Dear Medicaid Provider,

Covid vaccines are now commercially available and included in the CDC recommendations that were updated on 9/12/2023. The 2023/2024 Covid vaccines will be active in the Pharmacy Point-of Sale system effective 9/22/2023 with claims processing retroactively to the effective date of 9/11/2023. DVHA-enrolled pharmacies may be reimbursed for injectable COVID vaccinations administered to adults 19 years and older who are enrolled in Vermont’s publicly funded programs. Pharmacists must be enrolled with Vermont Medicaid, certified to administer vaccines in the State of Vermont, and must be compliant with all Vermont laws governing vaccine administration. Failure to comply with all Vermont immunization regulations will subject these claims to recoupment. Currently covered Covid vaccines:

Comirnaty (Pfizer), Novavax, Spikevax (Moderna)

Pharmacies are reimbursed for the ingredient cost and administration fee for Covid vaccines. At this time, due to system coding limitations, the administration fee will pay at \$17.45 which is in line with other vaccine administrations. Once the coding changes have been implemented it will allow for the enhanced administration fee of \$40.00 to be paid and will be retroactive to 9/11/2023. There will be additional communication provided once available.

No dispensing fee is paid for these claims. Basis of Cost and Submission Clarification Codes are no longer required.

Through the pharmacy POS system, the pharmacy must submit the code “MA” in the Professional Service Code field for the COVID vaccine claim to document the administration of the vaccine and receive full reimbursement. Please note there will be **NO member copay** for COVID vaccines.

Required NCPDP Fields
