MEDICAID PROGRAM ENROLLMENT AND EXPENDITURES

The Medicaid program enrollment and expenditure reports have traditionally reported caseload representative of a year-to-date average monthly member enrollment. The Per Member Per Month (PMPM) is calculated using the average monthly enrollment and expenses/budget for each Medicaid Eligibility Group. Due to the impact of the public health emergency produced by the novel coronavirus, SARS-CoV-2, this report is being revised to include an additional column that indicates point-in-time enrollment, as of the last month of the quarter, into the Medicaid program. The “Ending Enrollment” column was included to communicate the observed increases in enrollment during the public health emergency. This observed increase becomes evident in the Quarter 4 (Q4) report.
