURINOL† (compare to Zyloprim®)	Uloric® (febuxostat) <i>QL (40 mg tablets) = 1 tablet/day</i> Zyloprim®* (allopurinol)
<u>COMBINATION PRODUCTS</u> COLCHICINE/PROBENECID†	
<u>PEG-URICASE AGENTS</u>	Krystexxa (pegloticase) Vials for IV Infusion <i>QL = 2 vials/28 days</i>

Note: Please see Analgesics: Cox-II Inhibitors and NSAID for preferred NSAID options

Growth Stimulating Agents

NOTE: These drugs must be obtained and billed through our specialty pharmacy vendor, Briova. Please see Growth Stimulating Agents Prior Authorization/Enrollment Form for instructions.

GROWTH HORMONE

► See next pages for growth hormone products.

LENGTH OF AUTHORIZATION: Up to 1 year

CRITERIA FOR APPROVAL:

PEDIATRIC:

1) The patient must have one of the following indications for growth hormone:

- Turner syndrome confirmed by genetic testing.
 - Prader-Willi Syndrome confirmed by genetic testing.
 - Growth deficiency due to chronic renal failure.
 - Patient who is Small for Gestational Age (SGA) due to Intrauterine Growth Retardation (IUGR) and catch up growth not achieved by age 2 (Birth weight less than 2500g at gestational age of <37 weeks or a birth weight or length below the 3rd percentile for gestational age).
- OR
- Pediatric Growth Hormone Deficiency confirmed by results of two provocative growth hormone stimulation tests (insulin, arginine, levodopa, propranolol, clonidine, or glucagon) showing results (peak level) <10ng/ml.

2) The requested medication must be prescribed by a pediatric endocrinologist (or pediatric nephrologist if prescribed for growth deficiency due to chronic renal failure).

3) Confirmation of non-closure of epiphyseal plates (x-ray determining bone age) must be provided for females > age 12 and males > age 14.

4) Initial requests can be approved for 6 months. Subsequent requests can be approved for up to 1 year with documentation of positive response to treatment with growth hormone.

ADULT:

The patient must have one of the following indications for growth hormone:

- Panhypopituitarism due to surgical or radiological eradication of the pituitary.
- OR
- Adult Growth Hormone Deficiency confirmed by one growth hormone stimulation test (insulin, arginine, levodopa, propranolol, clonidine, or glucagon) showing results (peak level) <5ng/ml. Growth hormone deficient children must be retested after completion of growth.

LIMITATIONS:

Coverage of Growth Hormone products will not be approved for patients who have Idiopathic Short Stature.

GENOTROPIN[®], HUMATROPE[®], NUTROPIN[®], NUTROPIN[®] AQ, OMNITROPE[®], SAIZEN[®], TEV-TROPIN[®]

- The patient has a documented side effect, allergy, or treatment failure to Norditropin

➤ **INCRELEX®**

INDICATION: Long-term treatment of growth failure in children with severe primary insulin-like growth factor-1 deficiency (Primary IGFD)

LENGTH OF AUTHORIZATION: 6 months

CRITERIA FOR APPROVAL:

- Member has growth hormone gene deletion AND neutralizing antibodies to growth hormone, OR primary insulin-like growth factor (IGF-1) deficiency (IGFD), defined by the following:
 - Height standard deviation score < -3 AND
 - Basal IGF-1 standard deviation score < -3 AND
 - Normal or elevated growth hormone level
- Member is ≥ 2 years old (safety and efficacy has not been established in patients younger than 2), AND
- Member has open epiphysis, AND
- Member is under the care of an endocrinologist or other specialist trained to diagnose and treat growth disorders.

➤ **SEROSTIM®**

INDICATION: AIDS associated wasting/anorexia

LENGTH OF AUTHORIZATION: 6 months

CRITERIA FOR APPROVAL:

- A diagnosis of AIDS associated wasting/anorexia

➤ **ZORBTIVE®**

INDICATION: Short Bowel Syndrome

LENGTH OF AUTHORIZATION: 4 weeks

CRITERIA FOR APPROVAL:

- A diagnosis of short bowel syndrome
- Concomitant use of specialized nutritional support (specialty TPN)
- Prescription by gastroenterologist (specialist)

DOCUMENTATION:

- ✓ Document information for the indication of the use of these medications on a **Growth Stimulating Agents Prior Authorization/Enrollment Form.**

Hepatitis C Medications

NOTE: These drugs must be obtained and billed through our specialty pharmacy vendor, Brioia. Please see Hepatitis C Medications (Peg-Interferon/Ribavirin) Prior Authorization/Enrollment Form and Hepatitis C Protease Inhibitors Prior Authorization/Enrollment Form for instructions.

LENGTH OF AUTHORIZATION: Ribavirin/Peg-interferon = 48 weeks; Incivek = 12 weeks; Victrelis = 44 weeks (Brioia Specialty will monitor lab results and determine final duration of therapy)

CRITERIA FOR APPROVAL:

Preferred Ribavirin and Pegasys

- The diagnosis or indication for the requested medication is Hepatitis.
- AND
- The prescriber is, or has consulted with, a Hepatologist, Gastroenterologist, or Infectious Disease Specialist.

Non-preferred Ribavirin Brands/Strengths

- The diagnosis or indication for the requested medication is Hepatitis.
- AND
- The patient has a documented intolerance to generic ribavirin 200 mg tablets or capsules.

Rebetol® Oral Solution

- The diagnosis or indication for the requested medication is Hepatitis.
- AND
- The patient is unable to use generic ribavirin 200 mg tablets or capsules

Peg-Intron® or Infergen® or Intron-A®

- The diagnosis or indication for the requested medication is Hepatitis.
- AND
- The patient has had a documented side effect, allergy, or treatment failure to Pegasys®.

Incivek® (telaprevir)

- The diagnosis or indication for the requested medication is hepatitis C (genotype 1) infection and the patient has already been started and stabilized on the requested medication in combination with pegylated interferon and ribavirin. (Note: samples are not considered adequate justification for started and stabilized). (Note: total duration of therapy should not exceed 12 weeks)
- OR
- The patient has a confirmed diagnosis of chronic hepatitis C (genotype 1) infection
- AND
- The patient is ≥ 18 years of age
- AND
- The prescriber is, or has consulted with, a Hepatologist, Gastroenterologist, or Infectious Disease Specialist.
- AND
- The patient has not previously failed therapy with Incivek or Victrelis
- AND
- The requested medication will be used in combination with pegylated interferon and ribavirin.
- AND
- If the patient has HIV co-infection, the patient will not be receiving antiretroviral therapy (ART) in combination with the requested medication*

*Note: Requests not meeting these criteria will be reviewed on a case-by-case basis for potential drug-drug interactions with antiretroviral therapy.

Victrelis® (boceprevir)

- The diagnosis or indication for the requested medication is hepatitis C (genotype 1) infection and the patient has already been started and stabilized on the requested medication in combination with pegylated interferon and ribavirin. (Note: samples are not considered adequate justification for started and stabilized). (Note: total duration of therapy should not exceed 44 weeks)

OR

- The patient is \geq 18 years of age

AND

- The patient has a confirmed diagnosis of chronic hepatitis C (genotype 1) infection

AND

- The prescriber is, or has consulted with, a Hepatologist, Gastroenterologist, or Infectious Disease Specialist.

AND

- The patient has not previously failed therapy with Incivek or Victrelis

AND

- The patient has or will be pre-treated with ribavirin and peginterferon therapy for at least 4 weeks prior to initiating Victrelis

AND

- The requested medication will be used in combination with pegylated interferon and ribavirin.

AND

- If the patient has HIV co-infection, the patient will not be receiving antiretroviral therapy (ART) in combination with the requested medication*

*Note: Requests not meeting these criteria will be reviewed on a case-by-case basis for potential drug-drug interactions with antiretroviral therapy.

DOCUMENTATION:

- ✓ Document information for the indication of the use of these medications on a **Hepatitis C Medications (Peg-Interferon/Ribavirin) Prior Authorization/Patient Enrollment Form** and **Hepatitis C Protease Inhibitors Prior Authorization/Patient Enrollment Form**.

Hereditary Angioedema Medications

NOTE: *Firazyr® must be obtained and billed through our specialty pharmacy vendor, Briova.*

LENGTH OF AUTHORIZATION: initial approval 6 months, subsequent approval 1 year

CRITERIA FOR APPROVAL:

Berinert:

- The diagnosis or indication is **treatment** of an acute Hereditary Angioedema (HAE) attack. (Approval may be granted so that 2 doses may be kept on hand).

Cinryze:

- The diagnosis or indication is **prophylaxis** of Hereditary Angioedema (HAE) attacks.
- AND**
- The patient has had a documented side effect, allergy, treatment failure or a contraindication to androgen therapy (i.e. danazol).
- OR**
- The medication is to be used for the **treatment** of an acute Hereditary Angioedema (HAE) attack.

Firazyr:

- The diagnosis or indication is **treatment** of an acute Hereditary Angioedema (HAE) attack.

Kalbitor:

- The diagnosis or indication is **treatment** of an acute Hereditary Angioedema (HAE) attack. (Approval may be granted so that 2 doses may be kept on hand).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Lipotropics: Bile Acid Sequestrants

LENGTH OF AUTHORIZATION: 3 years

CRITERIA FOR APPROVAL:

Questran^{®*}

- The patient has had a documented intolerance to cholestyramine powder.

Questran Light^{®*}

- The patient has had a documented intolerance to cholestyramine light powder.

Colestid^{®*}

- The patient has had a documented intolerance to colestipol tablets or granules.

Welchol[®]

- If being prescribed for lipid reduction, the patient has had a documented side effect, allergy, or treatment failure to cholestyramine and colestipol.

OR

- If being prescribed for additional improved glycemic control, the patient must have been unable to obtain a satisfactory hemoglobin A1C reduction with metformin and one other oral anti-diabetic agent.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Lipotropics: Bile Acid Sequestrants		<i>Length of Authorization: 3 years</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA		
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
CHOLESTYRAMINE† powder (compare to Questran [®]) CHOLESTYRAMINE LIGHT† powder (compare to Questran Light [®]) PREVALITE† powder (cholestyramine light)	Questran ^{®*} powder (cholestyramine) Questran Light ^{®*} powder (cholestyramine light)	
COLESTIPOL† tablets, granules (compare to Colestid [®])	Colestid ^{®*} tablets, granules (colestipol) Welchol [®] (colesevelam)	

Lipotropics: Fibric Acid Derivatives

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Lopid^{®*}

- The patient has had a documented intolerance to generic gemfibrozil.

Tricor[®], TriLipix[®]

- The patient has been started and stabilized on either Tricor[®] or TriLipix[®] (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient is taking a statin concurrently.

OR

- The patient has had a documented side effect, allergy, or treatment failure to gemfibrozil.

Antara[®], fenofibrate, fenofibrate micronized, fenofibric acid, Fenoglide[®], Fibricor[®], Lipofen[®], Lofibra[®] and Triglide[®]

- The patient is taking a statin concurrently and has had a documented side effect, allergy, or treatment failure with Tricor[®] or TriLipix[®]. (If a product has an AB rated generic, there must have been a trial with the generic formulation.)

OR

- The patient has had a documented side effect, allergy, or treatment failure to gemfibrozil and Tricor[®] or TriLipix[®]. (If a product has an AB rated generic, there must have been a trial with the generic formulation.)

fenofibrate nanocrystallized

- The patient is taking a statin concurrently,

OR

- The patient has had a documented side effect, allergy, or treatment failure to gemfibrozil.

AND

The patient has had a documented intolerance with brand Tricor[®].

(Note regarding fibrates: For patients receiving statin therapy, fenofibrate appears less likely to increase statin levels and thus may represent a safer choice than gemfibrozil for coadministration in this group of patients - *Am J Med* 2004;116:408-416)

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Lipotropics: Fibric Acid Derivatives

Length of Authorization: 1 year.

Key: † Generic product, *Indicates generic equivalent is available without a PA

Lipotropics: Statins

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

HIGH POTENCY STATINS

Atorvastatin, Crestor[®], Lipitor

- The patient has had a documented side effect, allergy, or contraindication to generic simvastatin.

OR

- The patient has had an inadequate response to a six week trial of simvastatin 40 mg OR requires LDL reduction of $\geq 45\%$

AND

- If the request is for Lipitor, the patient has had a documented intolerance to generic atorvastatin.

Livalo[®]

- The patient has had a documented side effect, allergy, inadequate response or contraindication to generic simvastatin.

AND

- The patient has had a documented side effect, allergy or inadequate response to a six week trial of atorvastatin or at least 20 mg per day of Crestor[®]

Simvastatin 80 mg Tablets

- The patient has been taking this dose for 12 or more months without evidence of muscle toxicity.

Zocor[®]

- The patient has had documented side effect, allergy, or treatment failure to BOTH generic simvastatin and atorvastatin and also Crestor[®]

OTHER STATINS

Altoprev[®], fluvastatin, Lescol[®], Lescol[®] XL, Mevacor[®], Pravachol[®]

- The patient has had a documented side effect, allergy, or treatment failure to BOTH generic lovastatin and pravastatin.

AND

- If the request is for Lescol, the patient has had a documented intolerance to generic fluvastatin.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Lescol® XL (fluvastatin XL) (QL = 1 tablet/day)

Mevacor®* (lovastatin) (QL = 1 tab/day (10 & 20 mg), 2 tabs/day (40 mg))

Pravachol®* (pravastatin) (QL = 1 tab/day)

Note: Please refer to "Lipotropics: Miscellaneous/Combinations" for statin combinations and Lovaza®.

Lipotropics: Miscellaneous/Combinations

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Lovaza[®]

- The patient has been started and stabilized on this medication (Note: samples are not considered adequate justification for stabilization.)
- OR**
- The patient has triglyceride levels > 500 mg/dL
- AND**
- The patient has a documented contraindication, side effect, allergy, or treatment failure to a fibric acid derivative and niacin.

Amlodipine/atorvastatin, Caduet[®]

- The prescriber must provide a clinically valid reason for the use of the requested medication. For approval of Caduet, the patient must have also had a documented intolerance to the generic equivalent.

Advicor[®]

- The patient is unable to take the individual drug components separately.

Juvisync[®]

- The patient has had a documented side effect, allergy, contraindication or treatment failure with metformin.
- AND**
- The patient has been started and stabilized on Januvia and simvastatin combination therapy as individual agents.

Vytorin[®]

- The patient has had an inadequate response to atorvastatin or Crestor[®].
- AND**
- If the request is for Vytorin 10/80, the patient has been taking this dose for 12 or more months without evidence of muscle toxicity.

Zetia[®]

- The patient has a documented side effect, allergy or contraindication (eg. drug interaction) to a statin.
- OR**
- The patient has a diagnosis of homozygous sitosterolemia.
- OR**
- The patient has had an inadequate response to atorvastatin or Crestor[®].

± Recommended to be used only when goal is not met in patients previously having experience with any niacin derivative or statin.

Management of Mental Health Medications

1. Patients on certain existing non-preferred mental health drugs as of 01/01/06 were “grandparented” and their mental health drug use was not subject to the Preferred Drug List (PDL).

Patients of any age who were using:

- antipsychotics,
- antidepressants,
- mood stabilizers,
- and/or CNS Stimulants/ADD/ADHD drugs

were grandfathered so as not to risk destabilization. Changes in therapy or lapses in therapy of greater than 4 (four) months resulted in the application of the PDL.

Use of sedative hypnotics and/or anxiolytics by patients using antipsychotics, antidepressants, mood stabilizers, and/or CNS Stimulants/ADD/ADHD drugs was also grandfathered until such time as there was a change or lapse in the sedative hypnotic/anxiolytic treatment of greater than 4(four) months. If patients end all antipsychotics, antidepressants, mood stabilizers, or CNS Stimulants/ADD/ADHD drug treatment but continue sedative hypnotic or anxiolytic treatment, non-preferred sedative hypnotic or anxiolytic drugs will not be subject to PA for one year from the end of the antipsychotics, antidepressants, mood stabilizers, or CNS Stimulants/ADD/ADHD drug treatment unless there is a change or lapse in the sedative hypnotic/anxiolytic treatment of greater than 4(four) months. In either case, if there is a change or lapse in sedative hypnotic/anxiolytic therapy of greater than 4(four) months, the PDL will apply.

2. The PDL applies to new patients, patients who are prescribed a change in therapy, and patients who have had a lapse in therapy of greater than 4 (four) months.

The PDL represents a clinically effective array of mental health products that are cost effective. The classes include:

- SSRI Antidepressants
- SNRI Antidepressants
- Miscellaneous Antidepressants
- Tricyclic and MAOI Antidepressants
- Atypical Antipsychotics
- Typical Antipsychotics
- Mood Stabilizers (including some anticonvulsants)
- CNS Stimulants/ADD/ADHD Drugs (Antihyperkinesia medications)
- Sedative Hypnotics
- Anxiolytics

3. The PDL also may include FDA maximum recommended adult daily doses.

With some exceptions, prior authorization will be required if FDA maximum recommended daily doses are exceeded by 25%. These FDA maximum recommended daily doses were not applied to current patients on 01/01/06. As part of drug utilization review (DUR) activities, prescribers may be contacted by mail where patients are prescribed quantities above these doses.

4. The prescribing of brands when generic equivalents are available will require prior authorization.

Patients on current therapies (brand where generic equivalent available) were allowed to continue these drugs without prior authorization until October 2, 2006. Prescribers were contacted by mail and provided with lists to assist them in identifying patients who might readily transition to a preferred generic and those who would require a PA. New patients and patients who are prescribed a change in therapy require a PA for the use of a branded drug when a generic equivalent is available. A prior authorization granted for a brand name medication when a generic equivalent exists will expire after one year after which a new PA must be obtained for continuation of the brand.

5. Beginning 12/11/2012, all atypical antipsychotic medications for children (< 18 years old) require prior authorization which will need to be renewed annually to give prescribers an opportunity to evaluate the need for ongoing therapy.

Miscellaneous: Benlysta® (for Systemic Lupus Erythematosus (SLE))

LENGTH OF AUTHORIZATION: initial approval 2 months, subsequent approval 1 year

CLINICAL CONSIDERATIONS:

How supplied: 120 mg or 400 mg single use vials for injection

Dose: initial, 10 mg/kg at 2-week intervals for first 3 doses; maintenance, 10 mg/kg at 4-week intervals

CRITERIA FOR APPROVAL:

- The diagnosis or indication is active systemic lupus erythematosus (SLE)
AND
- The patient is positive for autoantibodies (anti-nuclear antibody (ANA) and/or anti-double-stranded DNA (anti-dsDNA)).
AND
- The patient has had a documented inadequate response or intolerance to at least TWO of the following agents: NSAIDs, hydroxychloroquine, prednisone, azathioprine, methotrexate, mycophenolate.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a Benlysta® on a **General Prior Authorization Request Form.**
- ✓ All requests for Benlysta® (belimumab) (whether billed through the pharmacy or medical benefit (J0490)) require Prior Authorization through the Catamaran Clinical Call Center.

Note: The efficacy of Benlysta® has not been evaluated in patients with severe active lupus nephritis or severe active central nervous system lupus. Benlysta® has not been studied in combination with other biologics or intravenous cyclophosphamide. Use of Benlysta® is not recommended in these situations.

Miscellaneous: Benlysta®	
<i>Length of Authorization: initial approval 2 months, subsequent approval 1 year</i>	
NO PA REQUIRED	PA REQUIRED
All products require PA.	Benlysta® (belimumab) Vials Maximum days supply = 28 days

Miscellaneous: Carbaglu®

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

- The diagnosis or indication for the requested medication is hyperammonemia due to N-acetylglutamate synthetase (NAGS) deficiency

AND

- The prescriber is a specialist in metabolic disorders (e.g., medical geneticist) or prescriber is in consultation with a specialist

Note: after preliminary review by the Clinical Call Center, the request will be forwarded to the DVHA Medical Director for final approval.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Miscellaneous: Carbaglu®		<i>Length of Authorization: 1 year</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Carbaglu® dispersible tablets (carglumic acid) <i>(Maximum days supply per fill = 14 days)</i>	

Miscellaneous: Elaprase® (Hunter's Syndrome Injectable)

LENGTH OF AUTHORIZATION: 1 year

CLINICAL CONSIDERATIONS:

How supplied: 6 mg glass vials (one vial per package)

Dose: 0.5 mg/kg every week

CRITERIA FOR APPROVAL:

- The diagnosis or indication for the requested medication is Hunter's Syndrome.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of Elaprase® on a **General Prior Authorization Request Form.**

J code (J1743) will NOT be accepted in the Medical Benefit.

Miscellaneous; Elaprase®		<i>Length of Authorization: 1 year</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Elaprase® (idursulfase) (<i>QL = calculated weekly dose</i>)	

Miscellaneous: Glycopyrrolate

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Cuvposa®:

- The diagnosis or indication for the requested medication is Sialorrhea or a neurologic condition associated with excessive drooling (e.g. cerebral palsy, mental retardation, Parkinson’s disease).

AND

- The dose cannot be obtained from the tablet formulation.

AND

- (For patients >18 years of age) The patient has had a documented side effect, allergy, treatment failure, or a contraindication to scopolamine patches.

Robinul®, Robinul Forte®:

- The patient has had a documented intolerance to generic glycopyrrolate.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Miscellaneous: Glycopyrrolate		<i>Length of Authorization: 1 year</i>
NO PA REQUIRED	PA REQUIRED	
GLYCOPYRROLATE 1 mg, 2 mg tablets (compare to Robinul®, Robinul Forte®)	Cuvposa® oral solution (glycopyrrolate)* Maximum days supply per fill is 30 days Robinul® 1 mg tablet (glycopyrrolate) Robinul® Forte 2 mg tablet (glycopyrrolate)	

Miscellaneous: Korlym®

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

- Patient is ≥18 years of age
AND
- Patient has a diagnosis of endogenous Cushing’s syndrome
AND
- Patient is diagnosed with type 2 diabetes mellitus or glucose intolerance
AND
- Patient has hyperglycemia secondary to hypercortisolism
AND
- Patient has failed or is not a candidate for surgery
AND
- Patient has a documented side effect, allergy, treatment failure or contraindication to at least 2 adrenolytic medications (eg. ketoconazole, etomidate)
AND
- Patient does not have any of the following contraindications to Korlym:
 - Pregnancy (pregnancy must be excluded before the initiation of therapy or if treatment is interrupted for >14 days in females of reproductive potential. Nonhormonal contraceptives should be used during and one month after stopping treatment in all women of reproductive potential)
OR
 - Patient requires concomitant treatment with systemic corticosteroids for serious medical conditions/illnesses (immunosuppression for organ transplant)
OR
 - Patient has a history of unexplained vaginal bleeding
OR
 - Patient has endometrial hyperplasia with atypia or endometrial carcinoma
OR
 - Patient is concomitantly taking simvastatin, lovastatin, or a CYP3A substrate with a narrow therapeutic index (e.g., cyclosporine, dihydroergotamine, ergotamine, fentanyl, pimozide, quinidine, sirolimus, or tacrolimus)

Note: after preliminary review by the Clinical Call Center, the request will be forwarded to the DVHA Medical Director for final approval.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Miscellaneous: Korlym®		<i>Length of Authorization: 1 year</i>
NO PA REQUIRED		PA REQUIRED
All products require PA.		Korlym® tablets (mifepristone) <i>Quantity limit = 4 tablets/day</i>

Miscellaneous: Nuedexta®

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

- The diagnosis or indication is pseudobulbar affect (PBA) secondary to amyotrophic lateral sclerosis (ALS) or multiple sclerosis (MS)

AND

- The patient does not have any contraindications to use:

Concomitant use with quinidine, quinine, or mefloquine
History of quinidine, quinine or mefloquine-induced thrombocytopenia, hepatitis
MAOI use within 14 days of starting Nuedexta
Prolonged QT interval, congenital long QT syndrome, Torsades de Pointes, or heart failure
Complete atrioventricular (AV) block or patients at high risk for AV block
Concomitant use with drugs that prolong QT interval and are metabolized by CYP2D6 (eg. thioridazine, pimozide)

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Miscellaneous: Nuedexta®		<i>Length of Authorization: 1 year</i>
NO PA REQUIRED		PA REQUIRED
All products require PA.		Nuedexta® capsules (dextromethorphan/quinidine) <i>Quantity limit = 2 capsules/day</i>

Miscellaneous: Samsca® (for Hyponatremia)

LENGTH OF AUTHORIZATION: 1 month

CLINICAL CONSIDERATIONS:

How supplied: 15 or 30 mg tablets

Dose: Initial, 15 mg once daily;

After at least 24 hours, titrate dose up to 30 mg once daily to a maximum of 60 mg once daily to achieve desired sodium level;

Maximum dose, 60 mg once daily

Patients should be in a hospital for initiation and reinitiation of tolvaptan therapy to evaluate its therapeutic response. Doses can be administered without regard to meals. Avoid fluid restriction during the first 24 hours of therapy. Patients taking tolvaptan should be advised to continue ingesting fluids in response to thirst.

Initiate and Reinitiate in a Hospital and Monitor Serum Sodium

Samsca® should be initiated and reinitiated in patients only in a hospital where serum sodium can be monitored closely. Too rapid correction of hyponatremia (e.g., >12 mEq/L/24 hours) can cause osmotic demyelination resulting in dysarthria, mutism, dysphagia, lethargy, affective changes, spastic quadriparesis, seizures, coma and death. In susceptible patients, including those with malnutrition, alcoholism or advanced liver disease, slower rates of correction may be advisable.

CRITERIA FOR APPROVAL:

- The agent is being used for the treatment of euvolemic or hypervolemic hyponatremia
AND
- Despite optimal fluid restriction, the patient's serum sodium < 120 mEq/L or the patient is symptomatic with a serum sodium < 125 mEq/L.
AND
- The treatment will be initiated or is being reinitiated in a hospital setting where serum sodium can be monitored

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Miscellaneous: Samsca®		<i>Length of Authorization: 1 month</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Samsca® tablets (tolvaptan) <i>Quantity limit = 15 mg tablets (1 tablet/day), 30 mg tablets (2 tablets/day)</i> <i>Maximum duration of therapy = 30 days.</i>	

Miscellaneous: Solesta®

LENGTH OF AUTHORIZATION: Up to 2 months

CRITERIA FOR APPROVAL:

- The diagnosis or indication is treatment of fecal incontinence.

AND

- The patient is 18 years of age or older

AND

- The patient has had an inadequate response with conservative therapy, including diet, fiber supplementation, and anti-diarrheal medication

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Miscellaneous: Solesta®		<i>Length of Authorization: Up to 2 months</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Solesta® submucosal injection gel 50 mg/15 ml (Quantity Limit = 4 syringes/28 days)	

Miscellaneous: Soliris® (Paroxysmal Nocturnal Hemoglobinuria Injectable)

LENGTH OF AUTHORIZATION: initial approval 3 months, subsequent approval 1 year

CLINICAL CONSIDERATIONS:

How supplied: 10 mg/mL (30 mL)

Dose: 600 mg IVF every 7 days x 4 weeks, followed by 900 mg IVF 7 days later and 900 mg IVF every 14 days thereafter

CRITERIA FOR APPROVAL:

- The patient has a diagnosis of paroxysmal nocturnal hemoglobinuria documented by flow cytometry.
AND
- The patient has received the meningococcal vaccine prior to therapy.
AND
- The request is for a quantity limit of 20 vials (of 300 mg/30 mL) total with initial approval duration of 3 months and a quantity limit of 6 vials per 28 days with recertification approvals.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.
- ✓ All requests for eculizumab (whether billed through the pharmacy or medical benefit (J1300)) require Prior Authorization through the Catamaran Clinical Call Center.

Miscellaneous: Soliris®

Length of Authorization: initial approval 3months, subsequent approval 1 year

NO PA REQUIRED

All products require PA.

PA REQUIRED

Soliris® (eculizumab) (*Quantity Limit = 20 vials total/12 weeks initially; 6 vials/28 days subsequently*)

Miscellaneous: Somatuline® (Acromegaly Injectable)

LENGTH OF AUTHORIZATION: 1 year

CLINICAL CONSIDERATIONS:

How supplied: 60, 90 or 120 mg pre-filled syringes

Dose: initial dose is 90 mg deep subcutaneous every 4 weeks x 3 months, then dose adjusted to between 60 mg and 120 mg every 4 weeks based on lab values and symptoms

CRITERIA FOR APPROVAL:

- The diagnosis or indication for the requested medication is Acromegaly.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

This drug must be billed through the DVHA POS prescription processing system using NDC values.

J code or other code will NOT be accepted for processing through medical benefit.

Miscellaneous: Somatuline®		<i>Length of Authorization: 1 year</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Somatuline® Depot Injection (lanreotide) (QL = 0.2 ml/28 days (60 mg syringe), 0.3 ml/28 days (90 mg syringe) and 0.5 ml/28 days (120 mg syringe))	

Miscellaneous: Tranexamic Acid

LENGTH OF AUTHORIZATION: 1 year

CLINICAL CONSIDERATIONS:

Dose: Tranexamic Acid is dosed as two 650 mg tablets three times daily for up to 5 days during menstruation.

CRITERIA FOR APPROVAL:

- The diagnosis or indication is clinically significant heavy menstrual bleeding
- AND**
- The patient has been started and stabilized on oral tranexamic acid within the previous 360 days
- OR**
- The patient does not have a contraindication to therapy with oral tranexamic acid (i.e., active thrombotic disease, history of thrombosis/thromboembolism, or an intrinsic risk of thrombosis/thromboembolism), and if oral tranexamic acid is to be used concomitantly with an estrogen containing hormonal contraceptive product, the risks of combination therapy have been discussed with the patient.
- AND**
- The patient has had a documented side effect, allergy, contraindication, or an inadequate response with at least one oral contraceptive or progestin containing product despite an adequate trial of at least 90 days, or a rationale for why these products cannot be used (e.g. actively attempting to conceive).
- AND**
- The patient has had a documented side effect, allergy, contraindication, or an inadequate response with at least one regular scheduled (not PRN) NSAID or a rationale for why these products cannot be used (e.g. actively attempting to conceive).
- AND**
- If the request is for brand Lysteda, the patient has had a documented intolerance to the generic product.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Miscellaneous: Tranexamic Acid		<i>Length of</i>
<i>Authorization: 1 year</i>		
Key: † Generic product		
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Lysteda® tablets (tranexamic acid) <i>Quantity limit = 30 tablets/28 days</i> tranexamic acid† (compare to Lysteda®) <i>Quantity limit = 30 tablets/28 days</i>	

Miscellaneous: Xenazine® (for Huntington's Disease with chorea)

LENGTH OF AUTHORIZATION: 1 month initially, subsequent approvals up to 1 year

CLINICAL CONSIDERATIONS:

How supplied: 12.5 or 25 mg tablets

Dose: initial dose is 12.5 mg/day increasing by 12.5 mg/day at weekly intervals

CRITERIA FOR APPROVAL:

- The diagnosis or indication for the requested medication is Huntington's disease with chorea.

AND

- Age \geq 18 years.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Miscellaneous: Xenazine®		<i>Length of Authorization: 1 month initially, subsequent approvals up to 1 year</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Xenazine® tablets (tetrabenazine) <i>Quantity limit = 50 mg/day at initial approval (12.5 mg tablets ONLY), up to 100 mg/day at subsequent approvals (12.5 mg or 25 mg tablets)</i> <i>Maximum 1 month supply per fill</i>	

Mood Stabilizers (See also Anticonvulsants)

LENGTH OF AUTHORIZATION: Duration of Need*

CRITERIA FOR APPROVAL:

Lithobid®:

- The patient has had a documented side effect, allergy, or treatment failure with the generic equivalent of the requested medication.

Equetro®:

- The patient has had a documented side effect, allergy, or treatment failure with a carbamazepine product from the anticonvulsant therapeutic drug category

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

After a 4-month lapse in use of a non-preferred agent, or if there is a change in therapy, a look-back through claims information will identify the need to re-initiate therapy following the PDL and clinical criteria.

MANAGEMENT OF MENTAL HEALTH DRUGS: See page 180 for a description of the management of mental health drugs.

Mood Stabilizers		<i>Length of authorization: Duration of Need*</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA		
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
LITHIUM CARBONATE† (formerly Eskalith®)	Equetro® (carbamazepine SR)	
LITHIUM CARBONATE SR† (compare to Lithobid®, formerly Eskalith CR®)	Lithobid®* (lithium carbonate SR)	
LITHIUM CITRATE SYRUP†		

* For brand name products with generic equivalents, length of authorization is 1 year.

Mucosal Coating Agents

LENGTH OF AUTHORIZATION: 6 months

CRITERIA FOR APPROVAL:

MuGard

- Patient is receiving radiation and/or chemotherapy.
- AND**
- The patient has had a documented side effect, allergy or treatment failure with at least one oral mucosal coating agent (e.g. aluminum hydroxide suspension, Mylanta[®]) or a topical anesthetic (e.g. viscous lidocaine or diphenhydramine solutions) or combinations of similar agents.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Mucosal Coating Agents		<i>Length of Authorization: 6 months</i>
Key: † Generic product		
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
ALUMINUM HYDROXIDE† (formerly Amphojel [®]) GELCLAIR [®] (povidone sodium hyaluronate glycyrrhetic acid gel) EPISIL [®] (wound barrier) MYLANTA/DIPHENYDRAMINE/LIDOCAINE VISCOUS (aka “Magic Mouthwash”) Or other similar single or combination products	MuGard [®] (mucoadhesive oral wound rinse) (QL = 4 bottles/month)	

Multiple Sclerosis Medications

NOTE: Multiple Sclerosis Self-Injectables (Avonex[®], Betaseron[®], Copaxone[®], Extavia[®] and Rebif[®]) must be obtained and billed through our specialty pharmacy vendor, Briova. Please see Multiple Sclerosis Patient Enrollment/Order Form for instructions. Briova will not be supplying Tysabri[®] at this time – please continue to obtain through your usual supplier. Aubagio[®] and Gilenya[®] must be obtained and billed through our specialty pharmacy vendor, Briova. Please see Aubagio[®] or Gilenya[®] Patient Enrollment/PA Form for instructions. Briova will not be supplying Ampyra[®] at this time.

LENGTH OF AUTHORIZATION: Initial PA of 3 months, and 12 months thereafter if medication is well tolerated. Re-evaluate every 12 months.

CRITERIA FOR APPROVAL:

Ampyra[®]

Patient has a diagnosis of multiple sclerosis.

AND

Patient age \geq 18 years.

Aubagio[®]

Patient is at least 18 years of age or older

AND

Patient has a diagnosis of relapsing forms of multiple sclerosis (relapsing-remitting multiple sclerosis and progressive-relapsing multiple sclerosis)

AND

Patient does not have any of the following contraindications to teriflunomide:

- Severe hepatic impairment
- Current treatment with leflunomide (Arava[®])
- Patients who are pregnant or women of childbearing potential not using reliable contraception

Extavia[®]

Patient has a diagnosis of multiple sclerosis.

AND

The provider provides a clinical reason why Betaseron cannot be prescribed.

Gilenya[®]

Patient has a diagnosis of relapsing multiple sclerosis.

AND

The patient has had a documented side effect, allergy, inadequate response, or contraindication to at least one preferred self-injectable MS drug.

AND

Patient has tolerated first dose under observation for a minimum of 6 hours with hourly pulse and blood pressure measurement and pre and post electrocardiogram.

Tysabri®

Patient has a diagnosis of relapsing multiple sclerosis and has already been stabilized on Tysabri®.

OR

Diagnosis is relapsing multiple sclerosis and the patient has a documented side effect, allergy, treatment failure, or contraindication to at least two preferred drugs.

OR

Diagnosis is relapsing multiple sclerosis and the patient has a documented side effect, allergy, treatment failure, or contraindication to one preferred drug and has tested negative for anti-JCV antibodies.

DOCUMENTATION:

- ✓ Document request for self-injectable medications on the **Multiple Sclerosis Self Injectables Patient Enrollment/Order Form**
- ✓ Document clinically compelling information supporting the choice of Ampyra® or Tysabri® on a **General Prior Authorization Request Form**.
- ✓ Document clinical information for **Aubagio®** or **Gilenya®** on its **Prior Authorization/Patient Enrollment Form**
- ✓ All requests for natalizumab (Tysabri®) (whether billed through the pharmacy or medical benefit (J2323)) require Prior Authorization through the Catamaran Clinical Call Center.

Nutritionals: Enteral

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

EleCare[®], EleCare[®] Jr

- The patient is an infant or child who needs an amino acid-based medical food or who cannot tolerate intact or hydrolyzed protein.
- AND
- The product is being requested for the dietary management of protein maldigestion, malabsorption, severe food allergies, short-bowel syndrome, eosinophilic GI disorders, GI-tract impairment, or other conditions for which an amino acid-based diet is required.

All others:

- Requested nutritional supplement will be administered via tube feeding.
- OR
- Patient has one of the following conditions where feeding is difficult or malabsorption or maldigestion occurs.

AIDS	Cognitive Impairment	Inflammatory Bowel Disease
Cancer	Cystic Fibrosis	Parkinson's
Celiac Disease	Dementia (includes Alzheimer's)	Short Gut
Cerebral Palsy	Developmental Delays	
Chronic Diarrhea	Difficulty with chewing/swallowing food	
- OR
- Patient has experienced unplanned weight loss or is extremely low weight (see further definitions below)
- OR
- Patient has demonstrated nutritional deficiency identified by low serum protein levels (albumin or pre-albumin levels to be provided) (albumin ≤ 3.5 g/dL /pre-albumin ≤ 15 mg/dL)

Unplanned Weight Loss/Low Weight	
Adult	<ul style="list-style-type: none"> • Involuntary loss of ≥ 10 % of body weight within 6 months • Involuntary loss of ≥ 5% of body weight within 1 month • Loss of ≥ 2% of body weight within one week • BMI of ≤ 18.5 kg/m²
Elderly: (≥ 65)	<ul style="list-style-type: none"> • Involuntary loss of ≥ 10 % of body weight within 6 months • Involuntary loss of ≥ 5 % of body weight within 3 months • Loss of ≥ 2 % of body weight within one month • BMI of ≤ 18.5 kg/m²
Children	<ul style="list-style-type: none"> • < 80 % of expected weight-for-height • < 90 % of expected height-for-age • Mid-upper arm circumference/head circumference ratio < 0.25

LIMITATIONS:

Infant formulas are not covered under the pharmacy benefit. Please contact WIC.

DOCUMENTATION:

~NUTRITIONALS ~
 Prior Authorization Request Form

Effective February 2002, Vermont Medicaid established coverage limits and criteria for prior authorization of Nutritional supplements. These limits and criteria are based on concerns about appropriate use and medical necessity. In order for beneficiaries to receive coverage for nutritionals, it will be necessary for the prescriber to telephone or complete and fax this form to Catamaran. Please complete this form in its entirety and sign and date below. Incomplete requests will be returned for additional information.

Submit request via: Fax: 1-866-767-2649 or Phone: 1-800-918-7549

Ophthalmics: Antibiotics

LENGTH OF AUTHORIZATION: duration of therapy requested

CRITERIA FOR APPROVAL:

Aminoglycosides:

- **Single Agent:** The patient has had a documented side effect, allergy or treatment failure with at least ONE preferred ophthalmic aminoglycoside. (If a product has an AB rated generic, there must have also been a trial of the generic formulation)
- **Combination Product:** The patient has had a documented intolerance with generic tobramycin/dexamethasone ophthalmic.

Macrolides:

- The patient has had a documented side effect, allergy or treatment failure with generic erythromycin. (If a product has an AB rated generic, there must have also been a trial of the generic formulation)

Miscellaneous Antibiotics:

- The patient has had a documented side effect, allergy or treatment failure with at least TWO preferred ophthalmic miscellaneous antibiotics. (If a product has an AB rated generic, there must have also been a trial of the generic formulation)

Quinolones:

- The patient has had a documented side effect, allergy or treatment failure with ciprofloxacin or ofloxacin.

AND

- If the request is for Quixin, the patient also has a documented intolerance to generic levofloxacin 0.5 %.

OR

- The request is for Vigamox or Zymar as part of a regimen to prevent postoperative infection in patients receiving any ophthalmologic surgery.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Ophthalmics: Glaucoma Agents / Miotics

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

ALPHA 2 ADRENERGIC AGENTS

- The patient has had a documented side effect, allergy or treatment failure with at least one preferred ophthalmic alpha 2 adrenergic agent. If the request is for brimonidine tartrate 0.15%, the patient must have a documented intolerance of brand name Alphagan P 0.15%.

BETA BLOCKERS

- The patient has had a documented side effect, allergy or treatment failure with at least one preferred ophthalmic beta blocker.

PROSTAGLANDIN INHIBITORS

Lumigan®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The patient has had a documented side effect, allergy or treatment failure with generic latanoprost and Travatan Z.

Zioptan®:

- The patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.)
- OR
- The patient has had a documented side effect, allergy or treatment failure with generic latanoprost and Travatan Z.
- OR
- The patient has a sensitivity to preservatives used in ophthalmic preparations

Xalatan®

- The patient has a documented intolerance to the generic product.
- AND
- The patient has had a documented side effect, allergy or treatment failure with Travatan Z.

CARBONIC ANHYDRASE INHIBITORS

Single Agent:

- The patient has had a documented side effect, allergy or treatment failure with a preferred carbonic anhydrase inhibitor.

Combination Product:

Cosopt®:

- The patient has had a documented intolerance to the generic equivalent product.

Cosopt PF®:

The patient has had a documented intolerance to the preservatives in the generic combination product. **MISCELLANEOUS**

- The patient has had a documented side effect, allergy or treatment failure with a preferred miscellaneous ophthalmic agent. If a product has an AB rated generic, there must have also been a trial of the generic formulation)

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Ophthalmics: Mast Cell Stabilizers

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

- The patient has had a documented side effect, allergy, or treatment failure with generic cromolyn sodium.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Ophthalmics: Mast Cell Stabilizers		<i>Length of Authorization: 1 year</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA		
PREFERRED DRUGS (No PA Required)		PA REQUIRED
CROMOLYN SODIUM † (formerly Crolom [®])		Alocril [®] (nedocromil sodium) Alomide [®] (lodoxamide)

Ophthalmics: Non-Steroidal Anti-inflammatory Drugs (NSAIDs)

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Acuvail®

- The patient has had a documented side effect, allergy, or treatment failure to Acular® or Acular LS®

OR

- The patient has a documented hypersensitivity to the preservative benzalkonium chloride.

Bromday®, Bromfenac, Diclofenac, Nevanac®, Voltaren®, Xibrom®,

- The patient has had a documented side effect, allergy, or treatment failure to Acular® or Acular LS®. In addition, if a product has an AB rated generic, there must have also been a trial of the generic formulation.

Ketorolac 0.4 %/0.5 %

- The patient has had a documented intolerance to brand Acular®/Acular LS® ophthalmic solution.

Ocufen®

- The patient has had a documented intolerance to generic flurbiprofen ophthalmic solution.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Ophthalmics: NSAIDs		<i>Length of Authorization: 1 year</i>

Otic: Anti-Infectives

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Ciprofloxacin 0.2%

- The patient has a documented side effect, allergy, or treatment failure to one of the following: any generic neomycin/polymyxin B/hydrocortisone product, Ciprodex[®] otic suspension, or generic ofloxacin otic solution.

Cipro-HC[®], Coly-Mycin S[®], Cortisporin TC[®]

- The patient has had a documented side effect, allergy, or treatment failure to neomycin/polymyxin B sulfate/hydrocortisone and one other preferred product.

Cortisporin[®] Otic:

- The patient has had a documented intolerance to the generic product.

Acetasol HC, Acetic Acid/Hydrocortisone[†], Auralgan[®], Myoxin, Otic Care[®], Otic Edge[®], PR Otic[®], Treagan[®], TriOxin[®], Zinotic[®]/Zinotic ES[®] :

- The patient has had a documented side effect, allergy, or treatment failure to at least TWO preferred otic anti-infectives.

Vosol HC[®]:

- The patient has had a documented side effect, allergy, or treatment failure to at least TWO preferred otic anti-infectives. In addition, the patient has had a documented intolerance to a generic acetic acid/hydrocortisone product.

LIMITATION:

Cetraxal no longer covered due to Federal Rebate not offered.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Over-theCounter (OTC) Drug Class Coverage

Managed on Preferred Drug List (PDL) Refer to PDL categories listed below for details	Limited to Generics Only	Class Not Covered
Anti-diabetics: Insulin	Analgesics, Oral	Alternative Medicines
Analgesics: NSAIDs	Antacids	Analgesics - Topical
Cough and Cold Preparations	Antidiarrheals	Anesthetics - Local, Topical & Oral
Acne Drugs: Topical Anti-Infectives	Antiemetics	Antiflatulents
Dermatological Agents: Antivirals: Topical	Anytipruritics - Topical	Antihistamines -Topical
Dermatological Agents: Corticosteroids	Antiseptics, topical (Chlorine/Iodine)	Anti-infectives-Throat
Dermatological Agents: Antifungals: Topical	Decongestants, Nasal & Oral	Anti-Obesity Agents (Alli®)
Dermatological Agents: Antibiotics: Topical	Digestive Enzymes (example; Acidophilus)	Antiseborrheic Products
Dermatological Agents: Scabicides and Pediculocides	Emollient/Keratolytic/Antimitotic Agents	Antiseptics - Mouth/Throat
Diabetic Testing Supplies	Fluoride Dental Products	Antiseptics & Disinfectives
Gastrointestinals: Histamine-2 Receptor Antagonists	Glucosamine-Chondroitin	Bulk Chemicals
Gastrointestinals: Proton Pump Inhibitors	Hematopoietic Agents - Folic Acid/Folates	Charcoal Antidote
Nutritionals, Oral Liquid	Iron Preparations - Ferrous Sulfate/Ferrous Gluconate	Contact Lens Solution
Ophthalmics: Antihistamines	Laxatives	Depigmenting Agents
Pulmonary: Antihistamines: 1 st Generation	Melatonin (as a Single Agent only)	Hair Growth Agents
Pulmonary: Antihistamines: 2 nd Generation	Minerals	Hematopoietic Agents - Cobalamins & Mixtures
Smoking Cessation Therapies	Calcium	Homeopathic Products
Vitamins: Prenatal Vitamins	Magnesium/Magnesium SR (brand Mag Tab SR® OK)	Infant Foods (refer to WIC)
	Sodium	Liniments
	Ophthalmics	Minerals
	Artificial Tears and Lubricants	Manganese
	Decongestants	Potassium (OTC)
	Hyperosmolar Products	Trace Minerals
	Oral Electrolyte Solution	Zinc
	Otic Agents - Miscellaneous	Mouthwashes
	Proteins/Amino Acids	Nutritional Substances, Miscellaneous
	Rectal Local Anesthetics	Nutritional Substitutes - Sweeteners
	Sleep Aids	Pigmenting Agents
	Tar Products	Scar Treatment Products
	Vaginal Anti-infectives	Shampoos
	Vitamins	Skin Cleansers
	Multiple Vitamins with Minerals	Skin Protectants
	Multivitamins (see next line)	Soaps
	(Aquadek®, Source CF® and Vitamax® brands covered)	Sunscreens
	Pediatric Vitamins	Throat Lozenges
	Vitamin B Complex, B1, B2, B3, B5, B6, B12 (some strengths)	Topicals, Miscellaneous
	Vitamin D	Vitamins
		Vitamin A
		B-Complex with Minerals, B7
		Bioflavonoids
		Biotin
		Vitamin C

Parkinson's Medications

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Sinemet[®], Sinemet[®] CR, Mirapex[®], Parcopa[®], Parlodel[®], Requip[®], Eldepryl[®]

- The patient has had a documented intolerance to the generic product.

Amantadine tablets

- The patient has had a documented intolerance to generic amantadine capsules.

Azilect[®]

- The diagnosis or indication is Parkinson's disease.
- AND
- The patient has had a documented side effect, allergy, or treatment failure with selegiline.
- AND
- The dose requested does not exceed 1 mg/day

carbidopa/levodopa/entacapone

- The patient has had a documented intolerance to brand Stalevo.

Mirapex ER[®], Requip XL[®], ropinirole XL

- The diagnosis or indication is Parkinson's disease. Requests will not be approved for Restless Leg Syndrome (RLS)
- AND
- The patient has had an inadequate response (i.e. wearing off effect or "off" time) with the immediate release product.
- OR
- The patient has not been able to be adherent to a three times daily dosing schedule of the immediate release release product resulting in a significant clinical impact.
- AND
- If the requested product has an AB rated generic, the patient has a documented intolerance to the generic product.

Neupro[®]:

- The patient is ≥ 18 years of age
- AND
- The patient has a diagnosis of Parkinson's disease.
- AND
- The patient has had a documented side effect, allergy, contraindication or treatment failure to generic immediate release ropinirole or pramipexole AND ropinirole XL or Mirapex ER[®].
- OR
- The prescriber provides medical necessity for the transdermal formulation (eg. swallowing disorder or difficulty taking oral medications).

Tasmar[®]

- The diagnosis or indication is Parkinson's disease.
- AND
- The patient has had a documented side effect, allergy, or treatment failure with Comtan[®].

Zelapar[®]

- The diagnosis or indication is Parkinson's disease.
- AND
- The patient is on current therapy with levodopa/carbidopa.
- AND

- Medical necessity for disintegrating tablet administration is provided (i.e. inability to swallow tablets or drug interaction with oral selegiline).
- AND**
- The dose requested does not exceed 2.5 mg/day.

LIMITATIONS:

To prevent the use of amantadine in influenza treatment/prophylaxis, days supply ≤ 10 days will require PA.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Phosphodiesterase-4 (PDE-4) Inhibitor Medications

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

- The indication for the requested medication is treatment to reduce the risk of COPD exacerbations in patients with severe COPD associated with chronic bronchitis and a history of exacerbations.
- AND**
- The patient has had a documented side effect, allergy, treatment failure, or a contraindication to at least one inhaled long-acting anticholinergic AND at least one inhaled long-acting beta-agonist.
- AND**
- The patient has had a documented side effect, allergy, treatment failure, or a contraindication to at least one inhaled corticosteroid.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

Phosphodiesterase-4 (PDE-4) Inhibitors		<i>Length of Authorization: 1 year</i>
NO PA REQUIRED	PA REQUIRED	
All products require PA.	Daliresp [®] tablet (roflumilast) <i>Quantity limit = 1 tablet/day</i>	

Phosphodiesterase-5 (PDE-5) Inhibitor Medications

Effective 7/1/06, phosphodiesterase-5 (PDE-5) inhibitors are no longer a covered benefit for all Vermont Pharmacy Programs for the treatment of erectile dysfunction. This change is resultant from changes set into effect on January 1, 2006 and as detailed in Section 1903(i)(21)(K) of the Social Security Act (the Act), precluding Medicaid Federal Funding for outpatient drugs used for the treatment of sexual or erectile dysfunction. Sildenafil will remain available for coverage via prior authorization for the treatment of Pulmonary Arterial Hypertension.

LENGTH OF AUTHORIZATION: Revatio IV: Date of service

All Others: 1 year

CRITERIA FOR APPROVAL:

Adcirca[®] (tadalafil) 20 mg, Revatio[®] (sildenafil citrate) 20 mg, sildenafil citrate 20 mg:

- Clinical diagnosis of pulmonary hypertension
AND
- No concomitant use of organic nitrate-containing products
AND
- For approval of Revatio, the patient has a documented intolerance to the generic equivalent.
AND
- For approval of Revatio or sildenafil citrate 20 mg, the patient is 18 years of age or older (FDA recommendation 08/30/2012)

Viagra[®] (sildenafil citrate) 25 mg, 50 mg, and 100 mg:

- Clinical diagnosis of pulmonary hypertension
AND
- No concomitant use of organic nitrate-containing products
AND
- Inadequate response to Revatio (sildenafil) 20 mg or currently maintained on a sildenafil dose of 25 mg TID or higher

Revatio IV[®]

- Clinical diagnosis of pulmonary hypertension
AND
- No concomitant use of organic nitrate-containing products
AND
- The patient has a requirement for an injectable dosage form.
AND
- Arrangements have been made for IV bolus administration outside of an inpatient hospital setting.

DOCUMENTATION:

- ✓ Document clinical information supporting the choice of agent on a **General Prior Authorization Request Form**.

Phosphodiesterase 5 (PDE-5) Inhibitors

Length of Authorization: Date of Service or 1 year

PREFERRED DRUGS (No PA Required)

PA REQUIRED

All products require PA.

Adcirca[®] (tadalafil)
(Quantity Limit = 2 tablets/day)
 Revatio[®] (sildenafil citrate) tablet
(Quantity Limit = 3 tablets/day)
 Revatio[®] (sildenafil citrate) vial
(Quantity Limit = 3 vials/day, maximum 14 days supply per fill)
 sildenafil citrate (compare to Revatio[®])
(Quantity Limit = 3 tablets/day)
 Viagra[®] (sildenafil citrate)
(Quantity Limit = 3 tablets/day)

Note: Please refer to “Pulmonary Arterial Hypertension Medications” for Endothelian Receptor Antagonists and Prostanoids.

Platelet Inhibitors

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Agrylin[®], Persantine[®], Plavix[®], Pletal[®]:

- The patient has had a documented intolerance to the generic formulation of the medication.

Brilinta[®]:

- The patient is started and stabilized on the medication. (Note: samples are not considered adequate justification for stabilization.)

OR

- The patient has had a documented side effect, allergy, inadequate response or has a contraindication to at least one preferred platelet inhibitor.

LIMITATIONS:

Plavix[®]/clopidogrel 300mg is not an outpatient dose and is not covered in the pharmacy benefit.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Platelet Inhibitors		<i>Length of Authorization: 1 year</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA

Post-herpetic Neuralgia Agents

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Gralise®:

- The patient has a diagnosis of post-herpetic neuralgia (PHN)
- AND**
- The patient has had a documented side effect, allergy, contraindication or treatment failure with at least one drug from the tricyclic antidepressant class.
- AND**
- The patient has had an inadequate response to the generic gabapentin immediate-release.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Post-herpetic Neuralgia Agents		<i>Length of Authorization: 1 year</i>
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
All products require PA.	Gralise® (gabapentin) tablet, starter pack <i>Quantity Limit = 3 tablets/day</i> <i>(Maximum 30 day supply per fill)</i>	

Note: Please refer to “Analgesics: Miscellaneous: Transdermal Patch” for clinical criteria for **Lidoderm®** and **Qutenza®**, “Anticonvulsants” for clinical criteria for **Lyrica®** and “Anti-Depressants – SNRIs” for clinical criteria for **Cymbalta®**.

Psoriasis Medications: Injectables

NOTE: Psoriasis Self-Injectables (Enbrel® and Humira®) must be obtained and billed through our specialty pharmacy vendor, Briova. Stelara® may either be obtained and billed through our specialty pharmacy vendor, Briova or through the medical benefit. Please see the Enbrel, Humira or Stelara Prior Authorization/Patient Enrollment Form for instructions. Briova may supply Remicade® upon request or you may continue to obtain through your usual supplier. Briova will not be supplying Amevive® at this time – please continue to obtain through your usual supplier.

LENGTH OF AUTHORIZATION: Initial PA of 3 months (Stelara 4 months), and 12 months thereafter upon recertification

CRITERIA FOR APPROVAL:

Enbrel®

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis and has already been stabilized on Enbrel®

OR

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis affecting > 10% of the body surface area (BSA) and/or has involvement of the palms, soles, head and neck, or genitalia and has had a documented side effect, allergy, inadequate treatment response, or treatment failure to at least 2 different categories of therapy [i.e. at least 2 topical agents and at least 1 oral systemic agent, (unless otherwise contraindicated)] from the following categories:

Topical agents: emollients, keratolytics, corticosteroids, calcipotriene, tazarotene, etc.

Systemic agents: methotrexate, sulfasalazine, azathioprine, cyclosporine, tacrolimus, mycophenylate mofetil, etc.

Phototherapy: ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA, narrow band ultraviolet B (NUVA), etc.

Humira®

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis and has already been stabilized on Humira®

OR

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis affecting > 10% of the body surface area (BSA) and/or has involvement of the palms, soles, head and neck, or genitalia and has had a documented side effect, allergy, inadequate treatment response, or treatment failure to at least 2 different categories of therapy [i.e. at least 2 topical agents and at least 1 oral systemic agent, (unless otherwise contraindicated)] from the following categories:

Topical agents: emollients, keratolytics, corticosteroids, calcipotriene, tazarotene, etc.

Systemic agents: methotrexate, sulfasalazine, azathioprine, cyclosporine, tacrolimus, mycophenylate mofetil, etc.

Phototherapy: ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA, narrow band ultraviolet B (NUVA), etc.

Amevive[®]

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis and has already been stabilized on Amevive[®]

OR

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis affecting > 10% of the body surface area (BSA) and/or has involvement of the palms, soles, head and neck, or genitalia and has had a documented side effect, allergy, inadequate treatment response, or treatment failure to at least 2 different categories of therapy [i.e. at least 2 topical agents and at least 1 oral systemic agent, (unless otherwise contraindicated)] from the following categories:

Topical agents: emollients, keratolytics, corticosteroids, calcipotriene, tazarotene, etc.

Systemic agents: methotrexate, sulfasalazine, azathioprine, cyclosporine, tacrolimus, mycophenolate mofetil, etc.

Phototherapy: ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA, narrow band ultraviolet B (NUVA), etc.

AND

The prescriber must provide a clinically valid reason why either Enbrel[®] or Humira[®] cannot be used.

Remicade[®]

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis and has already been stabilized on Remicade[®]

OR

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis affecting > 10% of the body surface area (BSA) and/or has involvement of the palms, soles, head and neck, or genitalia and has had a documented side effect, allergy, inadequate treatment response, or treatment failure to at least 2 different categories of therapy [i.e. at least 2 topical agents and at least 1 oral systemic agent, (unless otherwise contraindicated)] from the following categories:

Topical agents: emollients, keratolytics, corticosteroids, calcipotriene, tazarotene, etc.

Systemic agents: methotrexate, sulfasalazine, azathioprine, cyclosporine, tacrolimus, mycophenolate mofetil, etc.

Phototherapy: ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA, narrow band ultraviolet B (NUVA), etc.

AND

The prescriber must provide a clinically valid reason why either Enbrel[®] or Humira[®] cannot be used.

Stelara[®]

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis and has already been stabilized on Stelara[®]

OR

The prescription must be written by a dermatologist

AND

The patient has a documented diagnosis of moderate to severe plaque psoriasis affecting > 10% of the body surface area (BSA) and/or has involvement of the palms, soles, head and neck, or genitalia and has had a documented side effect, allergy, inadequate treatment response, or treatment failure to at least 2 different categories of therapy [i.e. at least 2 topical agents and at least 1 oral systemic agent, (unless otherwise contraindicated)] from the following categories:

Topical agents: emollients, keratolytics, corticosteroids, calcipotriene, tazarotene, etc.

Systemic agents: methotrexate, sulfasalazine, azathioprine, cyclosporine, tacrolimus, mycophenylate mofetil, etc.

Phototherapy: ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA, narrow band ultraviolet B (NUVA), etc.

AND

The prescriber must provide a clinically valid reason why either Enbrel® or Humira® cannot be used.

DOCUMENTATION:

- ✓ Document clinical information for **Enbrel®**, **Humira®** or **Stelara®** on its **Prior Authorization/Patient Enrollment Form** and clinically compelling information supporting the choice of **Remicade®** on a **Remicade Prior Authorization Request Form** and **Amevive®** on a **General Prior Authorization Request Form**.
- ✓ All requests for infliximab (Remicade®) (whether billed through the pharmacy or medical benefit (J1745)) or ustekinumab (Stelara®) (whether billed through the pharmacy or medical benefit (J3357)) or alefacept (Amevive®) (J0215) (billed through the medical benefit) require Prior Authorization through the Catamaran Clinical Call Center.

Psoriasis Medications: Injectables

Length of authorization: Initial PA of 3 months (Stelara 4 months); 12 months thereafter

PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET	NON-PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET
ENBREL® (etanercept) <i>Quantity limit = 8 syringes/28 days for the first 3 months; then 4 syringes/28 days(50 mg) or 8 syringes/28 days (25 mg) subsequently</i>	Amevive® (alefacept)
HUMIRA® (adalimumab) <i>Quantity limit = 4 syringes/28 days for one month month; 2 syringes/28 days subsequently</i>	Remicade® (infliximab)
	Stelara® (ustekinumab) <i>(Quantity limit = 45 mg (0.5 ml) or 90 mg (1 ml) per dose) (90 mg dose only permitted for pt weight > 100 kg)</i>

Psoriasis: Non-Biologics

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Calcitrene Ointment

- The patient has a documented intolerance to Calcipotriene ointment.

Calcipotriene Cream

- The patient has a documented intolerance to the brand Dovonex cream.

Dovonex Solution

- The patient has a documented intolerance to the generic product.

Taclonex Ointment or Scalp Suspension

- The patient has had an inadequate response to a 24 month trial of a betamethasone dipropionate product and Dovonex (or generic calcipotriene), simultaneously, with significant non-adherence issues.
AND
- The patient has had a documented side effect, allergy, or treatment failure with Tazorac 0.05% or 0.1% cream or gel.

Note: If approved, initial fill of Taclonex[®] will be limited to 60 grams.

Vectical Ointment, Calcitriol Ointment

- The patient \geq 18 years of age
AND
- The patient has a diagnosis of mild-to-moderate plaque psoriasis
AND
- The patient has demonstrated inadequate response, adverse reaction or contraindication to calcipotriene
AND
- If the request is for brand Vectical, the patient has had a documented intolerance to the generic product.

Sorilux

- The patient \geq 18 years of age
AND
- The patient has a diagnosis of plaque psoriasis
AND
- The patient has demonstrated inadequate response or intolerance to other dosage forms of calcipotriene (brand or generic)

LIMITATIONS:

Kits with non-drug products or combinations of 2 drug products are not covered.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Psoriasis: Non-Biologics

Length of Authorization: 1 year

Key: † Generic product, *Indicates generic equivalent is available without a PA

All generic antihistamines	All brand antihistamines (example: Benadryl [®])	
All generic antihistamine/decongestant combinations	All brand antihistamine/decongestant combinations (example: Deconamine SR [®] , Rynatan [®] , Ryna-12 [®])	

Pulmonary: Antihistamines: 2nd Generation

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

SINGLE AGENT TABLET

FEXOFENADINE 60MG/180 MG TABLETS

- The diagnosis or indication for the requested medication is allergic rhinitis or chronic idiopathic urticaria.
AND
- The patient has had a documented side effect, allergy, or treatment failure to loratadine (OTC) **AND** cetirizine (OTC).

CLARINEX TABLETS, CLARITIN TABLETS, DESLORATADINE TABLETS, LEVOCETIRIZINE TABLETS, XYZAL TABLETS

- The diagnosis or indication for the requested medication is allergic rhinitis or chronic idiopathic urticaria.
AND
- The patient has had a documented side effect, allergy, or treatment failure to loratadine (OTC) **AND** cetirizine (OTC).
AND
- The patient has had a documented side effect, allergy, or treatment failure to fexofenadine.
AND
- If the request is for Clarinex or Xyzal, the patient must also have a documented intolerance to the generic equivalent tablets.

CHEWABLE/ORALLY DISINTEGRATING TABLET

CERTIRIZINE CHEWABLE TABLETS, CLARINEX REDITABS, CLARITIN CHEWABLE TABLETS, CLARITIN REDITABS, DESLORATADINE ODT, ZYRTEC ALLERGY OTC DISINTEGRATING TABLETS

- The diagnosis or indication for the requested medication is allergic rhinitis or chronic idiopathic urticaria.
AND
- The patient has had a documented side effect, allergy, or treatment failure to loratadine (OTC) rapidly disintegrating tablets or requires less than a 10 mg dose of loratadine.
AND
- If the request is for Clarinex Reditabs, the patient must also have a documented intolerance to the generic equivalent tablets.

SINGLE AGENT ORAL LIQUID

CLARINEX SYRUP, CLARITIN OTC SYRUP, LEVOCETIRIZINE SOLUTION, XYZAL SOLUTION, ZYRTEC CHILDREN'S ALLERGY ORAL LIQUID

- The diagnosis or indication for the requested medication is allergic rhinitis or chronic idiopathic urticaria.
AND
- The patient has had a documented side effect, allergy, or treatment failure to loratadine syrup **AND** cetirizine syrup.
AND
- If the request is for Xyzal, the patient must also have a documented intolerance to levocetirizine solution.

COMBINATION WITH PSEUDOEPHEDRINE

CETIRIZINE D, CLARINEX-D, CLARITIN-D

- The diagnosis or indication for the requested medication is allergic rhinitis.
AND
- The patient has had a documented side effect, allergy, or treatment failure to loratadine-D (OTC).

LIMITATIONS:

Many Allegra[®] and Zyrtec[®] brand products as well as Claritin[®] capsules are not covered as no Federal Rebate is offered. Fexofenadine/pseudoephedrine combination products (brand and generic) are not covered – individual components may be prescribed separately.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Pulmonary: Beta-Adrenergic Agents

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Metered Dose Inhalers (Long-Acting)

Effective 11/1/06, prior-authorization will be required for long-acting beta-adrenergic (LABA) MDIs for patients who have not been on a controller medication in the past 6 months or who do not have a diagnosis of COPD.

Foradil, Serevent:

- The patient has a diagnosis of COPD
OR
- The patient has a diagnosis of asthma and is prescribed an inhaled corticosteroid as a controller medication.

Arcapta:

- The patient has a diagnosis of COPD (not FDA approved for asthma).
AND
- The patient has a documented side effect, allergy, or treatment failure to either Foradil or Serevent.

Accuneb[®] nebulizer solution 0.63 mg/3 ml and 1.25 mg/3 ml

- The patient must have had a documented intolerance to the generic formulation.

Levalbuterol nebulizer solution (age ≤ 12 years)

- The patient must have had a documented intolerance to the brand Xopenex nebulizer solution.

Levalbuterol nebulizer solution (age > 12 years)

- The patient must have had a documented side effect, allergy, or treatment failure to albuterol nebulizer.
AND
- The patient must have had a documented intolerance to the brand Xopenex nebulizer solution.

Xopenex[®] nebulizer solution (age >12 years)

- The patient must have been started and stabilized on the requested medication.
OR
- The patient must have had a documented side effect, allergy, or treatment failure to albuterol nebulizer.

Brovana[®] or Perforomist[®] Nebulizer Solution

- The patient must have a diagnosis of COPD.
AND
- The patient must be unable to use a non-nebulized long-acting bronchodilator or anticholinergic (Foradil[®], Serevent[®] or Spiriva[®]) due to a physical limitation

Metaproterenol tablets/syrup

- The patient has had a documented side effect, allergy or treatment failure with generic albuterol tablets/syrup.

Terbutaline, Brethine[®] tablets

- The medication is not being prescribed for the prevention/treatment of preterm labor.
AND
- If Brethine is requested, the patient must have had a documented side effect, allergy, or treatment failure to generic terbutaline tablets.

Ventolin HFA

- The patient must have had a documented side effect, allergy, or treatment failure to TWO preferred short acting metered dose inhalers.

Vospire ER® tablets

- The patient must have had a documented side effect, allergy, or treatment failure to generic albuterol ER tablets.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Asthma Diagnosis: POS looks back for beta agonist rescue inhaler or inhaled corticosteroids/corticosteroid combinations for inferred diagnosis.

Allergic Rhinitis Diagnosis: POS looks back for second generation non-sedating antihistamine and nasal corticosteroid.

Pulmonary: Synagis®

NOTE: Synagis® must be obtained and billed through our specialty pharmacy vendor for Synagis®, Wilcox Home Infusion. Please see Synagis Prior Authorization/Enrollment Form for instructions.

LENGTH OF AUTHORIZATION: Only one dose (based on recipient weight) will be approved per thirty-day period. Dose is given once monthly between November 1st and March 31st (up to 5 doses depending on gestational age).

INDICATION:

Palivizumab is indicated for the prevention of RSV lower respiratory tract disease in selected infants and children with chronic lung disease of prematurity (CLD [formerly called bronchopulmonary dysplasia]) or with a history of preterm birth (< 35 weeks' gestation) or with congenital heart disease.

CRITERIA FOR APPROVAL:

- Infants born at 28 weeks of gestation or earlier (i.e., ≤ 28 weeks, 6 days) and under twelve months of age at the start of the RSV season (maximum 5 doses).
- Infants born at 29-32 weeks (i.e., between 29 weeks, 0 days and 31 weeks, 6 days) of gestation and under 6 months of age at the start of the RSV season (maximum 5 doses).
- Infants born at 32-35 weeks (i.e., between 32 weeks, 0 days and 34 weeks, 6 days) of gestation who have at least one of the following risk factors and who have not reached 3 months of age: (dosing continues in the RSV season through the end of the month the infant reaches 3 months old – maximum 3 doses)
 - Infant attends child care
 - One of more older siblings (or other child permanently in house) < 5 years of age (multiple births younger than 1 year of age do not qualify)
- Children under 24 months of age with chronic lung disease of prematurity (bronchopulmonary dysplasia) who have received medical therapy (supplemental oxygen, bronchodilator, diuretic or chronic corticosteroid therapy) within 6 months prior to the start of the RSV season (maximum 5 doses).
- Children under 24 months of age with hemodynamically significant cyanotic or acyanotic heart disease (CHD) (maximum 5 doses):
 - Receiving medication to control congestive heart failure
 - Moderate to severe pulmonary hypertension
 - Have cyanotic heart disease
- Infants under 12 months of age with either: (dosing continues in the RSV season through the end of the month the infant reaches 12 months old -maximum 5 doses)
 - Congenital abnormalities of the airways
 - Neuromuscular condition compromising handling of respiratory tract secretions

EXCLUDED FROM APPROVAL:

- Infants and children with hemodynamically insignificant heart disease.
- Infants with lesions adequately corrected by surgery, unless they continue to require medication for congestive heart failure.
- Infants with mild cardiomyopathy who are not receiving medical therapy.
- Established RSV disease.

This drug must be obtained and billed through our specialty pharmacy vendor for Synagis®, Wilcox Home Infusion, and processed through the DVHA POS prescription processing system using NDC values.

Under no circumstances will claims processed through the medical benefit be accepted.

DOCUMENTATION:

Document clinically compelling information supporting the use of Synagis on the **Synagis® Prior Authorization/Patient Enrollment Form**.

3 Department of Vermont Health Access PRIOR AUTHORIZATION REQUEST SYNAGIS® (PALIVIZUMAB)

Gestational Age: weeks: days:	Current Weight: (kg)	Dose: 15mg / kg (weight verified monthly)
Diagnosis:		
<input type="checkbox"/> Infants born at <input type="checkbox"/> 8 weeks of gestation or earlier (i.e., ≤ 28 weeks, 6 days) and under 12 months of age at the start of the RSV season (maximum 5 doses)		
<input type="checkbox"/> Infants born at 29 - 32 weeks (i.e., between 29 weeks, 0 days and 31 weeks, 6 days) of gestation at the start of the RSV season (maximum 5 doses)		
<input type="checkbox"/> Infants born at 32 - 35 weeks (i.e., between 32 weeks, 0 days and 34 weeks, 6 days) of gestation who have at least one of the following risk factors and who have not reached 3 months of age: (dosing continues in the RSV season through the end of the month the infant reaches 3 months old – maximum 3 doses)		
<input type="checkbox"/> Infant attends child care <input type="checkbox"/> One or more older siblings (or other child permanently in house) < 5 years of age (multiple births younger than 1 year of age do not qualify)		
<input type="checkbox"/> Children under 24 months of age with chronic lung disease of prematurity (bronchopulmonary dysplasia) who have received medical therapy (supplemental oxygen, bronchodilator, diuretic or chronic corticosteroid therapy) within 6 months prior to the start of the RSV season (maximum 5 doses)		
<input type="checkbox"/> Treatment: _____ <input type="checkbox"/> Dates of Use: _____		
<input type="checkbox"/> Children under 24 months of age with hemodynamically significant cyanotic or acyanotic heart disease(CHD)		
<input type="checkbox"/> Receiving medication to control congestive heart failure		
<input type="checkbox"/> Moderate to severe pulmonary hypertension (maximum 5 doses)		
<input type="checkbox"/> Have cyanotic heart disease		
<input type="checkbox"/> Infants under 12 months of age with either: (dosing continues in the RSV season through the end of the month the infant reaches 12 months old – maximum 5 doses)		
<input type="checkbox"/> Congenital abnormalities of the airways		
<input type="checkbox"/> Neuromuscular condition compromising handling of respiratory tract secretions		
<input type="checkbox"/> Other: _____		

NICU HISTORY

Did the patient spend time in the NICU?
 Yes No (If yes, please attach the NICU summary)

Was RSV prophylaxis recommended by the NICU/Hospital physician for this patient?
 Yes No

Was a NICU/Hospital /Clinic dose administered?
 Yes, Date(s): _____ No

4 PRESCRIPTION

Synagis (palivizumab) 50 and/or 100 mg vials and supplies for administration.
 Sig: Inject 15 mg/kg IM once every 4 weeks; expected date of first home injection: _____
 Dispense Quantity: Quantity sufficient for prophylaxis thru 03/2013
 Deliver product to: MD office Patient's home Clinic
 Home health nurse to administer injection Home Health Agency: _____
 If delivery is to clinic, please give location: _____
 Pediatric Anaphylaxis: Administer 0.01 ml/kg (max 0.3ml) of 1:1000 epinephrine solution subcutaneously or intramuscularly, and contact EMS or physician, as appropriate.
 Other: _____
 Sig: _____
 Physician will monitor patient's response to therapy. Any complications in therapy will be reported to the physician either by the patient's caregiver, or the skilled nursing service (if other than physician's office or Wilcox Home Infusion)
Prescriber's Signature: _____ **Date:** _____
Supervising Physician's Signature: _____
 This order is valid for the entire upcoming season if signed prior to the November dose, or for the remainder of the present season if signed after November.

~ XOLAIR ~

Prior Authorization Request Form

Vermont Medicaid has established coverage limits and criteria for prior authorization of Xolair. In order for beneficiaries to receive Medicaid coverage for Xolair, it will be necessary for the prescriber to telephone or complete and fax this prior authorization request to Catamaran. Please complete this form as directed and sign and date below. Incomplete requests will be returned for additional information.

Submit request via: Fax: 1-866-767-2649 or Phone: 1-800-918-7549

Prescribing Physician:

Name: _____

Phone #: _____

Fax #: _____

Address: _____

Specialty: _____

Contact Person at Office: _____

Beneficiary:

Name: _____

Medicaid ID #: _____

Date of Birth: _____ Sex: _____

 Patient Diagnosis: Moderate/Severe Persistent Asthma

 Other: _____

If requesting prescriber is not a pulmonologist, allergist, or immunologist, date of last visit to one (required yearly):

Specialist name: _____ **Specialist Type:** _____ **Date:** _____

 Initial Prior Authorization Request: Please complete all portions of form below

 Subsequent PA Request: Has patient shown marked clinical improvement **Yes** **No**

List all previous therapies tried and failed for this condition:

Therapy	Specific Drug	Reason for Discontinuation
Inhaled Corticosteroid		
Chronic Oral Corticosteroid		
Leukotriene Receptor Antagonist		
Long-Acting Beta Agonist		

 Has the member tested positive to at least one perennial aeroallergen by a skin or blood test (i.e. RAST, CAP, intracutaneous test)? **Yes** **No**

Please explain: _____

 Is the member's IgE level ≥ 30 and ≤ 700 IU/ml? **Yes** **No** Please provide IgE level: _____

Prescriber Signature: _____

Date of this request: _____

Renal Disease: Phosphate Binders

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Eliphos, PhosLo

- The patient must have a documented intolerance to the generic equivalent calcium acetate tablet or capsule.

Phoslyra

- The patient has a requirement for a liquid dosage form.

Renvela Oral Suspension Packet

- The patient has a requirement for a liquid dosage form.

Renvela tablet

- The patient must have a documented side effect, allergy, or inadequate response to Renagel[®] (sevelamer hydrochloride).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **Prior Authorization Request Form.** **General**

Renal Disease: Phosphate Binders		<i>Length of Authorization: 1 year</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA		
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
CALCIUM ACETATE † (compare to PhosLo [®]) capsule	Eliphos [®] (calcium acetate) tablet	
CALCIUM ACETATE † (compare to Eliphos [®]) tablet	PhosLo ^{®*} (calcium acetate) capsule	
FOSRENOL [®] (lanthanum carbonate)	Phoslyra [®] (calcium acetate) oral solution	
RENAGEL [®] (sevelamer hydrochloride) tablet	Renvela [®] (sevelamer carbonate) Oral Suspension packet (<i>QL = 2 packs/day (0.8 g strength only)</i>)	
	Renvela [®] (sevelamer carbonate) tablet	

Restless Leg Syndrome Medications

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Mirapex[®], Requip[®]

- The patient has had a documented intolerance to the generic product.

Horizant[®]:

- The patient has a diagnosis of restless legs syndrome (RLS).
AND
- The patient has had a documented side effect, allergy, contraindication or treatment failure to generic immediate release ropinirole **AND** pramipexole.
AND
- The patient has had an inadequate response or adverse reaction to generic gabapentin immediate-release.

Neupro[®]:

- The patient is ≥18 years of age
AND
- The patient has a diagnosis of moderate to severe restless legs syndrome (RLS).
AND
- The patient has had a documented side effect, allergy, contraindication or treatment failure to generic immediate release ropinirole **AND** pramipexole.
OR
- The prescriber provides medical necessity for the transdermal formulation (eg. swallowing disorder or difficulty taking oral medications).

LIMITATIONS:

Requests for Mirapex ER[®] and Requip XL[®] will not be approved for Restless Leg Syndrome (RLS).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Restless Leg Syndrome Medications	
<i>Length of Authorization: 1 year</i>	
Key: † Generic product, *Indicates generic equivalent is available without a PA	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
<u>DOPAMINE AGONISTS (ORAL)</u> PRAMIPEXOLE † (compare to Mirapex [®]) ROPINIROLE † (compare to Requip [®])	Mirapex ^{®*} (pramipexole) Requip ^{®*} (ropinirole)
<u>DOPAMINE AGONISTS (TRANSDERMAL)</u> All products require PA.	Neupro [®] (rotigotine) transdermal patch <i>(Quantity Limit = 1 patch/day)</i> <i>(1mg, 2 mg and 3 mg patches ONLY)</i>
<u>GAMMA-AMINO BUTYRIC ACID ANALOG</u> All products require PA.	Horizant [®] (gabapentin enacarbil) 600 mg ER Tablet <i>(Quantity Limit = 1 tablet/day)</i>

Rheumatoid, Juvenile Idiopathic & Psoriatic Arthritis Medications: Injectables

NOTE: Rheumatoid, Juvenile Idiopathic and Psoriatic Arthritis Self-Injectables (Cimzia[®], Enbrel[®], Humira[®], Kineret[®], Orencia[®] Subcutaneous and Simponi) must be obtained and billed through our specialty pharmacy vendor, Briova. Please see the Cimzia, Enbrel, Humira, Kineret, Orencia or Simponi Prior Authorization/Patient Enrollment Form for instructions. Briova may supply Remicade[®] upon request or you may continue to obtain through your usual supplier. Briova will not be supplying Actemra[®] or Orencia[®] Intravenous Infusion at this time – please continue to obtain through your usual supplier.

LENGTH OF AUTHORIZATION: Initial PA of 3 months, and 12 months thereafter if medication is well tolerated. Re-evaluate every 12 months.

CRITERIA FOR APPROVAL:

Humira[®]

Patient has a diagnosis of rheumatoid arthritis (RA), juvenile idiopathic arthritis or psoriatic arthritis and has already been stabilized on Humira[®]

OR

Diagnosis is RA, juvenile idiopathic arthritis or psoriatic arthritis, and methotrexate therapy resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD¶ *should be tried prior to approving Humira[®].

Note: Approval should be granted in cases where patients have been treated with infliximab, but have lost response to therapy.

Enbrel[®]

Patient has a diagnosis of RA, juvenile RA (JRA), or psoriatic arthritis and has already been stabilized on Enbrel[®]

OR

Diagnosis is RA, JRA, or psoriatic arthritis, and methotrexate therapy resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD¶ * should be tried prior to approving Enbrel[®].

Actemra[®]

Patient has a diagnosis of RA or juvenile RA (JRA) and has already been stabilized on Actemra[®]

OR

Patient age \geq 18 years (RA) or \geq 2 years (JRA).

AND

Diagnosis is RA or juvenile RA (JRA) and patient has documentation of an inadequate response, adverse reaction or allergic response to methotrexate, or if methotrexate is contraindicated, at least 1 other DMARD¶ (other DMARDs include leflunomide, sulfasalazine, gold, antimalarials, minocycline, D-penicillamine, azathioprine, cyclophosphamide and cyclosporine)

AND

The prescriber must provide a clinically valid reason why either Humira[®] or Enbrel[®] cannot be used. For RA, patient must have had an inadequate response to one or more TNF inhibitors.

Cimzia[®]

Patient has a diagnosis of RA and has already been stabilized on Cimzia[®]

OR

Patient age \geq 18 years

AND

Diagnosis is RA and patient has documentation of an inadequate response, adverse reaction or allergic response to methotrexate, or if methotrexate is contraindicated, at least 1 DMARD (other DMARDs include leflunomide, sulfasalazine, gold, antimalarials, minocycline, D-penicillamine, azathioprine, cyclophosphamide and cyclosporine)

AND

The prescriber must provide a clinically valid reason why either Humira® or Enbrel® cannot be used.

Remicade®

Patient has a diagnosis of RA or psoriatic arthritis and has already been stabilized on Remicade®

OR

Diagnosis is RA or psoriatic arthritis, and methotrexate therapy resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD* should be tried prior to approving Remicade®.

AND

The prescriber must provide a clinically valid reason why either Humira® or Enbrel® cannot be used.

Simponi®

Patient has a diagnosis of RA or psoriatic arthritis and has already been stabilized on Simponi®

OR

Patient age \geq 18 years

AND

Diagnosis is RA or psoriatic arthritis, and patient has documentation of an inadequate response, adverse reaction or allergic response to methotrexate, or if methotrexate is contraindicated, at least 1 DMARD* (other DMARDs include leflunomide, sulfasalazine, gold, antimalarials, minocycline, D-penicillamine, azathioprine, cyclophosphamide and cyclosporine)

AND

The prescriber must provide a clinically valid reason why either Humira® or Enbrel® cannot be used.

Kineret®

Patient has a diagnosis of RA and has already been stabilized on Kineret®

OR

Diagnosis is RA or psoriatic arthritis, and methotrexate therapy resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD should be tried prior to approving Kineret®.

Note: Kineret® may be used as monotherapy or concomitantly with DMARDs, other than TNF antagonists. Kineret® should not be administered concomitantly with any TNF antagonists (i.e. Enbrel®, Humira®, or Remicade®).

AND

The prescriber must provide a clinically valid reason why either Humira® or Enbrel® cannot be used.

Orencia® Intravenous Infusion

Patient has a diagnosis of RA or juvenile RA (JRA) and has already been stabilized on Orencia®

OR

Diagnosis is RA or juvenile RA (JRA) and methotrexate therapy resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD* should be tried prior to approving Orencia®. **Note:** Orencia® may be used as monotherapy or concomitantly with DMARDs, other than TNF antagonists. Orencia® should not be administered concomitantly with TNF antagonists (i.e. Enbrel®, Humira®, or Remicade®) and is not recommended for use with Kineret®.

AND

The prescriber must provide a clinically valid reason why either Humira® or Enbrel® cannot be used.

AND

If the diagnosis is RA, there is a clinically valid reason why Orencia® Subcutaneous cannot be used.

Orencia® Subcutaneous

Patient has a diagnosis of RA and has already been stabilized on Orencia®

OR

Diagnosis is RA and methotrexate therapy resulted in an adverse effect, allergic reaction, inadequate response, or treatment failure. If methotrexate is contraindicated, another DMARD should be tried prior to approving Orencia®. **Note:** Orencia® may be used as monotherapy or concomitantly with DMARDs, other than TNF antagonists. Orencia® should not be administered concomitantly with TNF antagonists

(i.e. Enbrel[®], Humira[®], or Remicade[®]) and is not recommended for use with Kineret[®].

AND

The prescriber must provide a clinically valid reason why either Humira[®] or Enbrel[®] cannot be used.

Patients with systemic juvenile arthritis (SJRA/SJIA) and fever are not required to have a trial of a DMARD, including methotrexate. Patients with systemic juvenile arthritis without fever should have a trial of methotrexate, but a trial of another DMARD in case of a contraindication to methotrexate, is not required before Enbrel[®], Humira[®], Actemra[®], or Oencia[®] is approved.

* Patients with psoriatic arthritis with a documented diagnosis of active axial involvement should have a trial of NSAID therapy, but a trial with DMARD is not required before a TNF-blocker is approved. If no active axial skeletal involvement, then an NSAID trial and a DMARD trial are required (unless otherwise contraindicated) prior to receiving Humira[®], Enbrel[®], Remicade[®].or Simponi[®]

DOCUMENTATION:

- ✓ Document clinical information for **Cimzia[®], Enbrel[®], Humira[®], Kineret[®], Oencia[®] Subcutaneous or Simponi[®]** on its **Prior Authorization/Patient Enrollment Form** and clinically compelling information supporting the choice of **Remicade[®]** on a **Remicade Prior Authorization Request Form** or **Actemra[®]** or **Oencia[®] Intravenous Infusion** on a **General Prior Authorization Request Form**.
- ✓ All requests for infliximab (Remicade[®]) (whether billed through the pharmacy or medical benefit (J1745)) or tocilizumab (Actemra[®]) (J3262) or abatacept (Oencia Intravenous Infusion) (J0129) (both are billed through the medical benefit) require Prior Authorization through the Catamaran Clinical Call Center.

Rheumatoid, Juvenile Idiopathic and Psoriatic Arthritis: Injectables

Length of authorization: Initial PA of 3 months; 12 months thereafter

PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET	NON-PREFERRED AGENTS AFTER CLINICAL CRITERIA ARE MET
ENBREL [®] (etanercept) <i>(Quantity limit = 4 syringes/28 days(50 mg) and 8 syringes/28 days (25 mg))</i>	Actemra [®] (tocilizumab) <i>(Qty limit = 4 vials/28 days (80 mg vial), 3 vials/28 days (200 mg vial) or 2 vials/28 days (400 mg vial))</i>
HUMIRA [®] (adalimumab) <i>(Quantity limit = 4 syringes/28 days)</i>	Cimzia [®] (certolizumab pegol) <i>(Quantity limit = 1 kit/28 days (starter X 1, then regular))</i>
	Kineret [®] (anakinra) <i>(Quantity limit = 1 syringe/day)</i>
	Oencia [®] (abatacept) Subcutaneous Injection <i>(Quantity limit = 4 syringes/28 days)</i>
	Oencia [®] (abatacept) Intravenous Infusion
	Remicade [®] (infliximab)
	Simponi [®] (golimumab) <i>(Qty limit = 1 syringe/28 days)</i>

Saliva Stimulants

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

SALAGEN®

- The patient has had a documented side effect, allergy, or treatment failure to generic pilocarpine.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Saliva Stimulants		<i>Length of Authorization: 1 year</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA		
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
PILOCARPINE† (compare to Salagen®) EVOXAC® (cevimeline) CEVIMELINE† (compare to Evoxac®)	Salagen®* (pilocarpine)	

Sedative Hypnotics: Benzodiazepine

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

The patient has had a documented side effect, allergy, or treatment failure with two preferred benzodiazepine sedative/hypnotics. If a product has an AB rated generic, one trial must be the generic.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

MANAGEMENT OF MENTAL HEALTH DRUGS: See page 180 for a description of the management of mental health drugs.

Sedative Hypnotics: Benzodiazepine		<i>Length of Authorization: 1 year</i>
Key: † Generic product, *Indicates generic equivalent is available without a PA		
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
ESTAZOLAM† (compare to Prosom®) FLURAZEPAM† (formerly Dalmane®) TEMAZEPAM 15 mg, 30 mg † (compare to Restoril®)	Doral® (quazepam) Halcion® (triazolam) Prosom®* (estazolam) Restoril®* (temazepam) temazepam† 7.5 mg, 22.5 mg (compare to Restoril®) triazolam † (compare to Halcion®)	

Sedative Hypnotics: Non-benzodiazepine, Non-barbiturate

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

Ambien®:

The patient has had a documented intolerance to generic zolpidem.

Ambien CR®, Lunesta®, Zolpidem CR:

The patient has had a documented side effect, allergy or treatment failure to generic zolpidem. If the request is for Ambien CR 6.25 mg, there has also been a documented intolerance to the generic. If the request is for Zolpidem CR 12.5 mg, there has also been a documented intolerance to the brand product.

Edluar®:

The patient has a medical necessity for a disintegrating tablet formulation (i.e. swallowing disorder).

AND

The patient has a documented intolerance to Zolpimist®.

Intermezzo®:

The patient has insomnia characterized by middle-of-the night awakening followed by difficulty returning to sleep

AND

The patient has had a documented inadequate response to zolpidem IR AND zaleplon.

Rozerem®: The patient has had a documented side effect, allergy, contraindication or treatment failure to generic zolpidem.

OR

There is a question of substance abuse with the patient or family of the patient.

Note: If approved, initial fill of Rozerem® will be limited to a 14 day supply.

Silenor®: The patient has had a documented side effect, allergy, contraindication or treatment failure to generic zolpidem.

AND

The patient has had a documented intolerance with generic doxepin or there is another clinically valid reason why a generic doxepin (capsule or oral solution) cannot be used.

Somnote®: The patient has had a documented side effect, allergy, or treatment failure with two preferred medications from the sedative hypnotic: benzodiazepine and/or sedative hypnotic: non-benzodiazepine, non-barbiturate classes.

Sonata®:

The patient has had a documented intolerance to generic zaleplon

Zolpimist®:

The patient has a medical necessity for a non-oral dosage form (i.e. swallowing disorder).

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form.**

MANAGEMENT OF MENTAL HEALTH DRUGS: See page 180 for a description of the management of mental health drugs.

	Sonata® (zaleplon) (<i>Quantity limit = 1 cap/day (5 mg) or 2 caps/day (10 mg)</i>)
	Zolpidem CR† (compare to Ambien CR®) (<i>Quantity Limit = 1 tab/day</i>)
	Zolpimist® (zolpidem) Spray (5 mg/spray) (<i>Quantity Limit = 1 canister/30 days</i>)

Skeletal Muscle Relaxants: Oral

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL:

MUSCULOSKELETAL AGENTS:

Amrix, cyclobenzaprine ER, cyclobenzaprine 7.5 mg, Fexmid

- The prescriber must provide a clinically valid reason why a preferred generic cyclobenzaprine cannot be used. For approval of Fexmid, the patient must also have a documented intolerance to the generic equivalent.

Brand skeletal muscle relaxants with generics available (Flexeril, Parafon Forte DSC, Robaxin):

- The patient has had a documented side effect, allergy or treatment failure with two different preferred musculoskeletal agents (One trial must be the AB rated generic).

carisoprodol, carisoprodol/ASA, carisoprodol/ASA/codeine, Soma, metaxolone, Skelaxin:

- The patient has had a documented side effect, allergy or treatment failure with two different preferred musculoskeletal agents. Additionally, if a brand name product is requested where an AB rated generic exists, the patient must also have had a documented intolerance to the generic product.

Lorzone

- The patient has had a documented side effect, allergy or treatment failure with two different preferred musculoskeletal agents.

orphenadrine/ASA/caffeine

- The prescriber must provide a clinically valid reason why generic orphenadrine in combination with aspirin (or another analgesic) cannot be used.

ANTISPASTICITY AGENTS:

Dantrium, Zanaflex tablets:

- The patient must have a documented side effect, allergy, or treatment failure with the AB rated generic product.

Tizanadine capsules, Zanaflex capsules:

- The prescriber must provide a clinically valid reason why generic tizanidine tablets cannot be used.
AND
- If the request is for Zanaflex capsules, the patient must have a documented intolerance to generic tizanadine capsules.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Skeletal Muscle Relaxants: Oral

Smoking Cessation Therapies

LENGTH OF AUTHORIZATION: up to 16 weeks (2 x 8 weeks) for nicotine replacement OR up to 24 weeks (2 x 12 weeks) for oral therapy (per rolling 365 days)

CRITERIA FOR APPROVAL:

Nicoderm CQ patch

- The patient has had a documented intolerance to generic nicotine patch.

Nicorette gum

- The patient has had a documented intolerance to generic nicotine gum.

nicotine lozenge

- The patient has had a documented side effect or allergy to Nicorette lozenge or Commit lozenge.

Nicotrol Inhaler

- The patient has had a documented treatment failure with BOTH generic nicotine patch and generic nicotine gum.

Nicotrol Nasal Spray

- The prescriber must provide a clinically valid reason for the use of the requested medication.

Zyban

- The patient has had a documented intolerance to generic bupropion SR.

Smoking Cessation Counseling is encouraged with the use of smoking cessation therapies

Vermont QUIT LINE (available free to all patients) 1-877-YES-QUIT (937-7848)

GETQUIT™ Support Plan available free to all Chantix® patients 1-877-CHANTIX (242-6849)

LIMITATIONS:

Nicotine System Kit® not covered – prescribe multiple strengths separately.

DOCUMENTATION:

- Document clinically compelling information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Thrombopoietin Receptor Agonists

LENGTH OF AUTHORIZATION: initial approval 3 months, subsequent approvals 6 months

CRITERIA FOR APPROVAL:

- The patient is at least 18 years of age.
- AND**
- The diagnosis or indication is chronic immune (idiopathic) thrombocytopenic purpura (ITP).
- AND**
- The patient's platelet count is less than 30,000/ μ L ($< 30 \times 10^9/L$) or the patient is actively bleeding.
- AND**
- The patient has had a documented side effect, allergy, treatment failure or a contraindication to therapy with corticosteroids.
- OR**
- The patient has a documented insufficient response following splenectomy.

DOCUMENTATION:

- ✓ Document clinically compelling information supporting the use of a non-preferred agent on the **General Prior Authorization Request Form**

- ✓ All requests for romiplostim (Nplate[®]) (J2796) (billed ONLY through the medical benefit) require Prior Authorization through the Catamaran Clinical Call Center.

Thrombopoietin Receptor Agonists	
<i>Length of Authorization: initial approval 3 months, subsequent approvals 6 months</i>	
PREFERRED DRUGS (No PA Required)	PA REQUIRED
	Nplate [®] (romiplostim) Subcutaneous Injection Promacta [®] (eltrombopag) Oral Tablets

Urinary Antispasmodics

LENGTH OF AUTHORIZATION: 1 year

CRITERIA FOR APPROVAL: (for patients >21 and <65 years of age):

Please note: Patients <21 years of age are exempt from all ORAL ANTIMUSCARINIC Urinary Antispasmodics PA requirements (Exception: An adequate trial of oxybutynin/oxybutynin XL will be required before approval of Ditropan/Ditropan XL will be granted for all patients) and patients ≥ 65 years of age are exempt from the short acting oxybutynin trial requirement.

Ditropan, flavoxate, Enablex, Vesicare

- The patient has had a documented side effect, allergy, or treatment failure with generic oxybutynin.

Detrol, Detrol LA, Ditropan XL, Oxybutynin XL, Sanctura, Sanctura XR, tolterodine (generic), trospium (generic), trospium ER (generic), Toviaz

- The patient has had a documented side effect, allergy, or treatment failure with generic oxybutynin.
AND
- The patient has had a documented side effect, allergy, or treatment failure with 2 preferred long-acting agents. If a medication has an AB rated generic, there must have also been a trial of the generic formulation.

Gelnique 3%, 10%, Oxytrol

- The patient is unable to swallow a solid oral formulations (e.g. patients with dysphagia)
OR
- The patient is unable to be compliant with solid oral dosage forms.

Myrbetriq

- The patient has had a documented side effect, allergy, treatment failure, or contraindication with one preferred long-acting urinary antimuscarinic agent.

DOCUMENTATION:

- ✓ Document clinically information supporting the choice of a non-preferred agent on a **General Prior Authorization Request Form**.

Urinary Antispasmodics		<i>Length of Authorization: 1 year</i>
Key : † Generic product, *Indicates generic equivalent is available without a PA		
PREFERRED DRUGS (No PA Required)	PA REQUIRED	
SHORT-ACTING AGENTS		
OXYBUTYNIN† (compare to Ditropan®)	Ditropan®* (oxybutynin) Flavoxate † (formerly Urispas®)	
LONG-ACTING AGENTS (after clinical criteria are met)
