Topic:

New Supervised Billing Modifier Requirement to Include HM

Summary:

Vermont Medicaid has added the HM modifier as a required modifier for all applicable supervised billing claims. The HM modifier will be required on all supervised billing claims for clinical services provided by Apprenticed Addiction Professionals (AAPs) and billed under their supervising provider. The addition of this modifier will align AAPs with billing requirements under HCAR 9.103. Following the rate schedule set out for other modifiers under Supervised Billing, the AAPs will be paid at 56% of the rate on file.
