Who We Are

We are a group of specially trained nurse case managers who work with people facing complex medical situations.

The MOMS Program is designed to support women experiencing pregnancy who have had a previous baby born earlier than 32 weeks of pregnancy, have a history of substance abuse, are in medication assisted therapy, or have a mental illness diagnoses.

We Can Help you...

- Find and go to an Obstetrical (pregnancy) care provider
- Make a Health Action Plan with you during each trimester of your pregnancy and after your baby is born, to help you both have the healthiest experience possible
- Find transportation to your medical appointments
- Attend medical appointments with you to help you address concerns you may have with your medical provider
- Help you make a safe plan for your care and your baby's care after he or she is born
- Find and assist in applying for other state and community services that meet your needs including help with food, housing, clothing, medication, support groups, or other needs.
