

#### Story Behind the Curve

This measure looks at whether adult members receive preventive and ambulatory services. It looks at the percentage of Vermont adults with Medicaid who have had a preventative or ambulatory visit to their physician. Consider the other side of this measure: How many patients never access the system? If they never access the healthcare system, how does preventive care and counseling (diet, exercise, smoking cessation, seat belt use, etc.) occur? This measure is an indicator as to whether there may be barriers to our beneficiaries accessing preventive care.
