Department of
Vermont Health Access

**ANNUAL REPORT FOR 2022 &
GOVERNOR'S RECOMMENDED BUDGET
FOR STATE FISCAL YEAR 2024**

THIS PAGE INTENTIONALLY LEFT BLANK

Table of Contents

Message from the Commissioner

Greetings,

Thank you for taking the time to learn about the Department of Vermont Health Access (DVHA) and our work. Together, we have the opportunity to improve health access for Vermonters in our state. This report includes highlights of 2022 and describes in detail our budget proposal for State Fiscal Year 2024. As we welcome a new year, it is important to take stock of not only where we have been, but where we are going.

First, we will continue to focus on Vermonters. The work we do strives to offer financial stability to providers, gives Vermonters on Medicaid and health insurance exchange plans access to health care services, and ensures we are using taxpayer dollars wisely. As we emerge from the disruption caused by the pandemic, focusing on provider stability, access to services and balancing it with fiscal responsibility – is the cornerstone of our work.

This year marks the beginning of implementation of programmatic changes for our Global Commitment to Health Waiver renewal. The waiver supports Vermont's efforts to innovate in health care coverage, payment, and delivery. It also offers tools to support Vermont's health care providers as they recover from the ongoing challenges presented by the COVID-19 pandemic.

We continue our focus on modernizing information technology, implementing effective technology solutions that support Vermonters signing up for health insurance, paying health care claims, and accessing health information.

The Department is committed to value-based payment. We continue to reimagine how we pay providers, moving away from fee-for-service and focusing on paying for high-quality, cost-effective health care. As the payer for Vermonters who are covered by Medicaid, DVHA plays an important role in health care reform.

The Federal landscape continues to define many aspects of our work. We have been diligently preparing our staff and systems for April, when we may begin to "unwind" from continuous Medicaid coverage for Vermonters. This requires consistent, effective outreach to Vermonters – whether they are patients or providers – to help them understand how their health coverage may be changing and make every effort to offer them opportunities to remain insured.

Equally important is our focus on the people we work with, supporting DVHA workforce recruitment and retention and developing stakeholder relationships. Our work is possible because of our people and our relationships. It's vital that we work together collaboratively and continue to practice integrity, transparency, and service.

I am proud to serve Vermonters and strive to make a difference each day leading the talented DVHA team. I encourage you to read more about the past year and what's to come on the following pages.

About DVHA

About Us

The Department of Vermont Health Access (DVHA), within the State of Vermont's Agency of Human Services, administers the Vermont Medicaid program and Vermont's health insurance marketplace, Vermont Health Connect. The Department's work is broad and includes clinical, payment, and eligibility for health plans it administers.

Mission and Values

Mission

**Improve Vermonters' health and well-being
by providing access to high-quality, cost-effective health care.**

Our mission says that we are striving to improve Vermonters' health and well-being. We provide access to high-quality health care. We are committing to doing this cost-effectively. We are accountable to our members, providers and to taxpayers.
To support our mission, we:
- Help Vermonters **access health insurance** through Medicaid and through the Health Insurance Marketplace, Vermont Health Connect.
- Help Vermonters **who are covered by Medicaid access health care services**.
- **Pay health care providers** for delivering health care to Vermonters who are covered by **Medicaid**.
- Spend taxpayer dollars wisely by **running an effective, efficient department**.

Core activities:

1) We encourage Vermonters to sign up for, or enroll in, health insurance and benefit programs. This work is represented by the "Vermonters" path in the diagram above.
2) We pay for Vermonters' health care if they are in Medicaid programs. We work with a robust network of health care providers, pharmacies, and other partners. The Department does not pay for health care for Commercial insurance nor Medicare insurance.
3) We strategically invest in programs and monitor costs. This work is central to our commitment to quality and improvement.

Values

Our department follows three core values:

1) **Transparency** – We trust that we will achieve our collective goals most efficiently if we communicate the good, the bad, and the ugly with our partners and stakeholders.
2) **Integrity** – We are ethical and honest. Our actions align with our core values as employees of the Department and of the State of Vermont.
3) **Service** – Everything we do is funded by taxpayers to serve Vermonters. Therefore, we must ensure that our processes and policies are person-centered. We aim to model, drive, and support the integration of person-centered principles throughout our organizational culture.

These values guide our pursuit of our responsibilities, priorities, and mission. We are committed to innovation and collaboration. We approach opportunities to manage Medicaid costs differently with an open mind and are committed to serving Medicaid members, providers, and Vermont taxpayers. We recognize that the success of our initiatives depends on strong working relationships with other state agencies, federal and local governments, and community partners.

Priorities and Connection to the Mission

DVHA has identified three key priorities that support our mission **to improve Vermonters' health and well-being by providing access to high-quality, cost-effective health care.**

Advancing Value-Based Payments

Value-based payment programs pay for Medicaid-covered health care in a new way, resulting in predictable and flexible payments for providers and for DVHA, as well as quality of care for Medicaid members. Instead of paying providers solely for the number of services they deliver (e.g., for each test, office visit, hospital stay, and procedure), value-based payment programs link payment to quality, pay differently, or do both. If the value-based payment program pays differently, it can be for entire or selected populations of patients. An important element of value-based payment is regularly monitoring cost, coordination, volume, and quality of care to support all Medicaid members having access to the services they need.

Modernizing Information Technology Infrastructure

Health care and health insurance systems rely on technology. Vermonters and providers need modern, effective technology systems to sign up for health insurance, to be paid for health care services, and to get the health information they need. Our goal is to implement and use flexible, responsive information technology systems in the face of changing customer expectations, a

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

shifting federal landscape, and advances in the healthcare industry. Modern, effective technology solutions support signing up for health insurance, paying health care claims, and accessing health information.

Operational Performance Improvement

Continuous improvement is a core tenet of the Department's work. To improve, DVHA staff determine meaningful ways to measure our work, gather data and develop scorecards to monitor effectiveness. These scorecards drive clinical initiatives, business decisions, the pursuit of better customer service, a higher quality of care, and operational efficiencies.

Looking to the Future: DVHA's Work

The Department is focused on the following key priorities to support our mission. These are the building blocks that ensure our department can improve Vermonters' access to health care.

Open Enrollment	Modernizing IT infrastructure	Advancing Value-Based Payments	Global Commitment to Health
Staff Workforce Recruitment & Retention	Unwinding from the Public Health Emergency	Provider Stability	

About Health Insurance

The Department administers Vermont Medicaid and Vermont's health insurance exchange which offers qualified health plans. But there are other types of health insurance too. Here is a description of three major types of health insurance:

- **Medicaid** is a government-funded health insurance plan. Eligibility for Medicaid is based on income, medical or disability status, and other factors. Medicaid is handled differently from state to state. The federal government establishes requirements for all states to follow, but each state individually administers its Medicaid program following state guidelines. The Department of Vermont Health Access designs and administers the Medicaid program for Vermonters. This includes determining who is eligible for Medicaid coverage, which health care services Medicaid will cover, and how much Medicaid will pay for these services.

- **Commercial** health insurance plans are offered by private insurance companies like BlueCross BlueShield of Vermont and MVP® Health Care. Health plans that Vermonters get through their employers are commercial health plans. Health plans Vermonters can

buy on the health insurance marketplace, Vermont Health Connect, are also commercial health plans. Qualified Health Plans offered by Blue Cross and MVP in Vermont are certified by the Department of Vermont Health Access. A certified insurance plan provides essential health benefits, follows established limits on deductibles, co-payments, and out-of-pocket maximum amounts, and meets other requirements of the Affordable Care Act.

- **Medicare** is a national, government-funded health insurance plan for people who qualify by age. The federal government decides how Medicare works. States can only control certain aspects of Medicare access and affordability.

Medicaid is an entitlement program. Eligible Vermonters have rights to payment for medically necessary health care services. The State and the Federal government are obligated to fund Medicaid services. This federal/state partnership provides significant flexibility from state to state. Federal administrative, reimbursement, coverage, and eligibility requirements must be met in each state.

In Vermont, Medicaid makes significant "investments" that promote public health. Medicaid investments are not entitlements and are subject to both federal approval and the appropriate use of state funds.

Fast Facts

Category	Description	Fact
Coverage	Number of covered lives in Vermont's public health insurance coverage programs (September 2022)	270,475
Providers	Number of providers enrolled in Vermont Medicaid, also known as Green Mountain Care (December 2022)	27,860
Claims	Number of claims processed annually (SFY2022)	8,383,050
	Percent of claims received electronically (SFY2022)	95.04%
	Percent of claims processed within 30 days (SFY2022)	99.69%
	Average number of days from claim receipt to adjudication (SFY2022)	1.27
Customer Support	Average number of incoming calls per month (SFY2022)	16,921

DVHA Units

The Department's work is broad, and each unit contributes significantly to the Department's mission. The following pages include brief descriptions of each unit.

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

Help Vermonters Access Health Insurance

One of the Department's core responsibilities is helping Vermonters access health insurance. Health insurance is a cornerstone of accessing high quality, affordable health care. The Department continuously works to ensure Vermonters can access health insurance that is affordable and that offers comprehensive coverage in alignment with federal requirements.

Health Access Eligibility & Enrollment Unit (HAEEU)

The Health Access Eligibility and Enrollment Unit (HAEEU) is the doorway Vermonters use to access many of the Department's programs. HAEEU operates Vermont's health insurance marketplace, also known as Vermont Health Connect.

Vermont's health insurance marketplace is integrated. This means that Vermonters can come through one "door" to access a range of insurance plans. Vermonters are screened for eligibility for health insurance through Modified Adjusted Gross Income, or MAGI-based Medicaid, Dr. Dynasaur, and Qualified Health Plans, including federal and state-based financial assistance. HAEEU also enrolls Vermonters into Medicaid for the Aged, Blind and Disabled, VPharm, and the Medicare Savings Programs.

HAEEU offers online, telephone, paper and in-person assistance for Vermonters who are applying for health insurance.

The HAEEU team is comprised of several smaller units:

- Offline/Online Support Teams (Tier 1/Tier 2) - Customer service representatives who determine applicant eligibility for health care programs;
- Tier 3 Call Center, which handles complex case resolution;
- Data Team;
- Access Operations (AOPS) Team, which serves as the primary link between eligibility policy and operations;
- Business & Training Team, which facilitates new hire training and onboarding, develops business processes, and manages operational projects; and
- Communication & Outreach Team, responsible for public education and communication around health care access, including notices, website, social media and the Assister Program.

Long-Term Care (LTC)

The Long-Term Care (LTC) Unit determines financial eligibility for Vermonters who apply for LTC Medicaid. Eligibility for Vermont LTC Medicaid has two parts: (1) Financial Eligibility, determined by DVHA; and (2) Clinical Eligibility, determined by the Department of Disabilities, Aging, and Independent Living (DAIL) or by the Department of Mental Health (DMH).

If they are eligible, Vermonters may receive services in their own home, in the home of another person, in an approved residential care home, in an assisted living facility, or in an approved nursing home. The LTC Medicaid Program covers Choices for Care, Developmental Disabilities Home- and Community-Based Services, the Brain Injury Program, and Intensive Home- and Community-Based Treatment.

The financial eligibility application process can be complicated and lengthy. It requires a 60-month "look-back" review period of detailed financial history. LTC staff work closely with clients,

families, case managers, attorneys, and authorized representatives to help ensure that eligible Vermonters can access needed LTC Medicaid services in a timely manner.

Health Care Appeals Team (HCAT)

The Health Care Appeals Team provides investigative research and support for eligibility fair hearings, covered services internal appeals, and covered services fair hearings. The team also oversees the Medicaid Program Grievance and Appeals process, supporting both federal and state regulatory compliance for grievances and appeals processed by the specialized service departments.

Integrated Eligibility & Enrollment (IE&E) Program

The IE&E Program is one of the major Information Technology (IT) initiatives residing under the Agency of Human Services' (AHS) umbrella. The goal of the IE&E Program is to enhance business processes and leverage technology to improve the experience of Vermonters as they apply for, access, and maintain health care and financial benefits. The IE&E Program leverages state and federal resources from both the Centers for Medicare and Medicaid Services (CMS) and the US Department of Agriculture (USDA) Food and Nutrition Service (FNS). This program is a collaborative effort coordinated across multiple agencies and departments.

Help Vermonters Access Health Care Services

The Department is responsible for reviewing, authorizing, and monitoring services for Vermonters who are covered by Medicaid. These services include health care, pharmacy, mental health, and substance use disorder treatment. In addition, the Department responds to questions and concerns from Vermonters covered by Medicaid.

Clinical Services

Clinical Services is comprised of three units: Clinical Operations, Clinical Integrity, and Pharmacy.

Clinical Operations

The Clinical Operations Unit (COU) monitors the quality, quantity, appropriateness, and effectiveness of healthcare services requested by providers for members. The Unit reviews requests for services for medical necessity, utilizing evidence-based medical information; identifies over- and under-utilization of healthcare services through the prior authorization (PA) review process, performs case tracking and claims data analysis; develops and/or adopts clinical criteria for certain established clinical services, new technologies, and medical treatments; assures correct coding for medical benefits; reviews provider appeals; offers provider education related to specific Medicaid policies and procedures; and performs quality improvement activities to enhance medical benefits for members.

The Unit also manages the Clinical Utilization Review Board (CURB), an advisory board comprised of ten members with diverse medical experience appointed by the Governor upon recommendation by the DVHA Commissioner. The CURB examines existing medical services, emerging technologies, and relevant evidence-based clinical practice guidelines, and makes recommendations to DVHA regarding coverage, unit limitations, place of service, and appropriate medical necessity of services in Vermont's Medicaid programs. DVHA retains final authority to evaluate and implement the CURB's recommendations.

Clinical Integrity

The Clinical Integrity Unit (CIU) consists of licensed mental health clinicians, who work to ensure that Vermont Medicaid members receive quality services at the appropriate level of care. The CIU is responsible for the utilization management of mental health and substance use disorder services; the team works toward the integration and coordination of services provided to Vermont Medicaid members with substance use disorders and mental health needs. The team also administers the federally required lock-in program, Team Care, designed to prevent diversion, misuse, and abuse of medications. The Vermont model has a case management approach and ensures a member is receiving services from a single prescriber and a single pharmacy. In addition, the Autism Specialist authorizes applied behavior analysis (ABA) services for children.

Pharmacy Unit

The DVHA Pharmacy Unit manages pharmacy benefits for members enrolled in Vermont's publicly funded pharmacy benefit programs to ensure members receive medically necessary medications in a timely, cost-effective manner. The team works closely with DVHA's contracted pharmacy benefit manager (PBM). Collaborative responsibilities include facilitating claims processing, determinations for prior authorization requests, management of the preferred drug list (PDL), rebate pricing and negotiations, and assisting members with problems or complaints. The PBM manages a call center staffed with pharmacists and pharmacy technicians who respond to providers who have pharmacy claims processing issues and prior authorization questions. The PBM also offers a secure provider portal to pharmacists and prescribers. This portal provides the ability to query member information, provide electronic submissions of prior authorizations (PA), and see status updates of PA request submissions.

The Unit enforces claim rules in compliance with federal and state laws, implements legislative and operational changes to the pharmacy benefit programs, and oversees all federal, state, and supplemental drug rebate programs. In addition, the Pharmacy Unit and its PBM partner work together to manage DVHA's preferred drug list (PDL), pharmacy utilization management programs, and drug utilization review activities focused on promoting rational prescribing in alignment with evidence-based clinical guidelines.

The Pharmacy Unit manages the activities of the Drug Utilization Review Board (DURB), an advisory panel consisting of physicians, pharmacists, and community health practitioners across Vermont who meet seven times per year. Members evaluate drugs based on clinical appropriateness and safety with consideration for net cost to the state. The DURB reviews new drugs for clinical management and PDL status. The DURB votes on changes to be made to the Vermont Medicaid PDL.

Pay Health Care Providers for Delivering Health Care to Medicaid Members

The Department works to enroll health care providers in Medicaid. These providers accept Medicaid insurance and provide medical treatment to Vermonters who have Medicaid for their health insurance. The Department pays providers for caring for Medicaid patients. The Department is the "payer" of Medicaid "claims", or bills, for health care services.

Member and Provider Services (MPS) Unit

The Department's Member and Provider Services Unit ensures that Vermont Medicaid members have access to appropriate health care for their physical, mental, and dental health needs. The goal of the Member and Provider Services Unit is to ensure that members are informed, their issues are addressed promptly, and they are satisfied with the answers received. The Customer Support Center is the point of initial contact for members' questions and concerns. Members' calls may be forwarded to Member and Provider Services staff for additional information/review if questions or concerns remain after contact with the Customer Support Center.

Member issues may come to DVHA's attention in many ways, from members themselves, the Governor's Office, the AHS Secretary's Office, from legislators, from Vermont Legal Aid, and from the provider community. Member and Provider Services staff promptly respond to members' needs, no matter the entry point, and deliver the necessary information in a manner that reduces confusion and increases understanding wherever possible.

The Member and Provider Services Unit (MPS) coordinates benefit and collection practices with providers, members, and other insurance companies to ensure that Medicaid is the payer of last resort. The Unit also works diligently to recover funds from third parties where Medicaid should not have been solely responsible.

Medicaid Management Information System (MMIS) Program

The goal of the MMIS Program is to modernize and integrate a configurable, interoperable system that will be compliant with the Centers for Medicare and Medicaid Services (CMS) Conditions and Standards. An operational MMIS efficiently and securely shares appropriate data (beneficiary, provider, clinical, etc.) with Vermont agencies, providers, and other stakeholders. The MMIS Program also has oversight of the MMIS core claims processing contract with the State's vendor, Gainwell Technologies.

Payment Reform Unit

The Payment Reform Unit transitions Vermont Medicaid's health care revenue model from fee-for-service payments based on volume to alternative payment models based on value. The goals are to improve quality of care, improve the health of Vermont's population, reduce growth in the cost of care (known collectively as the "Triple Aim"), and improve the integration of care and services for Vermonters.

The Payment Reform Unit is a resource for internal and external stakeholders to explore potential payment options and to plan, design, implement, test, and evaluate alternative payment models. Because of the complexity of this work, payment reform benefits from systematic processes. AHS and DVHA have developed and refined processes to foster consistent and effective approaches to payment reform.

Rate Setting

The Division of Rate Setting calculates Medicaid rates for residential services provided by Vermont nursing homes, out-of-state nursing homes, and residential facilities for youth called Private Non-Medical Institutions (PNMIs). Rate Setting sets unique rates for each facility based on that facility's historical costs. The Unit consists of a team of financial auditors, accountants, and technical professionals who perform annual audits to determine which costs are included in the rate calculation in alignment with regulation.

The Division has rules governing the processes for setting the Medicaid rates of each different type of facility. The nursing home Medicaid rates are established pursuant to Methods, Standards, and Principles for Establishing Medicaid Payment Rates for Long-Term Care Facilities, referred to as V.D.R.S.R. PNMI rates are established pursuant to the Methods, Standards, and Principles for Establishing Payment Rates for Private Nonmedical Institutions Providing Residential Child Care Services, referred to as P.N.M.I.R.

Reimbursement

The Reimbursement Unit oversees rate setting, pricing, provider payments, and reimbursement methodologies for a large array of services provided under Vermont's Medicaid Program. The Unit works with Medicaid providers and other stakeholders to support equitable, transparent, and predictable payment methodologies to ensure efficient and appropriate use of Medicaid resources. The Reimbursement Unit is primarily responsible for implementing and managing prospective payment reimbursement methodologies developed to align with CMS Medicare methodologies for outpatient, inpatient, and professional fee services.

The Unit also oversees a complementary set of specialty fee schedules, including, but not limited to, durable medical equipment, ambulance, clinical laboratory services, physician-administered drugs, dental, home health, hospice, and anesthesia. The Reimbursement Unit also manages the Federally Qualified Health Center (FQHC) and Rural Health Clinic (RHC) payment process as well as supplemental payment administration, such as for Disproportionate Share Hospital (DSH) and Graduate Medical Education programs.

The Unit is involved with addressing the individual and special circumstantial needs of members by working closely with clinical staff from within DVHA and partner agencies to ensure that needed services are provided in an efficient and timely manner. The Reimbursement Unit works collaboratively on reimbursement policies for specialized programs with AHS sister departments, including the Department of Disabilities, Aging, and Independent Living (DAIL), the Vermont Department of Health (VDH), the Department of Mental Health (DMH), and the Department for Children and Families (DCF).

Spend Taxpayer Dollars Wisely by Running an Effective, Efficient Department

The Department is focused on spending taxpayer dollars responsibly. We strive to run an effective, efficient department, using resources wisely and improving whenever possible. Many of the following units work across the entire Department.

Admin/Operations/Office of Change Management

The Administrative Services Unit works to achieve consistency in administrative processes and procedures across the Department, focusing on customer service and support for all staff. The team has worked on various initiatives to improve workforce culture, onboarding, offboarding, position management, and performance evaluations.

The Administrative Services Unit is responsible for operations, including managing building concerns, floor plans, ergonomic assessments, space planning, and departmental records retention policies. The team is also responsible for safety and security for the Department,

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

including emergency procedure plans and continuity of operations planning (COOP), and assisting with telecommunication needs/issues and hardware/software purchases.

Business Office

The DVHA Business Office supports, monitors, manages, and reports all aspects of fiscal planning and responsibility for the Department. The Unit includes Accounts Payable/Accounts Receivable (AP/AR), Grants and Contracts, Fiscal Analytics, and Programmatic Accounting and Compliance.

Areas of responsibility include provider and drug manufacturer assessment billing and receipts, vendor payments, and financial monitoring; procurement, maintenance and compliance for all DVHA-funded contracts and grants; analysis and preparation of the programmatic budget, financial reporting in alignment with federal and state regulations, research requests, and monitoring of program operations.

Commissioner's Office

The Commissioner and the senior management team provide management oversight and strategic direction for DVHA and all of its component units. The two Deputy Commissioners, the Director of Managed Care Operations, the General Counsel, the Chief Medical Officer, the Chief Financial Officer, the Director of the Special Investigations Unit and the Director of Communications and Legislative Affairs are among the Commissioner's direct reports. This Office produces the Department's annual programmatic budget and ensures that DVHA maintains its focus on furthering the Governor's priorities through its work in managing the integrated eligibility and enrollment process for Medicaid and commercial health insurance plans for vulnerable Vermonters. The Office also manages communications and tracks legislative priorities for the Department and coordinates legislative testimony.

Data Unit

The Data Management and Analysis Unit provides data analysis, distributes Medicaid data extracts, and reports to regulatory agencies, the legislature, and other stakeholders and vendors. The Unit delivers mandatory federal reporting to the Centers for Medicare and Medicaid Services (CMS), delivers routine Vermont Healthcare Claims Uniform Reporting and Evaluations System (VHCURES) data feeds, develops the annual Healthcare Effectiveness Data and Information Sets (HEDIS) data extracts for quality reporting, delivers weekly medical and pharmacy claims files and monthly eligibility records to support Care Coordination for the Vermont Chronic Care Initiative (VCCI), and provides ad hoc data analysis for internal DVHA divisions and other AHS departments and state agencies. The Unit continues to support the AHS Central Office with CMS monitoring and evaluation measures for our Global Commitment 1115 Waiver, Substance Use Disorder Demonstration, and Serious Mental Illness & Serious Emotional Disturbance Demonstration.

The Data Unit supports AHS and DVHA initiatives around performance measures, performance improvement projects, and pay-for-performance initiatives. The Unit is actively engaged in Performance Improvement Projects (PIPs) aimed at improving several HEDIS measures: Controlling High Blood Pressure (CBP) and Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (IET). Analysts supporting these projects analyze eligibility and claims records while collaboratively designing, developing, and implementing change processes to encourage beneficiary and provider coordination and cooperation.

Legal Unit

The DVHA Legal Unit is responsible for the legal affairs of the Department. DVHA Legal ensures department-wide consistency in legal approaches and regulatory compliance; provides legal advice and counsel to the different units within DVHA; and provides strategic planning and policy direction on emerging legal issues to promote and uphold DVHA's mission to improve the health and well-being of Vermonters by providing access to quality health care cost-effectively. This includes coordination with the legal efforts of attorneys in other departments at the Agency of Human Services and the Office of the Vermont Attorney General.

Oversight and Monitoring Unit

The Oversight & Monitoring (OMU) Unit is responsible for ensuring the effectiveness and efficiency of departmental control environments, operational processes, regulatory compliance, and financial and performance reporting in line with applicable laws and regulations. The OMU facilitates communication and collaboration between State staff, leadership, Federal and State Auditors, and independent Auditors, including but not limited to Federal and State partners such as the Centers for Medicare & Medicaid Services (CMS), the Office of Inspector General (OIG), the Medicaid Fraud & Residential Abuse Unit (MFRAU) of the Attorney General's (AG) Office, State's Attorney's Office, Medical Practice and Licensing Boards, Drug Enforcement Administration (DEA) and other Law Enforcement Offices.

The OMU includes Healthcare Program Oversight & Monitoring (O&M), PERM Audit facilitation, HealthCare Quality Control (HCQC & MEQC) Case reviews and Promoting Interoperability/EHR Incentive Program audits.

Policy Unit

The Medicaid Policy Unit works to ensure that DVHA and other AHS departments administer the Medicaid program in compliance with federal and state regulations. Additionally, the Policy Unit works with AHS staff and other public and private partners to develop and implement effective Medicaid policy aimed at advancing the Agency's goals of improving access and quality while reducing overall costs.

The primary functions of the Unit include policy development and implementation, Medicaid legislative coordination, Medicaid administrative rulemaking, policy research and analysis, and the administration of the following: 1115 Global Commitment to Health Waiver; Medicaid State Plan; Global Commitment Register[1]; and PBR (Policy, Budget, Reimbursement) Process.

Compliance Unit

The Compliance Unit is responsible for monitoring and maintaining our compliance with federal Managed Care Medicaid regulations. This work includes risk assessments, coordinating the External Quality Review Organization compliance audit and consultation/coordination with Medicaid programs across AHS. The Compliance Unit also convenes meetings of the Regulatory Compliance Committee in collaboration with the Quality Unit and the Monitoring and Oversight Unit.

Quality Improvement Unit (QIU)

---

[1] https://dvha.vermont.gov/global-commitment-to-health

The Quality Improvement Unit (QIU) collaborates with AHS partners to develop a culture of continuous quality improvement, maintain the Vermont Medicaid Quality Plan and Work Plan, coordinate quality initiatives including formal performance improvement projects, and coordinate the production of standard performance measures. The Unit is the DVHA lead unit for the Results Based Accountability (RBA) methodology and produces the DVHA RBA Scorecards.

The QIU also partners with the Compliance and Oversight & Monitoring Units as part of the larger Risk & Quality Management Team in order to create a culture of proactive regulatory compliance and continuous quality improvement; to identify, analyze, prioritize and correct compliance risks across all departments and programs responsible for Medicaid service delivery; to take advantage of opportunities to move beyond compliance and identify ways to improve the services DVHA delivers to Vermonters; and to coordinate the production and/or analysis of standard performance measures pertaining to all Medicaid enrollees, including the special health care needs populations (service provision delegated to intergovernmental agreement [IGA] partners).

Special Investigations Unit (SIU)

The Special Investigations Unit (SIU) works to establish and maintain integrity within the Medicaid Program and engages in activities to prevent, detect, and investigate Medicaid provider and beneficiary fraud, waste, and abuse. The SIU ensures that services were provided as billed and were medically necessary and strives to educate providers when deficiencies and incorrect billing practices are identified. The Unit's overall goal is to protect the integrity of Medicaid funds to ensure taxpayer dollars are spent on the health and welfare of the recipients.

Annual Report: Changes in 2022

The Department of Vermont Health Access reports on work completed in the past year in its annual report. The following pages describe our service to Vermonters in the context of our core responsibilities and priorities.

Effects of the COVID-19 Pandemic

The COVID-19 pandemic caused seismic shifts in health care in Vermont and around the globe. During State Fiscal Year 2022, which ran from July 1, 2021, through June 30, 2022, the Department worked continuously to respond to the needs of Vermonters, health care providers, and to comply with Federal regulation. During the pandemic, the Federal government passed laws to make it easier for people to stay insured and to get, or access, health care. Aligning with these laws helped Vermonters and was a significant priority for the Department during State Fiscal Year (SFY) 2022.

The Federal Public Health Emergency

During the pandemic, the Federal Government declared a Public Health Emergency. The public health emergency was in effect throughout SFY 2022 and is still in effect. The public health emergency began in response to the COVID-19 pandemic and provided flexibility to states to keep people covered by health insurance and to simplify access to health care services. These policies included:

1) Keeping people on Medicaid, even if they were no longer eligible;
2) Coverage without cost sharing of all services, drugs, tests, and vaccines for the treatment and prevention of COVID-19;
3) Allowing legally responsible individuals to deliver Children's Personal Care Services;
4) Allowing legally responsible individuals to deliver Developmental Disabilities Services Division Personal Care Services; and
5) Expanded the use of telehealth by offering providers guidance on allowable telehealth uses and by permitting services delivered by audio-only

Medicaid Continuous Coverage

Since the spring of 2020, Medicaid agencies have been required to keep people on Medicaid with a few exceptions. So, Vermonters have remained on Medicaid, even if they no longer qualify. This protection, called continuous coverage, has been in place to help ensure as many people as possible keep their health insurance and access to health care during the pandemic. Since January of 2020, an additional 36,654 Vermonters have been covered by Medicaid.

Continuous coverage was a requirement under federal law and was expected to stay in place until the end of the Federal COVID-19 Public Health Emergency. Recently, the federal law changed. Instead of waiting for the end of the Public Health Emergency to begin "unwinding," this process will start in the spring of 2023 (whether or not the federal government continues to extend the Public Health Emergency).

DVHA has been preparing for the end of Medicaid continuous coverage. It has made a Medicaid "unwind" plan. "Unwinding" from continuous Medicaid coverage means checking whether Vermonters still qualify for Medicaid programs. This process, called redetermination, uses both data to automatically check if people are still eligible and direct outreach to Vermonters on Medicaid to help determine whether they are still eligible.

In 2022, the Department worked closely with the Federal Government and with the Centers for Medicare and Medicaid Services (CMS), the branch of the Federal Government that develops health policy, to plan its strategy and operations for the unwind.

To help these Vermonters stay insured, we are asking partners, advocates, providers, and friends to help spread the word. Many Vermonters will need to take action to continue to have health insurance coverage when the Department begins unwinding. Find the details of the current plan for the "unwind" here: https://dvha.vermont.gov/unwinding

Telemedicine, Audio-only, and Technology-based Triage Consultations

In 2022, Vermont Medicaid continued to follow the telehealth guidelines implemented at the beginning of the Public Health Emergency (PHE) to support Medicaid-enrolled providers delivering services to Medicaid members. The Department has filed amendments to the Health Care Administrative Rule on Telehealth in preparation for the period following the end of the federal COVID-19 public health emergency. Rule revisions include:

- Expanding remote patient monitoring to include Medicaid members that have a diabetes or hypertension diagnosis
- Adding audio-only as a covered telehealth modality for delivering health care services that are medically necessary and clinically appropriate, based on Medicare's Telehealth Services list.

The Department is also working on post-PHE telehealth guidance for providers to be released in advance of the end of the PHE. Read more in the Vermont Medicaid Payments for Telephonic Services Furnished During the Emergency Response to COVID-19.[2]

Changes in Clinical and Pharmacy Prior Authorizations Following the State of Emergency Ending in Vermont

In, 2022, Vermont Medicaid continued to use flexibilities allowed by the Federal government to ensure Vermonters' access to care during the federal COVID-19 public health emergency. The Department uses prior authorizations to determine whether a particular service is medically necessary and covered by Medicaid. Prior authorizations are still required for services with the potential to cause imminent harm[3], services found on the Fee Schedule indicating a prior authorization is required,[4] and for items not found on the Waived Prior Authorization List (updated October 28, 2021).[5]

Advancing Value-Based Payment Programs

Value-based payment programs pay for Medicaid-covered health care in a new way, resulting in predictability and flexibility of payments for providers and for DVHA and quality of care for Medicaid members. Instead of paying providers solely for the number of services they deliver (e.g., for each test, office visit, hospital stay, and procedure), value-based payment programs link payment to quality, pay differently for services or for entire or selected populations of patients, or do both. An important element of value-based payment is regularly monitoring cost, coordination, volume, and quality of care to support all Medicaid members having access to the services they need.

Progress on value-based payment could not occur without the commitment and collaboration of health care providers, people who receive services, advocates, regulators, and policymakers. The goal of value-based payment is to design payments that support an integrated system of care that provides high-quality services throughout the lifespan of Medicaid members.

DVHA has prioritized value-based payment since at least 2014. The largest value-based payment initiative is the Vermont Medicaid Next Generation (VMNG) Accountable Care Organization (ACO) program, which makes prospective payments to providers who have voluntarily joined together in an ACO. The payments cover a wide range of health care services for most of Vermont's Medicaid members.

In addition to the VMNG ACO program, DVHA is in various stages of value-based payment planning, design, implementation, and evaluation for the following programs:

- Adult and Children's Mental Health Services (with Department of Mental Health [DMH])
- Applied Behavior Analysis Services for Children with Autism
- Children's Integrated Services (with Department for Children and Families [DCF])
- Developmental Disability Services (with Department of Disabilities, Aging, and Independent Living [DAIL])
- High-Technology Nursing Services (with Vermont Department of Health [VDH] and DAIL)
- Inpatient Mental Health Services at the Brattleboro Retreat (with DMH)
- Residential Substance Use Disorder Services (with VDH's Division of Substance Use)

The following dashboard provides a brief summary of each of these initiatives[6]:

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

	PLANNING	DESIGN	IMPLEMENTATION	EVALUATION	Program Launch & Model Description
Vermont Medicaid Next Generation ACO Program (DVHA)				★	• Program launch in 2017 • Monthly prospective population-based payments with financial reconciliation • Includes value-based incentive fund
Mental Health Payment Reform (DMH)			★		• Program launch in 2019 • Monthly per person case rate; varies by agency • Caseload reconciliation • Encounter data submission • Value-based payment out for CMS approval
Residential SUD Program Payment Reform (DSU)			★		• Program launch in 2019 • Episodic payment per residential stay • Payments vary by SUD diagnosis • Value-based payment out for CMS approval
Applied Behavior Analysis Payment Reform (DVHA)				★	• Program launch in 2019 • Monthly bundled payments by tiers based on level of service, with financial reconciliation • Value-based payment out for CMS approval
Developmental Disability Services Payment Reform (DAIL)		★			• Interim payment methodology implemented • Encounter data submission • Standardized assessment underway • Value-based payment out for CMS approval
Children's Integrated Services Payment Reform (DCF)			★		• Program launch in 2020 • Per person per month bundled payment • Encounter data submission implemented • Monitoring program under development
High-Technology Nursing (VDH and DAIL)			★		• Program launch in 2022 • Hybrid model: prospective monthly payment + reduced FFS payments; financial reconciliation • Value-based payment out for CMS approval
Brattleboro Retreat Alternative Payment Model (AHS, DMH, DVHA)			★		• Program launch in 2021 • Monthly prospective payments for inpatient services • Financial reconciliation • Robust performance measurement framework

The federal government's Centers for Medicare and Medicaid Services (CMS) has also prioritized value-based care. CMS has set a goal for 50% of Medicaid payments to be in the form of advanced value-based care models by 2030. Vermont has already exceeded that goal.[7]

Specific accomplishments in advancing value-based payments in 2022 included the following:

1. Successful implementation of Year Five (2021) of the Vermont Medicaid Next Generation (VMNG) Accountable Care Organization (ACO) program, and successful negotiation of the 2022 contract for the program.

2. Supporting DAIL in implementing a standardized tool to assess needs for people receiving developmental disability services, and in collecting data to identify services provided by designated mental health and specialized service agencies.

3. Implementation of a new payment reform program for home health agency High-Technology Nursing Services for children and adults, with VDH and DAIL.

4. Development of value-based payment performance frameworks for several payment reform initiatives. Each of these is described in more detail below.

1. 2021 Results for the Vermont Medicaid Next Generation Accountable Care Organization Program

Calendar year 2021 was the fifth full year of the VMNG ACO program. DVHA negotiates an ACO contract annually, currently with OneCare Vermont. The ACO and its network of providers

---

[7] Medicaid Delivery System Reform Report (Submitted January 15, 2021): https://legislature.vermont.gov/assets/Legislative-Reports/Delivery-System-Reform-Report-2021-to-Leadership-2021-01-06-002-v2.pdf

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

agree to be accountable for the cost and quality of comprehensive health care services for Medicaid members who are attributed to the ACO (in 2022, more than 80% of Medicaid members were attributed). The overall results page for the [VMNG program can be found here](#)[8]. Recent program results indicate:

A. Participation in the Vermont Medicaid Next Generation ACO program is stable.

The number of communities participating in the VMNG program has remained unchanged since 2020 and attribution has remained stable or continued to increase. About 5,000 providers throughout Vermont are part of the ACO network in 2022, and about 126,000 Medicaid members are attributed.

B. The program promoted shared financial accountability between the ACO, its participating providers and Medicaid.

For 2021, DVHA and OneCare Vermont agreed on the price of health care for attributed Medicaid members up-front. Spending for ACO-attributed Medicaid members was less than expected. DVHA and OneCare's provider network will share in the savings; DVHA will issue OneCare a financial reconciliation payment of approximately $7.1 million for 2021.

C. The VMNG Program promoted quality accountability for the ACO's provider network in 2021.

The VMNG measure set for 2021 contained 10 payment measures and 3 reporting measures related to care for chronic illness, mental health and substance use disorder treatment, preventive care, and patient experience of care. Results for 2021 showed the following:

- OneCare's providers earned a total of 13.75 out of 20 possible points for the payment measures, yielding a quality score of 68.75%.
- Of the 9 measures with national benchmarks, OneCare providers' quality performance exceeded the 90th percentile for 3 measures, exceeded the 75th percentile for 2 measures, exceeded the 50th percentile for 3 measures, and was below the 25th percentile for 1 measure.
- Based on this performance, OneCare's network providers are eligible to receive $1,576,525 in quality incentive payments through the VMNG's Value-Based Incentive Fund.

D. The VMNG ACO Program and other payment reform initiatives have played a significant role in stabilizing health care providers during the COVID-19 Public Health Emergency.

The VMNG ACO program, and some of the other innovative payment models listed above, have played a significant role in stabilizing health care providers and hospitals during the COVID-19 Public Health Emergency. As elective visits and procedures declined during the pandemic,

---

[8] https://dvha.vermont.gov/initiatives/payment-reform/vermont-medicaid-next-generation-aco-program

providers that received fixed prospective payments in these programs were better able to withstand the loss of revenues from non-Medicaid service declines.

2. Supporting DAIL in implementing standardized assessment and data collection for individuals with intellectual and developmental disabilities.

Along with DAIL, representatives from the State, the provider network, individuals, family members, and other stakeholders have been working together on this project since 2018. The goal is to create a transparent, effective, and operationally feasible payment model for developmental disabilities services that aligns with the Agency's broader health care reform goals.

During 2021, DAIL implemented a standardized assessment tool to improve validity and reliability of needs assessments, and to assist in collecting data to inform a potential future payment model. DAIL and DVHA also collaborated to support providers in submitting data to the Medicaid Management Information System (MMIS) to reflect developmental disability services provided to individuals.

3. Implementation of new High-Technology Nursing Services payment reform Project
The Vermont Department of Health (VDH) and DAIL each manage high-technology nursing services programs: VDH for children and DAIL for recipients over the age of 21. These programs offer in-home nursing care for individuals with complex medical needs and provide critical support for their choice to remain in their homes and communities. The High-Technology Nursing Services payment reform initiative is focused on services provided by Vermont's home health agencies and visiting nurse associations.

Nursing shortages and the complexity of the services involved can make it challenging for home health agencies to provide staffing for all authorized hours. In response to these challenges, VDH and DAIL have engaged with providers, advocates, individuals receiving services, and families to develop a multi-faceted approach to address individuals' needs for and access to high-technology nursing services. One component of the multi-faceted approach is the development of a new payment model with the goal of improving access to authorized services. A hybrid payment model consisting of an up-front monthly payment and fee-for-service payment was implemented in January 2022 and a value-based payment component was designed during 2022 for implementation in 2023, as described in the next section.

4. Development of value-based payment performance frameworks for several payment reform initiatives.

In 2022, leveraging a federal funding source (enhanced federal match for home- and community-based services), DVHA led efforts to incorporate provider payments based on quality in several payment models. The VMNG ACO has a mature quality framework that incorporates payment for performance, and the Adult and Children's Mental Health program has a quality framework in earlier stages of development that was strengthened in 2022. In addition, performance frameworks were designed for the Applied Behavior Analysis, Residential

Substance Use Disorder, High-Technology Nursing Services, and Developmental Disability Services programs.

The process for designing these frameworks generally includes the following activities:

- Identify potential measures in various domains reflecting goals of project,
- Assess baseline performance,
- Establish proposed targets,
- Develop proposed scoring methodology, including weighting of measures,
- Seek input from providers and other stakeholders,
- Refine proposal in response to feedback,
- Post for public comment,
- Obtain state and federal approval, and
- Implement framework.

These proposals are now with the federal government for review and approval, with implementation planned for 2023.

Modernizing Information Technology Infrastructure

Our goal is to implement and use flexible, responsive information technology systems in the face of changing customer expectations, a shifting federal landscape, and advances in the health care industry. Modern, effective technology solutions support signing up for health insurance, paying health care claims, and accessing health information.

Effective, secure, and reliable technology is required for the Agency of Human Services (AHS) to administer Vermont's Medicaid program efficiently, with financial integrity, and in compliance with federal and state law. This work inherently involves multiple entities in order to implement technology that meets these objectives on time and on budget. These entities include the Agency of Digital Services, and the Secretary's Office, Department of Vermont Health Access, and Department for Children and Families, all under the umbrella of the Agency of Human Services.

The Department of Vermont Health Access is currently engaged with large-scale information technology projects: the Medicaid Management Information System (MMIS) and the Integrated Eligibility & Enrollment (IE&E) program, both of which are designed improve the experience of applicants/enrollees, staff, and providers. The Department is taking a modular approach to these projects to deliver improvements incrementally over time. Dividing these projects into smaller pieces reduces financial risk to the State, allows for more frequent improvements, and results in a system that is more adaptable to regulatory changes, technological innovation, and consumer expectations.

Modern Data Analytics and Reporting (MDAR)

In 2022, DVHA initiated and completed a modern data analytics and reporting (MDAR) project under the Integrated Eligibility and Enrollment Program. This project replaced Vermont Health Connect (VHC)'s hosted Oracle Business Intelligence Enterprise Edition reporting platform with a Software as a Service (SaaS) reporting platform.

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

Streamlined reporting is critical to eligibility and enrollment operations. The previous reporting system did not adequately deliver up-to-date reporting information, nor meet service level agreements (SLA) for Federal requirements. The new system is better able to serve Vermonters.

This MDAR project enlisted a reporting vendor to implement a SaaS model of a suitable reporting platform. The project was completed in the fall of 2022 and has dramatically increased data availability and reduced resource constraints.

Medicaid for the Aged, Blind and Disabled Compliance

Under the Integrated Eligibility and Enrollment Program, DVHA completed several projects related to Medicaid for the Aged, Blind and Disabled (MADB) populations in 2022. The first project provided an online option to improve the process Vermonters use to apply for MABD benefits and to meet Federal requirements. The MABD online application was made available for self-service for new applicants or enrollees transitioning from Medicaid for Children and Adults. The Department also implemented a Disaster Recovery system in the event that the document uploader and MABD online application tools are not available for Vermonters to use.

DVHA also completed a project focused on implementing an "ex parte" renewal process for MABD enrollees and streamlining the renewal process for those who can't renew "ex parte." In an "ex parte" redetermination, the State of Vermont performs eligibility redetermination based on available electronic information, thus easing the burden on enrollees. Automatic renewals save Vermonters from filling out a new application every year and save application processing time for State of Vermont staff.

Medicaid Data Warehouse and Analytical Solution (MDWAS)

The MDWAS solution will leverage new and existing technologies to improve access, security, integrity, and utility of the State's Medicaid data for AHS departments involved with Medicaid service delivery. The departments impacted include DVHA, DAIL, DMH, VDH, DCF, DOC, and the Agency of Human Services Central Office. The State anticipates contracts to be executed for this work in 2023.

The MDWAS project will integrate a new **Medicaid Data Lake (MDL)** and **Data Analytics and Reporting (DAR)** solution with the State's existing **Data Warehouse (DW)** operated by Vermont Information Technology Leaders (VITL). Enhancing the data warehouse will allow the State to reuse existing technology with a focus on extensibility, allowing stakeholders to analyze and report on aggregated Medicaid data from a single location.

Electronic Visit Verification (EVV)

DVHA, in partnership with the Department of Disabilities, Aging, and Independent Living (DAIL) and the Department of Health, has been in the process of implementing Electronic Visit Verification (EVV) for in-home services funded by Vermont Medicaid to comply with federal requirements set forth in the [21st Century Cures Act (Cures Act)](.).[9] EVV for personal care services went live on January 1, 2021. EVV for Home Health Agencies went live on December 1, 2022. EVV provides validation of services delivered to ensure correct benefits are accounted

---

[9] https://dvha.vermont.gov/initiatives/electronic-visit-verification

for and paid for. This includes where and when services were delivered. This provides validation from a health care service delivery perspective and from a Medicaid funding perspective.

Patient Access Interoperability

Patient Access Interoperability (PAI) is a federal requirement for state Medicaid programs and is included in the CMS Interoperability Rule. The PAI project implements technology that allows patients easy access to their claims, clinical, and provider data through a third-party application. This will improve a member's experience and support patients with additional information to make informed decisions regarding their healthcare.

Third-party applications went live in July 2022 with claims and pharmacy data. Clinical data will go-live in May 2023.

Successfully Transitioning Health and Dental Plan Premium Responsibilities to the Commercial Insurance Issuers

Customers of Vermont's health insurance marketplace experienced a <u>change</u> in who they pay for their 2022 health and dental insurance.[10] Previously, customers paid one monthly bill to Vermont Health Connect. Beginning with 2022 health and dental plans, customers are sending separate payments directly to their insurance companies. This transition – referred to as the Premium Processing project, under the Integrated Eligibility and Enrollment program – was a result of customer requests to pay their insurance company directly, removing the State of Vermont from the financial relationship between a Vermonter and their insurance company. This project involved significant information technology work to change our current system and a robust communication plan.

The Premium Processing project's communication campaign asked customers to stop paying Vermont Health Connect. The campaign had over a 98% success rate – only 284 customers attempted to send payments to Vermont Health Connect for their 2022 health and dental insurance.

Health Insurance Subsidies

In 2021, the federal American Rescue Plan Act significantly expanded federal subsidies to make health coverage more affordable for Vermonters enrolled through the State's marketplace:

- **Increased Premium Tax Credit:** This tax credit reduces the percentage of household income that customers are expected to pay toward health insurance premiums (i.e., the federal tax credit amount available increased). For example, the new contribution limits fully subsidize certain qualified health insurance for households with income up to 150% of the Federal Poverty Level (FPL). It also caps payments on the benchmark plan premium at 2% of household income for those up to 200% FPL, and 8.5% for those at 400% FPL (the Affordable Care Act's upper limit for Premium Tax Credit eligibility).
- **Cliff removal:** This removes the premium subsidy "cliff" of 400% FPL by making the Premium Tax Credit available for households of any income level, calculated based on an 8.5% contribution limit for the benchmark plan premium.

---

[10] https://info.healthconnect.vermont.gov/premiums

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

In 2022, there was uncertainty regarding federal continuation of expanded health insurance subsidies. In August, the Inflation Reduction Act extended these subsidies through 2025. The Department updated its eligibility system to ensure these subsidies would remain available to Vermonters. In addition, the Department updated the eligibility system to make it possible for more Vermonters with access to employer-sponsored coverage to obtain these subsidies. The federal government eliminated the "family glitch" which previously blocked some families from subsidy eligibility.

Process changes, system changes, and robust communication were required to support a successful implementation of these subsidies.

In 2022, the Department launched an additional decision tool, the "Affordable Employer Coverage Tool for Marketplace subsidy eligibility"[11] to help Vermonters understand their employer sponsored insurance affordability as it relates to the Family Glitch.[12]

Immigrant Health Insurance Plan (IHIP)

IHIP officially began on July 1, 2022. IHIP is a state-funded health care program for children under age 19 and pregnant people who have an immigration status for which Vermont Medicaid is not available (except for Emergency Medicaid). IHIP was created by Act 48 of 2021.

IHIP Launched July 1, 2022

There are two ways to apply for IHIP: (1) using the Medicaid application and (2) using the IHIP application. A person who applies using the Medicaid application will get both Emergency Medicaid *and* IHIP if they meet the rules. If this person is pregnant, the baby will get Medicaid as soon as they are born. The baby won't need a separate application. A pregnant person who uses the IHIP application will need to apply for Medicaid for their baby after the baby is born. IHIP pays for the same health care regardless of which application is used.

The department promulgated new administrative rules for IHIP, created a new health care application specific to IHIP, translated multiple IHIP documents into Spanish, including the new IHIP application, and created two new aid category codes in its IT systems. These new codes link this program to a state-only funding source. These codes also allow the state to comply with the additional confidentiality requirement in the statute for IHIP at 33 V.S.A. 2092(c).

State Fiscal Year 2022 Provider Funding Opportunity for IHIP (Act 48 of 2021)

The Department implemented the provider funding opportunity for state fiscal year 2022 in accordance with the requirements of Act 48 of 2021 in phases. The funding opportunity was to pay health care providers for delivering health care services to pregnant individuals and children who are eligible for Medicaid except for their immigration status. Although the provider funding opportunity took some time to operationalize, at the end of state fiscal year 2022 there were seven (7) agreements executed with a total paid claims amount of $30,936.83 eligible for funding from July 1, 2021, through June 30, 2022 as a bridge to the

---

[11] https://vt-affordabilityestimator.checkbookhealth.org/#/
[12] https://info.healthconnect.vermont.gov/learn-more/financial-help/family-glitch

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

state-funded program (the Immigrant Health Insurance Plan) that began July 1, 2022. This provider funding is paid in the form of grants.

Agreements Executed to Date:

- **Gifford Health Care** – Covering all Gifford Health Care providers.
- **North Country Hospital** – Covering all North Country Hospital providers.
- **Northeastern Vermont Regional Hospital** – Covering all Northeastern Vermont Regional Hospital providers, as well as Northern Counties Health Care primary care and dental providers.
- **Northwestern Medical Center** – Covering all providers in the Health Service Area, including the hospital, primary care, pediatric, and obstetrics/gynecology (OB-GYN).
- **Southwestern Vermont Health Care** – Covering Southwestern Vermont Health Care providers.
- **University of Vermont Health Network** – Covering providers under the UVM Health Network umbrella
- **Brattleboro Memorial Hospital** – Covering all Brattleboro Hospital providers.

All communications about the Act 48 Provider Funding Opportunity were designed to promote that Medicaid is available to pay for emergency care, if people are eligible. These messages were developed following testimony during the 2021 legislative session, as information about these programs was not known broadly. Examples of these messages are shown below.

Emergency Medicaid is Still Available:
Although some people have an immigration status that means they can't get Medicaid, they may be able to have their emergency care paid.

What is an emergency?
Labor and delivery if you are pregnant;
Sudden, dangerous medical problems like heart attacks or being hurt in an accident.

How does someone get emergency care paid for?
Apply for Medicaid.
If your care meets the rules, Medicaid will pay some or all of the bills.

Act 48 of 2021 IHIP Outreach Grant Opportunity

After establishing the Provider Funding Opportunity described above, the Department established outreach grants for Vermont community organizations to provide culturally and linguistically appropriate outreach and information about IHIP. Grants were awarded to two organization: (1) Migrant Justice and (2) Milk With Dignity. The grantees have developed and distributed outreach materials about IHIP in Spanish since July 2022, including an informational flyer, and both an audio and video message. The grantees have distributed information about

IHIP during farm visits and at numerous outreach events since July. These grants are funded until February of 2023.

Operational Performance Improvement

Continuous improvement is a core tenet of the Department's work. To improve, DVHA staff determine meaningful ways to measure our work, gather data and develop scorecards to monitor effectiveness. These scorecards are designed to drive clinical initiatives, business decisions, the pursuit of better customer service, a higher quality of care, and operational efficiencies.

Each of the Department's units tracks performance metrics with an emphasis on the core responsibilities of enrolling members, paying for care, and promoting health. The results can be seen across all three areas of responsibility as well as in general operations.

The Department strives for business efficiencies and uses results-based accountability (RBA) principles and tools. Along with other departments in the Agency of Human Services, DVHA uses RBA-based strategy management, the Clear Impact Scorecard, and collaboration support software to facilitate project management, data charting and public communication of results. These tools inform our continuous quality improvement work, inclusive of clinical initiatives.

The Department's Performance Accountability Scorecard can be found here: https://embed.clearimpact.com/Scorecard/Embed/77812.

Specific examples of quality performance improvement activities are below.

Performance Improvement Project (PIP) on Managing Hypertension

Vermont Medicaid routinely assesses health outcomes for the populations we serve. This is done in part by producing key quality performance measures and analyzing our results. When this analysis indicates opportunities for improvement, as was evident with our performance on a quality measure focused on controlling high blood pressure (https://app.resultsscorecard.com/Measure/Embed/100157136), we partnered with key stakeholders on new strategies and communication.

CBP: Controlling High Blood Pressure (GC-22)
Data Source: Healthcare Effectiveness Data & Information Set (HEDIS) - Hybrid Specification starting 2014

Legend: Current Target Value, Current Actual Value, Trend, Labels
In 2020, we joined forces with the Vermont Department of Health and OneCare Vermont to launch a project focused on management of hypertension (HTN). The annual reported rate in the graph captures activity during the previous calendar year. The drop in the 2021 rate is attributed to the decline in overall office visits during the height of the public health emergency in calendar year 2020. It returned to its pre-pandemic level the following year.

In 2022, our project strategies revolved around making blood pressure (BP) cuffs accessible and affordable, encouraging patients to join educational workshops that promote the importance of self-monitoring BPs and raising awareness amongst providers about measuring, diagnosing and documenting these BP readings in patient charts. Our team hopes that these interventions will enhance both care management and quality measure data collection.

Quality Improvement (QI) Project: Foster Care Learning Collaborative

DVHA is leading a QI project focused on improving the timeliness of care for children and youth entering foster care. Partners include DCF, VDH, and the Vermont Child Health Improvement Program (VCHIP). The project is part of a larger CMS-sponsored Learning Collaborative. In 2022, the QI team worked closely with one district to test a change to their process. If successful, the team will spread that change as a best practice to other districts.

Quality Management: Comprehensive Risk Assessment

Staff from DVHA's Quality, Oversight & Monitoring and Compliance Units have developed a comprehensive risk assessment process for Vermont's Medicaid program. The purposes of this work are to:

- o identify, analyze, prioritize and correct compliance risks across all departments and programs responsible for Medicaid service delivery; and
- o take advantage of opportunities to move beyond compliance and look for ways to improve the services we deliver to Vermonters.

The assessment entails collaboration with other Agency departments. This project launched in 2022 and has already realized progress towards its goals, as well as informed other regulatory work within the Department.

Pharmacy Prior Authorizations

In 2022, DVHA worked to ensure prior authorizations for pharmacy were processed accurately and quickly. The average turnaround time for processing pharmacy prior authorizations (PAs) is 66 minutes.

The average length of time for processing prior authorizations for medication assisted treatment (MAT) across all 3 therapeutic classes (buprenorphine products, naltrexone products, and miscellaneous products for alcohol abstinence) and for each medication within the therapeutic classes was **30 minutes**.[13]

Prior authorizations are not required for Suboxone film, or for generic buprenorphine/naloxone combination tablets, effective 8/21/20 (moved to preferred status), unless the dose is greater than 16mg for Spokes (office-based opioid treatment) or 24mg for Hubs (opioid treatment programs). Prior authorizations are required for buprenorphine-only sublingual tablets, Sublocade, Zubsolv, buprenorphine/naloxone film (generic to Suboxone and higher in net cost to the State). For the naltrexone product therapeutic class, naltrexone tablets and Vivitrol (effective 10/01/2022) do not require a prior authorization.

Effectively Managing the Pharmacy Benefit and Pharmaceutical Spend

Each year, the Department reports to the legislature its pharmacy utilization and spend. The Pharmacy Unit managed $266 million in total gross drug spend in state fiscal year (SFY) 2022, an increase of 15% over the previous fiscal year. Gross drug spend includes what DVHA paid to pharmacies for all publicly-funded pharmacy benefit programs, including Medicaid for Children and Adults, those dually eligible for Medicare and Medicaid, and Vermont's Pharmaceutical Assistance Program (VPharm). Physician-administered drugs are typically processed through the Medicaid medical benefit, which are not reflected in the above figures. The significant spending increase in SFY 2022 was driven largely by three factors: increases in caseload and utilization, changes in drug mix, and increased costs per claim.[14]

---

[13] https://legislature.vermont.gov/assets/Legislative-Reports/MAT-Prior-Authorization-Report-1-February-2022_DVHA_FINAL.pdf

[14] Pharmacy Best Practices and Cost Control Program Report (October 30, 2022)

Program Updates

Medicaid Program Updates

One of the Department's core responsibilities is ensuring the Medicaid program offers comprehensive, high-quality health care services to Vermonters, especially those who are most vulnerable. The following pages describe changes to the Medicaid program in 2022.

Global Commitment to Health 1115 Waiver

The Global Commitment Demonstration is a partnership between the State and the Federal Government. It increases Vermonters' access to health care services, strengthens the health care system, and supports health care providers recovering from disruptions brought on by the COVID-19 pandemic.

Since 2005, in addition to providing Medicaid coverage for approximately 200,000 Vermonters, the Global Commitment Demonstration has enabled crucial funding for public health, health care, and health-related services for all Vermonters, regardless of whether they are enrolled in Medicaid or Medicare, have commercial insurance, or are uninsured. With this infrastructure in place, Vermont has nearly universal health coverage and one of the healthiest populations in the nation, despite also having one of the oldest populations.

In 2022, the Agency of Human Services and the federal Centers for Medicare and Medicaid Services (CMS) approved a new Global Commitment to Health agreement. The newly approved agreement, which will be in effect from July 1, 2022 to December 31, 2027, gives Vermont precedent-setting flexibilities that cement its role as a national leader in health care coverage and payment and delivery innovation. This approval also offers Vermont additional tools to leverage Medicaid in support of Vermont's providers as they recover from the ongoing challenges presented by the COVID-19 pandemic.

The new agreement includes:

- **More Dollars for Innovation in Vermont's Health Care System.** The new agreement grants Vermont the ability to spend 32% more than before for public health programs and services addressing social factors that influence health.
- **Flexibility to Adjust Provider Rates.** The state has flexibility to adjust provider rates so that they can continue to provide needed services to Vermonters.
- **Access to Substance Use Disorder Treatment.** Vermont is the first state in the nation able to use Medicaid funds to expand access to substance use treatment services for individuals whose income is above Medicaid limits.
- **Sustainable Support for the Lund Home.** Vermont is the first state to obtain Medicaid funding for maternal health and treatment services offered in a residential facility.
- **Access to Supportive Housing.** Vermont obtained approval to implement a pilot program that will help people covered by Medicaid secure and maintain housing based on their needs.
- **Strengthening Data Sharing.** Mental health, substance use, and long-term services providers will have access to health information technology funding for tools to manage and improve Vermonters' health.

Specifically, the renewed Demonstration provides:

Unprecedented Flexibility through:

- More Dollars to Stabilize and Promote Continued Innovation in Vermont's Health Care System.
- Budget Neutrality (BN) Adjustments to Increase Provider Rates.
- Strengthening Providers' Data Exchange Capabilities to Advance Population Health.

New and Expanded Coverage:

- Expanded Access to Substance Use Disorder (SUD) Treatment for Vermonters Above Medicaid Income Limit
- Permanent Supportive Housing Program
- Community Rehabilitation & Treatment (CRT) – No income limit
- New Peer Support Benefit for SUD and CRT
- Sustainable Funding for Lund Home
- Reimbursement of Personal Care and Life Skills Aide for Parents and
- Caretakers (BI, Children's, Developmental Services [DS])
- Choices for Care (CFC) New Life Skills Aide Benefit
- CFC: Moderate Needs Change to Clinical Criteria
- Increased Pharmacy Benefit for Low-Income Elderly Vermonters

CMS is also taking steps in this demonstration extension to reinforce and ensure that the authorized programs offering Home- and Community-Based Services (HCBS) comply with HCBS rules and regulations. Following a review of information and stakeholder feedback, CMS determined that the state's five HCBS programs do not separate case management from the direct service providers; therefore, the state is out of compliance with 42 CFR section § 441.730(b). Vermont is currently under a corrective action plan to come into full compliance by the end of 2025.

Member Experience

The Department works to ensure that we provide the best possible experience to Vermonters we serve, whether they are covered by Medicaid or buy plans on the health insurance marketplace.

As of September 2022, 270,475 Vermonters received health coverage through Vermont's state-based exchange for health insurance (Medicaid or Qualified Health Plans), or a qualified or reflective health plan directly from Vermont's health insurance carriers. More information can be found in the Department's Health Insurance Map reports: Health Insurance Maps | Department of Vermont Health Access.[15]

More than one out of three Vermonters are covered by a health plan that is administered and/or certified by the Department of Vermont Health Access (DVHA).

Health Insurance Landscape in Vermont

The Vermont Household Health Insurance Survey was conducted in 2021 and results were released in 2022. The survey found that nearly 97% of all Vermonters have health insurance, matching the state's highest insured rate on record. Almost 600,000 Vermonters are covered. The data is consistent with studies from the U.S. Census Bureau which found that, in 2020, Vermont ranked second in the nation for its percentage of people with health insurance.[16] This information will provide a great deal of insight into how the health insurance landscape may have changed and help policymakers to understand the impact of the COVID-19 public health emergency on the insured and uninsured populations.[17]

The report found, "cost is still the primary barrier to health insurance coverage for uninsured Vermonters. More than half (51%) of the uninsured identify cost as the only reason they do not have insurance, while 21% indicate cost is one of the main reasons, and 15% say it is one reason among many for being uninsured. Only 9% indicate that cost is not much of a factor in their not having health insurance coverage."

When asked about other reasons for not having health insurance coverage:

---

[16] The VHHIS result is statistically similar to the U.S. Census Bureau's Current Population Survey, which shows Vermont's uninsured rate (2.6%) ranked second to only Massachusetts (2.4%) in 2020
[17] Household Health Insurance Survey: https://www.healthvermont.gov/stats/surveys/household-health-insurance-survey

- 33% percent of uninsured Vermonters indicate they lack health insurance because they are ineligible for state health insurance coverage;
- 22% cannot afford to pay employer-sponsored insurance (ESI) premiums;
- 21% are not interested in insurance;
- 21% lost their insurance due to job loss; and
- 8% of uninsured Vermonters report COVID-19 as a reason for the loss of health insurance coverage.

Vermont Medicaid Program

Medicaid programs provide low-cost or free health insurance for eligible Vermonters. Medicaid is a state program that follows Federal rules. Eligibility is based on financial factors, and for certain eligibility groups, on clinical factors. The Vermont Medicaid Program provides comprehensive health coverage, including broad prescription coverage.

Children under the age of 21 are covered under the Early and Periodic Screening, Diagnostic and Treatment (EPSDT) benefit, which requires all states to provide all services described in the Medicaid statute necessary to cover health conditions, regardless of whether the services are part of states' traditional Medicaid benefit packages. This includes treatment for any vision and hearing problems, dental services, and eyeglasses and hearing aids. Under EPSDT, children up to age 21 are entitled to all medically necessary Medicaid services, including optional services, even if a state does not cover the same services for adults.[18]

Customer feedback is a crucial element in administration of the Vermont Medicaid plans. Hearing from our customers provides us with useful information about what we're doing well and what we could be doing better. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey provides an assessment of health plan performance from a customer perspective.[19]

The survey is customized to reflect what may be affecting Vermonters served by the Medicaid program. Questions about Vermonters' experience with telehealth services were added starting in 2020. 60% of adult respondents in 2021 indicated that they were as satisfied or more satisfied with their video and/or telephone visits as they were with in-person visits with both primary care providers and specialists. The Vermont Medicaid program continues to receive positive feedback from adult members, with 85% of those surveyed giving the plan a high rating.[20]

> **In 2021, 95% of the child survey respondents rated "all of the health care they received" highly, with 96% giving their child's Medicaid health plan, itself, the highest tier rating.**

Prescription Assistance Programs

---

[18] https://www.medicaid.gov/medicaid/benefits/mandatory-optional-medicaid-benefits/index.html
[19] https://dvha.vermont.gov/quality/experience-care
[20] Vermont Medicaid's Experience of Care scorecard.

The VPharm program was established in 2006 to provide supplemental pharmaceutical coverage to Medicare beneficiaries. VPharm helps pay for prescription medicines with affordable monthly premiums for individuals who meet income guidelines and are enrolled in Medicare Part D, which covers prescription drugs.

In SFY 2022, there were 264,339 VPharm claims with a total gross paid amount of $5,714,202. Beginning July 1, 2022, DVHA expanded the drug coverage available under VPharm 2 and VPharm 3 to be equivalent to the drug coverage available under VPharm 1. These changes result from Vermont's new Global Commitment to Health 1115 Waiver which will allow VPharm 2 and VPharm 3 enrollees to receive $1 and $2 copays for more drugs through VPharm, not just "maintenance" drugs.

Previously, VPharm 2 and VPharm 3 coverage was limited to maintenance medications, over-the-counter medications, and diabetic supplies. This change will result in lower out-of-pocket costs for VPharm members. For prescriptions with a DVHA cost share of $29.99 or less, the patient will pay a $1.00 co-payment. Prescriptions with a DVHA cost share of $30.00 or more are responsible for a $2.00 co-payment. VPharm 1 is not changing. This is an expansion of drug coverage for people who are enrolled in VPharm 2 and VPharm 3.[21]

Eligibility & Cost-Sharing of Programs in Plan Year 2023
Each year, the Department reviews and updates eligibility and cost-sharing to align with state and federal regulations. Income calculations are based on gross monthly income minus certain qualifying deductions. Qualified Health Plans, advance premium tax credits, cost-sharing reductions, and Vermont premium assistance all use Modified Adjusted Gross Income (MAGI) for eligibility determination. So does Medicaid for Children and Adults. If a Vermonter is determined to be eligible for a program that requires a monthly premium, the Vermonter must pay that premium to get their insurance coverage. The Vermonter must also continue to pay their bill on a timely basis as required to maintain their health insurance. For more information:

- Visit the State's website for the eligibility guidelines in effect for income-based programs for 2023 to learn more.[22]
- Detailed information for all eligibility groups can be found here: Eligibility and Cost-sharing of Programs (vermont.gov).[23]

Medicaid State Plan Eligibility Groups – Full State Plan Benefits

Aged, Blind, Disabled
Eligible for SSI or otherwise meet financial eligibility for ABD

New Adults
at or below 138% FPL who are:
- Not Pregnant
- Not 65 or older
- Not Receiving Medicare

Working Disabled
at or below 250% FPL

Pregnant Women
[Dr. Dynasaur]
at or below 213% FPL

Children under 19
[Dr. Dynasaur]
at or below 317% FPL

Katie Beckett
Disabled children under 19 meeting institutional level of care. Parental income/resources not counted.

HCBS for Designated State Plan Populations – Full State Plan Benefits + HCBS

CFC Highest/High Needs -DAIL

Children under 21 with Severe Emotional Disturbance -DMH

Developmental Disabilities -DAIL

Brain Injury -DAIL

Limited Benefit Waiver Groups – Not State Plan Eligible

Waiver Only Expenditures

VPharm
For Medicare beneficiaries with income 150 - 225% FPL.

Moderate Needs -DAIL
Below 300% of SSI benefit rate who meet clinical criteria and are at risk of institutionalization.

Investments

SUD IMD Payments -VDH

Marketplace Subsidy Program
For individuals at or below 300% FPL who purchase health care coverage in VHC.

Community Rehabilitation Treatment -DMH
For individuals with severe and persistent mental illness, regardless of income

Cost-Effective Alternatives

Palliative Care for under 21 - VDH

Open Enrollment for Plan Year 2023

The Department successfully prepared for and launched Open Enrollment for 2023 health insurance plans on the marketplace. Open enrollment is for Vermonters who buy their plans on the health insurance marketplace, Vermont Health Connect.

Vermonters can sign up for or change their health and dental plans for 2023. Open Enrollment runs from November 1 to January 15. This year, Vermonters could get increased financial help through the federal government and the elimination of the family glitch. Because of these enhancements, more Vermonters can get lower-cost health plans. All qualified health plans cover preventive care like mental health services and annual check-ups.

In preparation for Open Enrollment, the Department updated the Plan Comparison Tool. The Tool compares qualified health plans on both plan design and total cost to help Vermonters make informed decisions. Total cost includes both premium and out-of-pocket costs. For this year, the Tool also features an employer affordability calculator so that Vermonters can find out if they may have been affected by the "family glitch."

The first step in the qualified health plan renewal effort for Open Enrollment involves determining eligibility for the coming year's state and federal subsidies and enrolling members in new comparable versions of their health and/or dental plans. In October 2022,

this step was operated with a single, clean, automated run that took care of 99.7% of eligible cases, the **fifth year in a row**, at 99% or better. This means that Vermonters could log into their online accounts on the very first day of Open Enrollment, see their benefits and net premiums for the coming year, and select a new plan if they chose to do so.

Finally, as in past years, the Department completed its required Open Enrollment Readiness Review with the Federal Government and did not receive any feedback.

Reaching Vermonters – Increasing Enrollment

The Department of Vermont Health Access communicates important information with the public and stakeholders about signing up for health insurance. This outreach seeks to help Vermonters understand the health insurance options available to them and the purpose of the state's health insurance marketplace. Outreach efforts also focus on vulnerable and underserved Vermonters more likely to lack access to health insurance.

In 2022, DVHA took several steps to improve customer accessibility to information and health insurance. The Department improved navigation, plain language access and information relevance on the Vermont Health Connect informational website. The "Google Translate" option was also added to all state-hosted pages on www.VermontHealthConnect.gov.

The Department increased engagement with Vermonters through improvements to social media campaigns. These campaigns increased frequency, improved content relevance and effectiveness, and used a modified content review process. The team utilized new resources to continue to update content relevance and represent more diverse populations. The team developed and published video campaigns which are documented to produce more engagement. Examples of social media campaign posts and the postcard campaign are below.

Video: How to Use Vermont Health Connect's Plan Comparison Tool:

Open Enrollment social media post:

Open Enrollment postcard:

The Department used grant funds to partner with three different organizations to promote the enhanced financial assistance received through the American Rescue Plan Act and to improve Vermonters' health insurance literacy. The grants focused specifically on engagement with the vulnerable and underserved population. Activities included hosting live and virtual events,

mailing educational materials, and connecting Vermonters to supportive resources to help them with their health insurance needs. One organization produced educational videos in seven languages to increase access to health insurance information for Vermonters who speak other languages.

The Department offered multiple virtual 2022 Open Enrollment "Town Halls" to provide information about Open Enrollment, the expanded subsidies under the American Rescue Plan Act, and to answer general questions about Vermont's health insurance marketplace.[24] DVHA promoted these events to members and the public through press releases and social media, as well as through partner communication networks, in order to build broad awareness of the open enrollment period and continued, lower costs for health insurance through the State's health insurance marketplace for the 2022 calendar year. Additional informational videos have been published and made available online.

The State also leveraged grant funding during 2023 Open Enrollment to promote opportunities for enhanced subsidies via 10- and 30-second radio commercials and Front Porch Forum advertisements.

During Open Enrollment, many Qualified Health Plan members received direct emails reminding them about important Open Enrollment deadlines and key plan decision tips based on their current enrollment status. Medicaid members whose mail was returned to the State were contacted by email to request them to update their contact information.

This same population received the Department's first text message pilot campaign. During 2022, the Department developed the ability to send brief text messages to customers to share important information. This communication medium is a key asset to the public health emergency unwind communication strategy. The pilot campaign was successful and showed promise for future communications and engagement efforts.

Applying for Benefits

Once Vermonters decide that they want to apply for health insurance through Vermont's integrated health insurance marketplace, they generally take one of four possible paths to enrollment:

How to Apply	
Online 🖥️	http://VermontHealthConnect.gov/
By Phone ☎️	1-855-899-9600 (Toll-Free)
By Paper ✏️	http://info.healthconnect.vermont.gov/paper
With an Assister 🤝	https://info.healthconnect.vermont.gov/find-local-help/find

Applying Online

---

[24] https://www.youtube.com/@VTHealthConnect

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

Customers applying for Medicaid or Qualified Health Plans can create an account and apply online at http://VermontHealthConnect.gov/ or https://my.vermont.gov/. Vermonters can log in at their convenience.

Applying by Phone

The Department's contracted Customer Support Center is equipped to enroll customers for both Medicaid and Qualified Health Plans over the phone. Call volume is the highest during the Open Enrollment period. As a result, the Department has established the percentage of calls answered within 25 seconds during Open Enrollment as the new measure to assess performance.

In the first month of Open Enrollment (November 1-30, 2022), 59% of calls were answered within 25 seconds. To reduce hold times for Vermonters, in 2022 the Customer Support Center implemented a call-back feature. The call-back feature made calling more convenient and has been utilized by customers during the highest call volume days. During the first month of Open Enrollment, the feature was used by customers 1,296 times. The Department continues to work with the contracted call center vendor, Maximus, to increase trained staff and staffing coverage to avoid the long wait times as much as possible.

Applying by Paper

The paper application is federally required and is the least utilized application method as increasing numbers of applicants move to online and phone applications. The 205ALLMED-NonLTC paper application allows the customer to be screened for all insurance programs offered through the Department, except for Long-Term Care Medicaid. Applicants whose identities cannot be confirmed have the option of either filling out a paper application or meeting with a local Assister who can validate their identity and help them apply for health insurance.

New in 2022, individuals can apply for the Immigrant Health Insurance Plan (IHIP)[25] through a separate paper application, offered in both Spanish[26] and English[27] versions. This application is only in paper form at this time.

Applying with an Assister

The Assister program serves as a cornerstone of the Department's ongoing effort to help Vermonters understand and enroll in the health insurance that best meets their families' needs and budget. The Program fosters collaboration between the State's health insurance marketplace, hospitals, clinics, and community organizations, having helped Vermont dramatically reduce and continue to maintain its low uninsured rate. Paired with the Customer Support Center and online tools, the Assister program provides an additional option of tailored, one-on-one support for Vermonters who may have encountered barriers to enrollment in health insurance.

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

Vermont's Assister Network consists of over 100 Certified Application Counselors, Navigators, and Brokers. Assisters provide in-person and virtual enrollment assistance in all 14 counties of the State of Vermont. Assisters receive regular training and direct support so that Vermonters have accessible, knowledgeable people within their community to help them with their health insurance needs. Assisters play a critical role, especially for the most vulnerable populations, to help make sense of the ever-changing and expensive health insurance landscape.

The story below describes one Assister's experience working with a Vermonter in 2022:

> **"I began working with a patient after he was admitted into the hospital under the assumption that he had active VT Medicaid coverage at the time of his admission. We were simply planning to make some updates to his Medicaid account to keep all his information up-to-date. But when I called the Assister Hotline, we found out that his Medicaid coverage had actually terminated because he had an old out-of-state address listed on his account. The patient became very concerned because this meant that he had no insurance coverage for his current hospitalization. I was able to assist him in updating his address and the rest of his information, and by the end of the phone call his coverage was reinstated so the patient did not have to worry about how he would pay his medical bills."**
>
> **- Kaleigh, Brattleboro Retreat**

The Department continues to work to make connecting with an Assister as easy as possible. The Assister Directory has been updated and made more accessible on the website for the State's health insurance marketplace. It can be found at: https://info.healthconnect.vermont.gov/find-local-help/find

Connecting with Primary Care

Connecting with a primary care provider is a key step toward accessing health care. Units across DVHA work together to support Vermonters enrolling in Medicaid or Qualified Health Plans through Vermont's state-based health insurance marketplace.

Removing Barriers to Care for Medicaid Members

The Department works to remove barriers to health care services for Medicaid members. Two examples for 2022 are non-emergency medical transportation and language access for speakers of languages other than English.

Non-Emergency Medical Transportation (NEMT) is a covered service for members enrolled in Medicaid and Dr. Dynasaur programs. This benefit is essential in providing assistance to qualified members who face barriers to transportation. Dedicated rides to medical services can help reduce unnecessary stress and uncertainty while increasing access to care.[28] The Vermont Public Transportation Association (VPTA) is a regional network of public transit providers who

---

[28] http://www.vpta.net/medicaid-transportation/

transport Medicaid and Dr. Dynasaur members to and from medically necessary, non-emergency medical services. VPTA serves as the point of contact for members' NEMT-related questions and scheduling needs. Medicaid members may find more information about transportation on the VPTA website. Providers may find more information about NEMT on the DVHA website.[29]

DVHA provides Non-Emergency Medical Transportation (NEMT) to ensure that Medicaid members without access to transportation receive rides to and from medical appointments, including treatment for opioid addiction. In addition to contract management and quality review of the eight statewide transportation brokers/providers, MPS staff process authorizations for out-of-area transportation and transportation-related medical exemption applications. MPS responsibilities also extend to outreach and communication, including Medicaid policy education; provider manuals and newsletters; member handbooks and newsletters; the Green Mountain Care member website; and the Department of Vermont Health Access website.

The Department also took steps in 2022 to ensure Vermonters covered by Medicaid who speak other languages can communicate with their health care providers. When care is delivered in a language other than the patient's preferred language, there can be significant barriers to the patient's ability to understand a diagnosis, the care they are consenting to, or whether they may require important follow-up care. These language barriers can lead to a patient's increased anxiety about health care appointments and result in poorer health outcomes.

In addition to sharing what is important to the individual and their family, providers are required under federal and State law to provide interpreters for patients with limited English proficiency and those who are deaf or hard of hearing. Dedicated access to interpreters can improve the patient's overall healthcare experience, and although it may be common for patients with limited English proficiency to bring a family member with them to translate, a trained interpreter is strongly recommended. DVHA's network of providers is permitted to bill for reimbursement of interpreter services for Vermont Medicaid members.[30] The Department's Member and Provider Services Unit works to ensure that providers know the resources available to them to provide language assistance.

The list below provides examples of languages other than English which Vermonters indicate as their preferred language when they complete their health coverage application. This illustrates the variety of languages in which language assistance may be beneficial for Vermonters accessing care:

- Arabic
- Burmese
- Dari
- French
- Kirundi
- Nepali
- Pashto
- Somali
- Spanish

Medicaid and Exchange Advisory Committee

The Medicaid and Exchange Advisory Committee is a group that convenes to give input to the Department on topics related to member and provider initiatives, policies, and communications. This statutory advisory committee raises issues for DVHA to consider and provides feedback on policy development and program administration. Meetings are open to the public. In 2022, the MEAC continued to successfully conduct meetings virtually. Anecdotally, the virtual option has increased access for both members of the public and advisory committee members as it has mitigated the number of audio issues. The committee also successfully added a member representing the small business community.

Coordination of Health Insurance for Parolees

The Department of Vermont Health Access has been coordinating with other state and community partners to prepare for the arrival of parolees from Afghanistan and Ukraine. As part of the State's preparation, the Department developed processes and communication materials to clearly communicate several key points about health insurance for this population. Additional details about health insurance options for parolees can be found by visiting the following link: https://dvha.vermont.gov/information-for-non-citizens/Ukrainian-and-Afghan-Humanitarian-Parolees-Can-Apply-for-Medicaid-and-Other-Health-Insurance.

Over the course of 2022, the State received 112 applications from Afghan refugees, resulting in 209 enrollments. The State received 37 applications from Ukrainian refugees, resulting in 54 enrollments.

Provider Experience

How we support providers

The Department of Vermont Health Access supports an extensive network of in-state and out-of-state providers. Vermonters have a variety of health care needs and require a network of providers that can address those needs and deliver medically necessary, covered services. As of December 2022, 27,860 providers are enrolled in Vermont Medicaid. Statewide workforce shortages during 2022 have impacted certain provider types including dentists and nurses. The following table shows the total number of individual providers, as well as the total number of group practices and facilities, by provider type.

The Department monitors the adequacy of Vermont Medicaid's network of enrolled providers and ensures that members are served in accordance with managed care requirements.[31] This includes helping members navigate finding a dental home due to the decrease in available dental providers. In 2022, 23 dental providers disenrolled from Medicaid due to retirement and low reimbursement rates. MPS staff continue to work with dentists to promote enrollment with Vermont Medicaid. On average, in 2022, MPS received 12 calls a week from members trying to find a dental provider. In 2022, MPS also worked with the Oral Health Commission to support efforts to recruit more dentists.

Revalidation and Access

The Member and Provider Services Unit conducts provider enrollment, screening, revalidation screening and monitoring of the network to help prevent Medicaid fraud, waste, and abuse. Federal regulations, specifically 42 CFR §455.410 and §455.450, require all participating providers to be screened upon initial enrollment and revalidation of enrollment.[32] In 2022, the Department enrolled, on average, 257 new providers a month and terminated, on average, 15 providers a month from participation with Vermont Medicaid. Providers terminate with Vermont Medicaid for various reasons, including, but not limited to, not wanting to accept Medicaid rates, not submitting claims in the past 36 months, moving, and retirement.

---

[31] Evaluation of network adequacy is completed every six months. Member and Provider Services works with a variety of associations and societies to encourage providers to participate with Vermont Medicaid & meet the needs of its members.
[32] CFR is the Code of Federal Regulations.

VERMONT
AGENCY OF HUMAN SERVICES
DEPARTMENT OF VERMONT HEALTH ACCESS

Between March 2020 and March 2022, CMS allowed for site visits to be done virtually or to be suspended, due to the Public Health Emergency. As of March 2022, MPS resumed site visits upon enrollment and every 5 years thereafter. This subset of providers receiving site visits includes:

- Ambulance service suppliers
- Community mental health centers, including eating disorder treatment providers
- Comprehensive outpatient rehabilitation facilities
- Hospice organizations
- Independent clinical laboratories
- Independent diagnostic testing facilities
- Physical therapists enrolling as individuals or group practices
- Portable X-ray suppliers
- Revalidating Home Health agencies[33]
- Revalidating Durable Medical Equipment, Prosthetics/Orthotics & Supplies suppliers[34]

Education, Training, and Support Services

The MPS unit is responsible for ensuring members have access to care, as well as for engagement, outreach and communication with both members and providers.[35] The goal is to ensure members and providers are always informed. Providers are assisted by Gainwell's Provider Services unit. Gainwell's services in support of providers include management of a Provider Services Call Center.[36]

In 2022, Gainwell and MPS hosted six provider webinars on topics such as billing and claims information. The provider manual and education resources such as webinars are available at: http://www.vtmedicaid.com/#/home and at https://dvha.vermont.gov/providers

Benefit Rules Management

According to the CMS National Correct Coding Initiative, providers must use the appropriate and correct codes for services that are provided to members. The use of correct codes allows for appropriate reimbursement for services provided to members. All codes (e.g., CPT, HCPCS, and ICD-10) released each year are reviewed and the Medicaid Management Information System (MMIS) is updated accordingly by specific deadlines so that providers may submit claims for timely reimbursement.

Other functions of benefit rules management include:

- Reviewing utilization and claims reports for services;
- Reviewing prior authorization requests for specific services;
- Reviewing prior authorization for all requests for services with risk for "imminent harm,"

---

- Clinical audits to ensure medical necessity and appropriate utilization of services; and
- Collaboration on Agency-wide initiatives, such as Early Periodic Screening Diagnosis & Treatment (EPSDT) review of services, Applied Behavior Analysis utilization review and reconciliation, and clinical case reviews.

Submitting Claims and Reimbursement

Medical Claims Processing

On January 1, 2022, the DVHA executed a 5-year extension to its contract with Gainwell Technologies. Gainwell has provided the State of Vermont with Medicaid fiscal agent and operations management services since 1981 through its Medicaid Management Information System (MMIS).[37] Medical claims processing is a core service involving claims input, resolutions, adjustments, payments, utilization review, and reference file maintenance to ensure compliance with federal and state requirements. Additional services provided by Gainwell include financial management, encompassing state and federal reporting, provider management, analytics and quality management, and coordination of benefits.

In state fiscal year (SFY) 2022, Gainwell's MMIS processed over 8 million claims for more than 30 distinct programs, supporting all departments within the Agency of Human Services and the Agency of Education. Nearly a million more claims were processed in SFY 2022 than were processed the previous year. These claims resulted in over $1.4 billion in payments to providers. Despite the increased volume, claims were adjudicated in 1 day on average, with 99.7% of provider claims paid within 30 days of receipt. The proportion of claims submitted electronically increased from 94.82% in SFY 2021 to over 95% in SFY 2022.[38]

The MMIS is continuously enhanced to support new and ongoing state initiatives and to remain compliant with federal requirements. For example, MMIS was modified to support the Immigrant Health Insurance Program, implemented July 1, 2022. Multiple system enhancements were also made to support Medicaid's value-based payment priorities, as well as other key state and federal initiatives. Ongoing system upgrades ensure continued compliance with evolving federal requirements, allowing DVHA to receive 75% federal funding to operate and maintain this CMS-certified system.

Pharmacy Claims Processing

Change Healthcare, DVHA's prescription benefit management vendor, processed over 2.1 million claims in state fiscal year 2022 resulting in approximately $266 million in payments to

---

[37]Gainwell Technologies (formerly DXC Technology), provides the State of Vermont with Medicaid fiscal agent services that include claims processing and payment, financial services, provider enrollment, and system maintenance and operations. This system is referred to as the fiscal agent/claims processing component of the Medicaid Management Information System (MMIS).

[38] Claims data provided by Gainwell Technologies on December 13, 2022.

Vermont Medicaid-enrolled pharmacies.[39] Change Healthcare adjudicates pharmacy claims, which are then sent to Gainwell Technologies for payments to the pharmacies. In addition to claims processing, Change Healthcare also operates a provider call center. This provider call center processes all drug-related prior authorizations and provides claims processing support for pharmacies. In state fiscal year 2022, Change Healthcare processed approximately 27,447 drug-related prior authorizations, with 20,525 of those approved.[40]

Reimbursement

During 2022, the Department added approximately $13M to Medicaid reimbursement rates for the following service areas:

Professional Services	$9,891,927
Hospital Outpatient Services	$1,710,072
Dental Services	$1,054,622
Federally Qualified Health Center and Rural Health Clinic Services	$ 480,899
Medicaid State Plan Home Health, High Technology Nursing, and Pediatric Palliative Care Services combined	$ 422,339

Additional information on the rate updates can be viewed in the Global Commitment Register at https://humanservices.vermont.gov/about-us/medicaid-administration/global-commitment-register/final-policies/2021-final-policies

Rate Setting

The Division of Rate Setting audits costs and establishes Medicaid payment rates for the 34 Vermont nursing homes, also referred to as nursing facilities, that accept Medicaid. The Department does this in consultation with DAIL. The Division also sets rates for Private Nonmedical Institutions (PNMI) for Residential Child Care, part of the State's Medicaid program. This is a network of treatment facilities for children and adolescents with emotional, behavioral, and other challenges. These facilities provide treatment for children and adolescents and families. The Division establishes annual rates for 12 PNMIs for DCF, DMH, and, periodically, the Division of Substance Use of the Vermont Department of Health. These rates usually have

---

[39] Pharmacy Best Practices and Cost Control Program Report (2021): https://legislature.vermont.gov/assets/Legislative-Reports/DVHA-Pharmacy-Best-Practices-Cost-Control-Report_SFY2021_FINAL_10.30.2021.pdf
[40] Pharmacy Best Practices and Cost Control Program Report (2021): https://legislature.vermont.gov/assets/Legislative-Reports/DVHA-Pharmacy-Best-Practices-Cost-Control-Report_SFY2021_FINAL_10.30.2021.pdf

an education component; as such, staff at the Agency of Education are also involved in the rate setting process.

Annually, the Division of Rate Setting is responsible for setting accurate nursing home and PNMI Medicaid rates in a timely manner in accordance with the Division's rules, providing predictable rates to providers on a set schedule. In 2022, the Division also prioritized several activities to support the nursing home and PNMI systems of care:

- Throughout the year, Rate Setting continued to respond to COVID-related issues to assist nursing home and PNMI providers by providing financial stability via extraordinary financial relief and rate adjustments. As it has throughout the COVID pandemic, the Division continues to receive an unprecedented number of requests for rate adjustments and extraordinary financial relief as a result of increased cost pressures providers are experiencing related to inflation and workforce recruitment and retention.
- In May 2022, Rate Setting added an additional 9.18% of inflation to the nursing care cost component of nursing home rates for all four quarters of SFY 2022 to help stabilize providers by reimbursing them for increased nursing costs that they were experiencing.
- In order to place Vermonters with exceptional clinical care and behavioral needs in skilled nursing facilities, Rate Setting set 21 new special rates to expeditiously allow for Vermonters to be placed in skilled nursing facilities, in order to minimize the time spent in hospitals or other less optimal settings.
- In partnership with the DCF and DMH, DVHA is facilitating a multi-phased effort to change the PNMI rate setting rules and to refine supporting processes to address provider concerns with the current methodology. Additional detail can be found in the legislative report Costs and Contract Staffing for Private Nonmedical Institutions.[41]
- Rate Setting initiated a process to work with DAIL, the nursing home industry, provider representatives, and CMS to develop an understanding of the acuity data that will be available to Rate Setting under the new CMS Patient Driven Payment Model, and to prepare for the transition away from the current acuity measure use for which CMS has announced it will discontinue support on October 1, 2023.

Governor's Budget Recommendation: SFY24

Budget Narrative

Department's Mission: Improve Vermonters' health and well-being by providing access to high-quality, cost-effective health care.

State Fiscal Year 2024 Summary: The Department of Vermont Health Access' (DVHA's) state fiscal year 2024 budget request includes an increase in Administration of $20,651,599 (gross) and an increase in Program of $64,284,450 (gross) for a total of $84,936,049 (gross) in new appropriations. Explanations are provided under the Administration and Program sections below.

Appropriation	GROSS	STATE FUNDS
B.306 DVHA Administration	$20,651,599	$895,677
B.307 Global Commitment Program	$66,325,443	$28,838,303
B.309 State Only Program	($1,536,873)	$3,869,624
B.310 Non-Waiver Program	($504,120)	($102,629)
Total Change	$84,936,049	$33,500,974

The programmatic changes in DVHA's budget are spread across three different covered populations: Global Commitment, State Only, and Medicaid Matched Non-Waiver. The descriptions of these changes are similar across these populations and have been consolidated within this narrative. However, the items are repeated for each population in the Ups/Downs document. DVHA has numerically cross-walked the changes listed below to the Ups/Downs and has included an appropriation-level breakdown table whenever an item is referenced more than once in the Ups/Downs document.

ADMINISTRATION	*$20,651,599 GROSS / $895,677 STATE*

1. Salary & Fringe, Retirement, and Healthcare Changes…..$2,634,374 / $1,158,235 state

In SFY2024, DVHA is projected to have 373 positions which is on par with SFY2023. These figures reflect annual salary; fringe and Federal Financial Participation rates; reclassifications; and an increase to retiree pension and health care cost accruals.

Appropriation	GROSS	STATE FUNDS
Salary & Fringe	$2,141,459	$961,501
Retirement	$492,916	$196,735
Total Change	$2,634,374	$1,158,235

2. **Internal Service Fund (ISF)**. . . . .$139,695 / $29,829 state

This item represents an increase in funding needs to reimburse other departments for shared services.

Appropriation	GROSS	STATE FUNDS
Personal Services:		
Internal Service Fund (ISF) Worker's Compensation	$22,019	$4,693
Operating Expenses:		
ISF ADS	$4,184	$893
ISF DHR	$32,330	$6,903
ISF Fee for Space	$37,848	$8,082
ISF VISION	$42,494	$9,074
ISF General Liability	$256	$55
ISF Property/Commercial Insurance	$605	$129
Total Change	$139,736	$29,829

3. **Gainwell Contract - MDWAS**. . . . .$654,350 / $0 state

The MDWAS project endeavors to pull Medicaid data into a data lake, connect that data to clinical and other non-claims data in our VHIE data warehouse and create new analytics and reporting tools. Gainwell will provide source data to the data lake, which will require them to work with our vendor to ensure that these data transfers work properly. We will also need Gainwell's participation as we analyze our reporting and analysis needs. Our goal is to move all our analytics and reporting tools into the new platform. Gainwell's experience with our data will be important to the success of this project.

4. **Medicaid Data Warehouse & Analytics Solution (MDWAS)** . . $17,878,690/$0 state

The Medicaid Data Warehouse and Analytics Solution (MDWAS) is an effort undertaken by the State of Vermont to "construct a centralized data repository, with robust reporting and analysis tools, that contains all Medicaid-related claims and clinical data." This project is the next step in the strategy to modernize the Medicaid Management Information Systems (MMIS).

5. **Reduction in Office Rents**. . . . .($488,783) / ($209,003) state

This item represents a reduction in office space rental costs due to savings from the consolidation of DVHA's physical footprint and existing lease agreements with actual costs less than originally budgeted.

6. Operational Reductions. . . . . ($166,768) / ($83,384) state

This item represents areas within DVHA's operational budget that have been identified for reduction due to changes in the operational environment, such as DVHA's effort to create a hybrid working environment.

PROGRAM	*$64,284,450 GROSS / $32,605,297 STATE*

7. Caseload & Utilization Changes . . . .…… $4,514,136 / $2,883,573 state

The Medicaid Consensus Forecast is a collaborative process for estimating caseload and utilization. DVHA works collaboratively with the Joint Fiscal Office, the Department of Finance and Management, and the Agency of Human Services twice each year as part of the State's Consensus Revenue Forecasting process.

The COVID-19 pandemic continues to be the primary factor driving caseload and utilization projections. After several years of decline, Vermont's Medicaid enrollment has grown steadily since the start of the pandemic in March 2020. The cause is twofold: first, individuals experiencing pandemic-related economic challenges now qualify for Medicaid, and most significantly, Vermont has been generally prohibited from terminating Medicaid coverage. Continuous Medicaid coverage is a condition of receiving the 6.2% enhancement in Federal Medical Assistance Percentage (FMAP) authorized in the Families First Coronavirus Response Act (FFCRA). The federal government has provided this increased FMAP since spring of 2020 to support states and to stabilize health care coverage during the Public Health Emergency.

DVHA has taken many steps to facilitate access to health care and to comply with the continuous coverage requirements, including:

- Extending Medicaid coverage periods until after the Emergency ends; the Department is not processing redeterminations that could result in loss of Medicaid.
- Suspending certain termination of health insurance; the Department is generally not ending Medicaid coverage during the Emergency unless the customer requests it.
- Temporarily waiving financial verifications required for those seeking to enroll in health insurance.

The most recent Medicaid Consensus Forecast completed in October projects that Medicaid continuous coverage will continue through March 2023. As such, enrollment is expected to remain elevated for the majority of SFY2023. Once the continuous coverage requirement ends and Vermont begins processing redeterminations that could result in loss of Medicaid, the caseload growth is expected to moderate. DVHA will begin a 12- to 14-month process of "unwinding" from the Medicaid continuous coverage requirement by redetermining eligibility for all Medicaid enrollees. DVHA will seek to prioritize redeterminations for the population likely to be ineligible for Medicaid and eligible for other coverage. However, due to federal

requirements as well as operational capacity, the caseload moderation will occur gradually over the course of a year or more. The unwind from Medicaid continuous coverage is scheduled to begin in April 2023.

Appropriation	GROSS	STATE FUNDS
B.307 Global Commitment	$3,945,546	$1,715,523
B.309 State Only	$1,231,370	$1,232,723
B.310 Non-Waiver	($662,780)	($64,673)
Total Changes	$4,514,136	$2,883,573

8. **Brattleboro Retreat APM Year 2 Appropriations Shortfall** 3,613,296 / $1,571,061 state

DVHA is seeking $3,613,296 in gross funding to be included in the SFY24 base budget covering an SFY23 base budget shortfall for the second half of APM Year 3 and the first half of APM Year 4.

9. **Brattleboro Retreat APM**.. . . . .$18,768,000 / $8,160,326 state

Retroactive to July 1, 2022, AHS/DVHA executed an amendment to the March 2021 Alternative Payment Model (APM) contract with the Brattleboro Retreat. This amendment increased the per diem rate from $2,550 to $3,100 (net increase of $550 per diem) and increased the Medicaid bed count from 42 to 51 (net increase 9 beds). These rates are expected to be in place for APM Year 3 and into APM Year 4. The total fiscal impact on the SFY24 budget is $18,768,000.

	State Fiscal Year 2024	
	Last Half APM Yr. 3	First Half APM Yr. 4
	July 2023-Dec. 2023	Jan. 2024-June 2024
Fiscal Impact	$ 9,384,000.00	$ 9,384,000.00
Total Impact on SFY24 Budget	$	18,768,000.00

10. **Brattleboro Retreat Funding Shift to GC**. . . . .$0/$0 state

CMS has ordered a phasedown of Institute for Mental Disease (IMD) Investment dollars. DVHA is shifting a portion of the allocation of those dollars from Investment to Global Commitment funding.

Appropriation	GROSS	STATE FUNDS
B.307 Global Commitment	$4,594,463	$1,997,673
B.309 State Only	($4,594,563)	($1,997,673)
Total Change	$0	$0

11. Brattleboro Retreat Funding Shift to GF. . . . . $0/$2,808,354 state

CMS has ordered a phasedown of Institute for Mental Disease (IMD) Investment dollars. DVHA is shifting a portion of the allocation of those dollars from Investment to General Fund dollars.

12. Annual Medicaid Rate Adjustments. . . . .$914,001 / $395,226 state

DVHA has a goal to be a reliable and predictable payer for Vermont Medicaid-participating providers. Annual rate updates are developed using established rate methodologies, aligning with Medicare reimbursement methodologies where possible. Rate changes are part of the State's annual budget development process and are intended to support and maintain the Medicaid provider network, provide stabilization to the health care system, and maximize transparency when rate changes are made. Increased caseload continues to put pressure on DVHA's budget for SFY24, limiting the available funds for more comprehensive rate increases. The total amount for this set of annual updates is inclusive of rate adjustments to Federally Qualified Health Centers and Rural Health Clinics; professional services; outpatient hospital services; durable medical equipment, prosthetics, orthotics, and supplies; physician administered drugs; Medicaid State Plan skilled home health services; and hospice services.

Appropriation	GROSS	STATE FUNDS
B.307 Global Commitment	$898,441	$390,642
B.309 State Only	$0	$0
B.310 Non-Waiver	$15,560	$4,584
Total Changes	$914,001	$395,226

13. Annual Medicare Buy-In and Caseload Changes . . . .$1,316,004 / $502,931 state

The federal government allows states to use Medicaid dollars to "buy-in" to Medicare on behalf of dually eligible beneficiaries who would otherwise be fully covered by Medicaid programs. Caseload and member month costs vary from year to year. This change incorporates a rate increase and an upward trend in member months. The DVHA Buy-in caseload remains relatively consistent with a slight increase for SFY23 because Vermont's population is aging into Medicare.

Appropriation	GROSS	STATE FUNDS
B.307 Global Commitment	$1,156,696	$502,931
B.310 Non-Waiver	$159,308	$0
Total Changes	$1,316,004	$502,931

14. Medicaid Dental Services for DS and CRT Clients. . . . . $198,821 / $86,447 state

Vermont sought and was granted federal authority to make this change to Medicaid coverage in the 2022 Global Commitment to Health Waiver renewal negotiation. Moving the relevant DMH and DCF investment budgets to the Medicaid program was built into Vermont's budget neutrality agreement and is necessary to fund the enhanced dental benefit for DS and CRT populations that Vermont committed to expanding as part of the waiver renewal. Moving $50,000 in general funds from DAIL to DVHA unlocks an additional $68,821 through Federal match and moves $80,000 from DMH to DVHA for the same services under the Medicaid benefit. Comments from community partners and stakeholders during the waiver application process demonstrated support for increased dental access for these vulnerable groups.

Appropriation	GROSS	STATE FUNDS
Medicaid Dental Services for DS Clients	$118,821	$51,663
Medicaid Dental Services for CRT Clients	$80,000	$34,784
Total Changes	$198,821	$86,447

15. Graduate Medical Education Supplemental Payment. . .$21,217,782 / $9,225,492 state

DVHA is seeking Global Commitment spending authority via the SFY 2024 budget to increase the annual GME amount from $30 million to approximately $51 million, which is the full amount of GME payment potential demonstrated by the approved calculation methodology for SFY 2024. This proposed funding mechanism does not require additional General Fund dollars. If authorized, the remaining $21 million would be disbursed to the University of Vermont Medical Center (UVMMC) in the existing quarterly installments through SFY 2024.

16. American Federation of State, County and Municipal Employees (AFSCME) Collective Bargaining Agreement. . . . . $568,826 / $247,326 state

This is the estimated cost of the Independent Care Workers agreement with the State of Vermont for Children's Personal Care Services. This amount is paid by DVHA and managed by VDH. This increase annualizes the effect of the current collective bargaining agreement.

17. Dental Rates . . . .$13,109,475 / $5,700,000 state

In response to unprecedented statewide dental access challenges, DVHA is seeking appropriations to fund an increase in Medicaid dental reimbursements to align with 75% of Northeast Delta Dental 2023 commercial rates. While Medicaid rates for some services were updated in early 2022, the rates for most Medicaid-covered dental services have not been updated in many years, with current Medicaid rates being, on average, only 50% of commercial rates. This rate increase is intended to stabilize the statewide dental system and to promote continued access to dental care for Vermont Medicaid members.

18. Drug Coverage Changes for Pharmacy Benefit. . . ($1,800,001) / ($801,783) state

To relieve budget pressures, DVHA explored removal of a portion of the over–the-counter coverage. This figure includes antihistamines, melatonin, and vitamin D. Nutritional supplements were also considered during this process and after further research, it has been determined that they are available through the SNAP benefit via DCF and may also be prescribed through the Medicaid medical benefit.

Appropriation	GROSS	STATE FUNDS
B.307 Global Commitment	($1,745,903)	($759,119)
B.309 State Only	($37,890)	($37,890)
B.310 Non-Waiver	($16,208)	($4,775)
Total Changes	($1,800,001)	($801,783)

19. Annual Medicare Clawback Changes. . . . . $2,364,110 / $2,364,110 state

The Medicare Prescription Drug Improvement and Modernization Act of 2003 (MMA), which established the Medicare Part D prescription drug program, eliminated Medicaid prescription drug coverage for people dually eligible for Medicare and Medicaid and required these people to receive their drug coverage through a Medicare Part D plan. This reduced state costs; however, the MMA also required states to reimburse the federal government for costs associated with the transfer of prescription drug coverage for this population from state Medicaid programs to Medicare.

20. Eliminate Vermont Cost Sharing Reduction (VCSR). ($500,000) / ($500,000) state

VCSR is a state-funded program to reduce out-of-pocket costs for eligible qualified health plan enrollees. In the early years of the health insurance marketplace, VCSR filled an important affordability gap for Vermonters with moderate incomes (200-300% of the federal poverty level). However, federal changes in recent years have made health plans with even lower out-of-pocket costs more affordable for Vermonters. As a result, VCSR complicates coverage decisions for enrollees and is no longer an efficient use of state dollars. Because the availability of VCSR is tied to the design of qualified health plans, any change to the program must take place on a calendar year basis. This change would take effect in January 2024 and reflect six months of savings.

21. Children's Health Insurance Program (CHIP) FMAP Changes. . . . $0/ ($37,766) state

This item is for anticipated changes to Federal Medical Assistance Percentage (FMAP) in state fiscal year 2023. Specifically, this item accounts for changes in the base FMAP to the CHIP program.

Appropriation	GROSS	STATE FUNDS
B.307 Global Commitment	$0	$0
B.310 State Only	$0	$0
B.310 Non-Waiver	$0	($37,766)

DVHA 2024 Recommended Budget by Source of Funds

Pie chart showing:
- GC Investments, 0.36%
- General Funds, 8.58%
- HIT Funds, 0.40%
- IdptT Funds, 0.40%
- Federal Funds, 13.33%
- Global Commitment, 76.93%
Year over Year Changes	Program (Gross)	Admin (Gross)	Total DVHA	State Funds Estimate
2022 Actuals	$ 946,966,898	$ 130,434,084	$ 1,077,400,981.79	$ 423,957,286.33
2023 Budget Adjustment Act	$ 1,022,383,858	$ 169,086,053	$ 1,191,469,910.59	$ 469,051,917.05
2024 Govenor's Recommended	$ 991,170,263	$ 183,872,900	$ 1,175,043,162.95	$ 510,938,143.33

*This estimate converts Global Commitment funds which are handeled at AHS Central Office using a blended Federal Medical Assistance Percentage (FMAP) which may not fully reflect the actual mix of caseload for the New Adults.

Caseload & Utilization

This section details the historical and projected caseload and utilization of Medicaid Services. By statute, Vermont uses a consensus process to forecast Medicaid caseload and utilization. Program spending is a function of caseload, utilization, and cost for services.

Aged, Blind, or Disabled (ABD) and/or Medically Needy Adults

The eligibility requirements for the aged, blind, or disabled (ABD) and/or Medically Needy Adults are as follows:

- Age 19 and older
- Determined ABD but ineligible for Medicare includes:
    - Supplemental Security Income (SSI) cash assistance recipients
    - Working disabled
    - Hospice patients
    - Breast and Cervical Cancer Treatment (BCCT) participants
    - Medicaid/Qualified Medicare Beneficiaries (QMB)
    - Medically needy – eligible because their income is greater than the cash assistance level but less than the protected income level (PIL) – may be ABD or the parents/caretaker relatives of disabled or medically needy minor children

ABD Adult Caseload, Expenditures, and PMPM by State Fiscal Year

SFY	Caseload	Expenditures	PMPM
SFY 2019	6,485	$ 61,197,266	$786.40
SFY 2020	6,298	$ 57,489,532	$760.67

Dual Eligible

Dual Eligible members are enrolled in both Medicare and Medicaid. Medicare eligibility is based on being at least 65 years of age or determined blind or disabled.

Medicaid assists with:
- • Medicare:
  - o Co-payments
  - o Co-insurance
  - o Deductibles
- • Non-Medicare routine services:
  - o Hearing
  - o Dental
  - o Transportation

New Adults with Children

The eligibility requirements for New Adults with Children are as follows:
• Age 19 and older
• Income below the designated FPL
• With children in the household under the age of 19

Unlike New Adults without children, for this population, the Federal government reimburses services for New Adults with Children in the household at the unenhanced Global Commitment rate.

IHIP

The Immigrant Health Insurance Plan (IHIP) was enacted by the Vermont General Assembly in Act 48 of 2021 and is codified in state statute at 33 V.S.A. chapter 19, subchapter 9. IHIP was created to establish Dr. Dynasaur-like coverage for certain Vermont residents (children under 19 years of age and pregnant individuals) who have an immigration status for which Medicaid coverage is not available, including migrant workers who are employed in seasonal occupations in Vermont, and who are otherwise uninsured. IHIP began July 1, 2022 and is an entirely state funded program.

IHIP covers hospital, medical, and dental services as well as prescription drugs. IHIP does not cover long-term services and supports, including home- and community-based services (HCBS).

The general eligibility requirements for IHIP are as follows:
- o Under age 19 OR pregnant
- o Income up to 312% FPL (children) or 208% FPL (pregnant)
- o Otherwise, uninsured
- o Ineligible for Medicaid due to immigration status (except for Emergency Medicaid)

Pharmacy Only Programs – Prescription Assistance

Vermont provides prescription assistance programs to help Vermonters pay for prescription medicines based on income, disability status, and age under the name VPharm. There are monthly premiums based on income and co-pays based on the cost of the prescription.

VPharm assists Vermonters enrolled in Medicare Part D with paying for prescription medicines as well as their Medicare Part D premiums.

The eligibility requirements for VPharm are as follows:

• Age 65 and older
• Any age with disability
• Current Medicare Part D eligibility
• Income below the designated FPL

Premium Assistance and Cost Sharing

Individuals with household income over 138% of FPL can choose to enroll in qualified health plan through Vermont Health Connect, Vermont's health benefit exchange. These plans have varying cost sharing and premium levels. There are Federal tax credits to make premiums more affordable for people and generally limit premiums to less than 8.5% of their household income, as well as Federal subsidies to make out-of-pocket expenses more affordable for people with incomes below 250% FPL. In addition to the Federal tax credits and cost sharing subsidies provided by the Affordable Care Act, the State of Vermont further subsidizes premiums and cost sharing for enrollees whose income is less than 300% FPL.
